this book discusses the main legal and economic challenges to the creation and enforcement of security rights in intellectual property and explores possible avenues of reform such as more specific rules for security in ip rights and better coordination between intellectual property law and secured transactions law in the context of business financing intellectual property rights are still only reluctantly used as collateral and on a small scale if they are used at all it is mostly done in the form of a floating charge or some other all asset security right the only sector in which security rights in intellectual property play a major role at

least in some jurisdictions is the financing of movies on the other hand it is virtually undisputed that security rights in intellectual property could be economically valuable or even crucial for small and medium sized enterprises especially for start ups which are often very innovative and creative but have limited access to corporate financing and must rely on capital markets securitization capital market therefore they need to secure bank loans yet lack their own traditional collateral such as land

Designing Zero Carbon Buildings Using Dynamic Simulation Methods

2017-06-23

a powerful argument for new laws and policies regarding cyber security from the former us secretary of homeland security the most dangerous threat we individually and as a society face today is no longer military but rather the increasingly pervasive exposure of our personal information nothing undermines our freedom more than losing control of information about ourselves and yet as daily events underscore we are ever more vulnerable to cyber attack in this bracing book michael chertoff makes clear that our laws and policies surrounding the protection of personal information written for an earlier time need to be completely overhauled in the internet era on the one hand the collection of data more widespread by business than by government and impossible to stop should be facilitated as an ultimate protection for society on the other standards under which information can be inspected analysed or used must be significantly tightened in offering his compelling call for action chertoff argues that what is at stake is not only the simple loss of privacy which is almost impossible to protect but also that of individual autonomy the ability to make personal choices free of manipulation or coercion offering colourful stories over many decades that illuminate the three periods of data gathering we have experienced chertoff explains the complex legalities surrounding issues of data collection and dissemination today and charts a forceful new strategy that balances the needs of government business and individuals alike

Legal Nurse Consulting Principles and Practices

2019-09-03

this book investigates the impact of eu law and policy on the member states higher education institution hei sectors with a particular emphasis on the exposure of research in universities to eu competition law it illustrates how the gradual application of eu economic law to heis which were predominantly identified as being within the public sector creates tensions between the economic and the social spheres in the eu given the reluctance of the member states to openly develop an eu level hei policy these tensions appear as unintended consequences of the traditional application of the eu treaty provisions in areas such as union citizenship the free movement provisions and competition policy to the hei sector these developments may endanger the traditional non economic mission of european heis in this respect the effects of union citizenship and free movement law on heis have received some attention but the impact of eu competition law constitutes a largely unexplored area of research and this book redresses that imbalance the aim of the research is to show that intended and unintended consequences of the eu economic constitution s are enhanced by a parallel tendency of member states to commercialise formerly public sectors such as the hei sector the book investigates the potential tensions through doctrinal analysis and a qualitative study focussing on the exposure of hei research to eu competition law as an under researched example of exposure to economic constraints it concludes that such exposure may compromise the wider aims that research intensive universities pursue in the public interest andrea gideon is a postdoctoral research fellow at the centre for law business national university of singapore for which she has suspended her position as lecturer in law at the university of liverpool in her current project she is investigating the application of competition law to public services in asean her previous research concerned tensions between the economic and the social in the eu with a focus on eu competition law in which research area she earned her phd at the university of leeds in 2014

the announcement by china that it will implement a national emissions trading scheme confirms the status of this instrument as the pre eminent policy choice for mitigating climate change china will join the dozens of existing and emerging schemes around the world from the eu to california south korea to new zealand that use carbon units otherwise known as emissions permits or carbon credits to trade in greenhouse gas emissions in a multi billion dollar global carbon market however to date there has been no consensus about this pre eminent policy instrument being regulated by international economic law through the world trade organization international investment agreements and free trade agreements munro addresses this issue by evaluating whether carbon units qualify as goods services financial services and investments under international economic law and showing how international economic law applies to emissions trading scheme in diverse and unexpected ways further by engaging in a comparative assessment of schemes around the world his book illustrates how and why all emissions trading

schemes engage in various forms of violations of international economic law which would not in most instances be justified by environmental or other exceptions in doing so he demonstrates how such schemes can be designed or reformed in ways to ensure their future compliance
