2006

partial presentation of designs by some of the most influential and innovative architects

New Directions in Reference

2014-10-07

new directions in american politics introduces students not just to how the american political system works but also to how political science works la raja brings together top scholars to write original essays across the standard curriculum of american government and politics capturing emerging research in the discipline in a way that is accessible for undergraduates each chapter combines substantive knowledge with the kind of skill building and analytical inquiry that is being touted in higher education everywhere contributors to new directions highlight why the questions they seek to answer are critical for understanding american politics and situate them in the broader context of controversies in research the teaching of american politics follows a well worn path textbooks for introductory courses hew to a traditional set of chapters that describe the founding american institutions the ways citizens participate in politics and sometimes public policy the material rarely engages students in the kind of questions that animate scholarship on politics one hurdle for instructors is finding material that reflects quality scholarship and thus teaches students about why not just what and yet is accessible for undergraduates articles in scholarly journals

are typically unsuited for undergraduate courses particularly introductory courses what is needed is a book that conveys exciting trends in scholarship across vital topics in american politics and illustrates analytical thinking new directions in american politics is that book and will be an ideal companion to standard textbooks that focus mostly on nuts and bolts of politics the book features contributions from a top notch cast of active scholars and a highly regarded editor a focus on analytical thinking that addresses questions of causality full coverage of the american politics curriculum short interviews with each contributor on a companion website to help the research come alive and prompt critical thinking questions for students work that draws on the highest quality research in political science but is written specifically for first year undergraduate students there is simply no book like this available to the growing number of faculty who want their introductory american politics course to be a reflection of the political science discipline and not just the nuts and bolt facts of the american political system

New Directions in Tropical Asian Architecture

2022-04-25

this book considers key ethical questions in museum policy and practice particularly those related to issues of collection and display what does a collection signify in the twenty first century museum how does an engagement with immateriality challenge museums concept of ownership and how does that immateriality translate into the design of exhibitions and museum space are museums still about safeguarding objects and what does safeguarding mean for diverse individuals and communities today how does the notion of the museum as a performative space challenge our perceptions of the object the scholarship represented in this volume is a testament to the range and significance of critical inquiry in museum ethics together the chapters resist a legalistic interpretation bound by codes and common practice to advance an ethics discourse that is richly theorized constantly changing and contingent on diverse external factors contributors take stock of innovative research to articulate a new museum ethics founded on the moral agency of museums the concept that museums have both the capacity and the responsibility to create social change this book is based on a special issue of museum management and curatorship

New Directions in Trade Theory

2002-04-17

this book exemplifies the nurturing spirit of inter discursive debate with a view to opening up new theoretical and empirical insights understanding and engagement with debates on issues relating to pedagogy policy equity and embodiment from a variety of social science perspectives an international force of contributors apply a multitude of concepts to research agendas which illustrate the multiple ways in which the body both impacts culture and is simultaneously and seamlessly positioned and shaped by it maintaining social reproduction of class and cultural hierarchies and social regulation and control they attest that once we begin to trace the flow of knowledge and discourses across continents countries regions and communities by registering their re contextualisation both within various popular pedagogies e g newspapers film tv web pages it and the formal and informal practices of schools families and peers we are compelled to appreciate the bewildering complexity of subjectivity and the ways in which it is embodied indeed the chapters suggest that no matter how hegemonic or ubiquitous discursive practices may be they inevitably tend to generate both intended and unexpected affects and effects people and populations cannot easily be determined suppressed or controlled this book was originally published as a special issue of sport education and society

New Directions In Comparative Politics, Third Edition

2018-07-02

a comprehensive study that is also practical and realistic new directions in special education outlines principles for decisionmaking about special education at every level from the family to the classroom school and district and for state and federal policy with this volume leading scholar and disability advocate thomas hehir opens a new round of debate on the future of special education extending the conceptual framework developed in his seminal 2002 article in the harvard educational review eliminating ableism in education hehir examines the ways that cultural attitudes about disability systematically distort the education of children with special needs and uses this analysis to lay out a fresh approach to special education policy and practice hehir traces the roots of ableism the pervasive devaluation of people with disabilities and shows how negative attitudes continue to shape debates in the field he assesses recent trends in special education policy particularly the shift of emphasis from compliance to outcomes and discusses in depth the successes and limitations of the inclusion movement he also investigates the impact of standards based reforms on children with disabilities and critically examines the promise of universal design for learning

New Directions in Crochet

1993-09-30

provides the most up to date and comprehensive review of contemporary research in education policy implementation a companion to allan r odden s education policy implementation also published by suny press this book presents original work by a new generation of scholars contributing to education policy implementation research the contributors define education policy implementation as the product of the interaction among particular policies people and places their analyses of previous generations of implementation research reveal that contemporary findings not only build directly on lessons learned from the past but also seek to deepen past findings these contemporary researchers also break from the past by seeking a more nuanced contingent and rigorous theory based explication of how implementation unfolds they argue that researchers and practitioners can help improve education policy implementation by not asking simply what works but rather focusing their attention on what works for whom where when and why meredith i honig is assistant professor of educational leadership and policy studies at the university of washington at seattle
