dedicated land rover service technician or owner it s a detailed guide to maintenance repair covering many parts of the car and engine 240 pages and more than 250 illustrations and charts size 8 25 x 10 75 inches this publication is a reproduction of the triumph factory workshop manual part number 99 0883 0889 the original 1963 through 1968 workshop manual part number 99 0883 was subsequently updated with the addition of a 1969 through 1970 manual part number 99 0889 ultimately both manuals were merged by the factory into a single combined manual part number 99 0883 0889 this combination resulted in a comprehensive workshop manual for the entire line of uk and usa 650cc unit construction twins produced from 1963 through 1970 however as this publication is a combination of two separate workshop manuals some of the pages are duplicated fortunately they occur sequentially and while one will be for the earlier models the other will apply

to the later models and the reader is encouraged to exercise care in selecting the appropriate page from those duplications— please understand that this is how the factory dealt with the minor differences within this manual unfortunately the distinction between earlier and later models is not very well defined for example depending upon the model the change from 6 to 12 volt electrics was spread over a 3 year period 1964 66 however a fairly significant change occurred in 1968 with the introduction of amal concentric carburetors and a twin leading shoe front brake therefore 1968 is often incorrectly regarded as a demarcation point between early and late models but unfortunately it is not totally accurate there were a number of running changes made throughout the 8 year production run of these models and the way the factory identifies the point where those changes took place is by referencing engine numbers within each individual section of this manual consequently it is important to note with regard to any maintenance and repair instructions and also the specifications in the general data gd section that wherever engine numbers are stated the data will be specific to that particular series therefore the reader is encouraged to read the entire section prior to commencing any work paying close attention to the engine number sub sections owners of the 650cc machines are subjected to considerable confusion surrounding the appropriate selection of the multitude of originals and reprints of the various 650cc manuals that have recently flooded the marketplace however the combination manual 99 0883 0889 is the most comprehensive manual for the entire line of uk and usa 650cc unit construction twins produced from 1963 through 1970 and covers all du101 through du90282 plus the later 1969 through 1970 alpha numeric series engines however it is somewhat scarce and difficult to find in addition many of the changes made during the production run would necessitate the use of both the individual manuals however those changes are combined in their entirety in the 99 0883 0889 manual and we are pleased to offer this reprint as a service to all 650cc unit construction owners the years and models covered are thunderbird 6t 1963 1966 trophy tr6 1963 1970 tr6r1966 1970 tr6c 1966 1967 bonneville t120 1963 1970 t120r 1963 1970 t120c 1963 1965 automotive excellence these are the manuals that created the bentley reputation for clarity thoroughness and indispensability our air cooled volkswagen manuals provide both do it yourself owners and professional mechanics with clear explanations and illustrations detailed service steps and time saving troubleshooting tips in the same tradition as our classic 1961 1965 type 1 manual this manual offers owners of 1960s vintage transporters the long out of print factory repair information indispensable to anyone interested in the history or restoration of the transporter this book includes complete coverage of 1200 and 1500 engines dual circuit brakes and body dimension specifications for all models including those with a sliding sunroof all factory updates are listed by chassis number and date introduced this is the one book no serious type 2 enthusiast should be without 260 pages and more than 290 illustrations and charts size 8 25 x 10 75 inches this publication is a reproduction of the triumph factory workshop manual part number 99 0843 0948 0950 the original workshop manual part number 99 0843 was subsequently updated and merged with workshop manual 99 0948 this merged double manual also included a supplement part number 99 0950 which extended the coverage up to the 1974 models the supplement was appended to the double manual such that section a lubrication system is followed by a section aa lubrication system supplement and section b engine is followed by a section bb engine supplement etc etc this combination of 99 0843 0948 0950 was published as a single workshop manual applicable to the entire range of 350cc and 500cc unit construction twins from 1963 through 1974 this reprint is a faithful reproduction of that combination manual there were a number of running changes made throughout the 11 year production run of these models and the way the factory identifies the point where those changes took place is by referencing engine numbers within each individual section of this manual to assist in identifying the appropriate information applicable to those changes the supplements were appended to the end of each appropriate section consequently it is important to note with regard to any maintenance and repair instructions and also the specifications in the general data gd section that wherever engine numbers are stated the data will be specific to that particular series therefore the reader is encouraged to read the entire section plus the supplemental section prior to commencing any work paying close attention to any engine number notations owners of the 350cc and 500cc machines are subjected to considerable confusion surrounding the appropriate selection of the multitude of originals and reprints of the various 350cc and 500cc manuals that have recently flooded the online marketplace based on our research at least six manuals were issued for different series of engine numbers throughout the 11 year production run however the 99 0843 0948 0950 combination manual is the most comprehensive manual for the entire line of 350cc and 500cc unit construction twins produced from 1963 to 1974 it covers all engine numbers from h29733 through h67331 plus the later 1969 through 1974 alpha numeric series engine numbers unfortunately it is somewhat scarce and difficult to find in addition many of the changes made towards the end of the production run necessitate the use of the supplement and we are pleased to offer this reprint of the combination manual as a service to all triumph 350cc and 500cc unit construction owners the
