a warning and a wake up call to learn history so we are not doomed to repeat it a must read for anyone who longs for a promising future for our great nation what is wrong with america today is it possible that america could crumble and our democracy fail questions like these plague americans and cause us to be anxious about the future of the land that we love individuals may come to different conclusions but there seems to be a common thread the deep seated feeling that we need to improve our country our culture is increasingly immoral the family structure is threatened from all sides and government programs consistently overreach creating massive debt in this powerful and prophetic book

nationally syndicated columnist and trusted political commentator cal thomas offers a diagnosis of what exactly is wrong with the united states by drawing parallels to once great empires and nations that declined into oblivion citing the historically proven 250 year pattern of how superpowers rise and fall he predicts that america s expiration date is just around the corner and shows us how to escape their fate through biblical insights and hard hitting truth he reminds us that real change comes when america looks to god instead of washington scripture rather than politics is the gps he uses to point readers to the right road a road of hope life and change because he says if we re willing to seek god first learn from history and make changes at the individual and community level we can not only survive but thrive again this powerful timely and much needed perspective is a must read for anyone who longs for a promising future for our great nation
