Strategy 2004-10-22 addressing a wide range of issues in applied linguistics using powershell

sociolinguistics and multilingualism this volume focuses on language users
the people making creative connections between existing scholarship in
language policy and contemporary theory and research in other social sciences
authors from around the world offer new critical perspectives for analyzing
language phenomena and language theories suggesting new meeting points among
language users and language policy makers norms and traditions in diverse
cultural geographical and historical contexts identifying and expanding on
previously neglected aspects of language studies the book is inspired by the
work of elana shohamy whose critical view and innovative work on a broad
spectrum of key topics in applied linguistics has influenced many scholars in
the field to think out of the box and to reconsider some basic commonly held
understandings specifically with regard to the impact of language and
linguaging on individual language users rather than on the masses

The Geography of the Peace 1944 presenting a global history of aerial
bombardment this book shows how certain european powers initiated aerial
bombardment of civilians after world war i and how it was an instrument of
choice in world war ii beau grosscup shows that such methods used initially
as a means of terrorizing native populations in africa and the middle east
have become the primary form of terrorism in more recent decades while such
strategic terror is not classed as terrorism in the west this reflects an
unwillingness to confront the human costs and immorality of aerial
bombardment grosscup argues that if terrorism is to be diminished the role of
aerial bombing in sustaining global violence must be recognized
