applying systemic functional linguistics sfl to descriptive translation studies dts to three translations of a classic chinese text zhao proposes a new model for linking translator positioning with translational norms in the target culture zhao combines the appraisal model from sfl with a characterisation model to describe the role of translator positioning in character construction looking at three different translations of the classic chinese novel luotuo xiangzi she uses corpus tools to compare the opening and ending chapters of each translation identifying textual patterns of translator positioning she then analyses and compares the cover designs of the translated novels and reconstructs the translational norms governing the translator s positioning in characterisation in doing so she contributes to dts by developing a systematic and consistent framework to analyse verbal and visual elements in translated novels her multimodal analysis also provides insights into the broader patterns of translated language an insightful read for scholars interested in both theoretical and empirical approaches to translation studies
