Globalism in the Middle Ages and the Early Modern Age 2023-09-04 although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different in fact by means of translations and trade for instance global connections were established and maintained over the centuries archetypal motifs developed in many literatures indicate how much pre modern people actually shared but we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course the pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns diplomats crisscrossed the continents and artists poets and craftsmen traveled widely we can identify for instance both the vikings and the arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable
