in retrospect historical change often appears to be both logical and inevitable yet as a process as a series of moments it is by nature open ended the protagonists are unaware of the potential consequences of their choices as well as the meaning of their actions in the greater scheme of things an individual in real time and in the middle of events has little scope for understanding the whole the dynamic of a regime change involves a journey away from a particular past towards a chosen future while the practices of the old regime are called into question the competing visions for a better future often include a reactionary option looking back towards an older period perceived as a golden age waiting to be restored in the aftermath of a regime change the new cadres seeking to consolidate their power form the new conservative bloc of the society when revolutionary forces again begin to gather the regime disintegrates and the cycle begins again so far regime changes have been analysed as unique one off events this book traces what such processes regardless of their ideological colour have in common how does political power change hands what are the mental and material tools of change from the last stages of world war i to the present crimean crisis the case studies in this book offer timeless insights for understanding ideological and military conflicts including the undercurrents of the present russo western relations
