the new york times bestseller a new york times notable book the tale of how konnikova followed a story about poker players and wound up becoming a story herself will have you riveted first as you learn about her big winnings and then as she conveys the lessons she learned both about human nature and herself the washington post it s true that maria konnikova had never actually played poker before and didn t even know the rules when she approached erik seidel poker hall of fame inductee and winner of tens of millions of dollars in earnings and convinced him to be her mentor but she knew her man a famously thoughtful and broad minded player he was intrigued by her pitch that she wasn t interested in making money so much as learning about life she had faced a stretch of personal bad luck and her reflections on the role of chance had led her to a giant of game theory who pointed her to poker as the ultimate master class in learning to distinguish between what can be controlled and what can t and she certainly brought something to the table including a ph d in psychology and an acclaimed and growing body of work on human behavior and how to hack it so seidel was in and soon she was down the rabbit hole with him into the wild fiercely competitive overwhelmingly masculine world of high stakes texas hold em their initial end point the following year s world series of poker but then something extraordinary happened under seidel s guidance konnikova did have many epiphanies about life that derived from her new pursuit including how to better read not just her opponents but far more importantly herself how to identify what tilted her into an emotional state that got in the way of good decisions and how to get to a place where she could accept luck for what it was and what it wasn t but she also

began to win and win in a little over a year she began making earnest money from tournaments ultimately totaling hundreds of thousands of dollars she won a major title got a sponsor and got used to being on television and to headlines like how one writer s book deal turned her into a professional poker player she even learned to like las vegas but in the end maria konnikova is a writer and student of human behavior and ultimately the point was to render her incredible journey into a container for its invaluable lessons the biggest bluff of all she learned is that skill is enough bad cards will come our way but keeping our focus on how we play them and not on the outcome will keep us moving through many a dark patch until the luck once again breaks our way

social entrepreneurship increasingly assumes a position of strength in the dynamic milieu of late modern democratic societies a plethora of companies have now arisen everything from mighty social enterprises like warby parker and toms to tiny outfits like clean slate and bright endeavors whose business focused approach to social problems is not merely additive but integral to their missions these companies respond not only to a felt proliferation of humanitarian and environmental predicaments but also to enormous shifts in in public feelings and technological sensibilities these predicaments and make social entrepreneurs urgently needed and remarkably complicated but if social entrepreneurs deal with that complexity with a business as usual approach to making the world better imitating for example corporate social responsibility initiatives by transnational companies they will lose their vital distinctiveness and efficacy drawing on a transdisciplinary perspective close rhetorical analysis and qualitative interviews with social entrepreneurs this book argues that one good way to keep social business disruptive is to rethink how organizations model their communication instead of assuming a conventional theory of communication neatly organized around the relations of

senders and receivers social entrepreneurship should enact a performative model of communication in which messaging and action are affectively woven this book offers suggestions for making this performative model sustainably disruptive in relation to questions that pester social entrepreneurs how to tell the company story how to raise awareness how to address complex audiences and how to solve problems
