Eclipse 4.2□□□□□Java□□□□□□□□□ 1883 in the history of mathematics there are many
situations in which cal lations were performed incorrectly for important practical
applications let us look at some examples the history of computing the number began
in egypt and babylon about 2000 years bc since then many mathematicians have
calculated e g archimedes ptolemy vi ete etc the rst formula for computing decimal
digits of was disc ered by j machin in 1706 who was the rst to correctly compute 100
digits of then many people used his method e g w shanks calculated with 707 digits
within 15 years although due to mistakes only the rst 527 were correct for the next
examples we can mention the history of computing the ne structure constant that was
rst discovered by a sommerfeld and the mathematical tables exact lutions and
formulas published in many mathematical textbooks were not veri ed rigorously 25
these errors could have a large e ect on results obtained by engineers but sometimes
the solution of such problems required such techn ogy that was not available at that
time in modern mathematics there exist computers that can perform various
mathematical operations for which humans are incapable therefore the computers can
be used to verify the results obtained by humans to discovery new results to
provetheresultsthatahumancanobtainwithoutanytechnology with respectto our example of

computing we can mention that recently in 2002 y kanada y ushiro h kuroda and m
