Workshop Proceedings of the 11th International Conference on Intelligent Environments 2019-11-02

this year s conference is organized by the greek
foundation for research in the quantitative social
and economic subjects which is a non profit
company with articles of association registered in
the chamber of non for profit organizations this
conference is a continuation in a broader sense of
the four international conferences which were
organized by myself during the years 2003 2009
2013 and 2015 under the auspices of the
technological educational institute of athens and
of the 1st international conference on

quantitative social biomedical and economic issues
june 29 30 2017 athens organized under the
auspices of the greek foundation for research in
the quantitative social and economic subjects this
conference is focusing on the emerging new
technologies in every sector financial social
biomedical humanitarian educational and economic
the influence which they exercise on management
education economy information and communication
medicine outer space research and the dangers and
complications in people s behavior generated from
the uncontrollable use of the new technologies

First International Conference on Sustainable Technologies for Computational Intelligence **2003-08-02**

this book comprises select papers from the
international conference on artificial
intelligence and sustainable engineering aise 2020
the volume focuses on the recent advancements in
artificial intelligence and addresses how it is
useful in achieving truly sustainable solutions
the key strands of this book include artificial
intelligence in healthcare iot for modern life
security and surveillance big data analytics
machine learning and computing communication
technologies gesture technology virtual
intelligence and audio speech processing the book
addresses sustainability challenges in various
computing techniques and opportunities for

sustainable engineering based on ai and supporting tools such as engineering design for sustainable development using iot ai smart cities waste minimization remanufacturing reuse and recycling technologies using iot ai industry 4 0 intelligent and smart grid systems energy conservation using technology green engineering technology robotic process automation rpa and water and air quality management this book can be a valuable resource for academicians researchers and professionals working in ai and its applications

Proceedings of the 6th International Conference on Axiomatic Design 2016-11-09

this proceedings presents the papers from urb iot 2018 3rd eai international conference on iot in urban space which took place in guimarães portugal on 21 22 november 2018 the conference aims to explore the emerging dynamics within the scope of the internet of things iot and the new science of cities the papers discuss fusion of heterogeneous urban sources understanding urban data using machine learning and mining techniques urban analytics urban iot infrastructures crowd sourcing techniques incentification and gamification urban mobility and intelligent transportation systems real time urban information systems and more the proceedings discuss innovative technologies that navigate industry and connectivity sectors in transportation utility public safety healthcare and education the authors also discuss the

increasing deployments of iot technologies and the rise of the so called sensed cities which are opening up new avenues of research opportunities towards that future
