considered the contributors give an overview of the current theories and practices that have helped to minimise the harmful effects of drugs and describe national and city level strategies towards drug problems they also cover the drug policies of several agencies and organisations world wide including police doctors community groups and local authorities concentrating on reducing drug related harm this in an important contribution to the debate on the future shape of drug control systems it questions the role and function of existing drug laws and discusses how harm reduction will shape day to day work with drug users provocative and persuasive it should be read by all policy makers and practitioners faced with drugs problems and will do much to help establish new strategies for dealing with drug use strategies that minimise rather than exacerbate drug related harm widely praised as a controversial but thoughtful alternative to drug control policies of its time the first edition of the great drug war was released in 1987 by macmillan publishing more than 20 years later it is clear that the drug interdiction policies of the eighties and nineties failed and that trebach s alternative proposals deserve a new look from today s perspective this new edition includes a new introduction covering more recent developments in the use of medical marijuana the relationship between drug trafficking and terrorism and other fresh new material renewing an important book for a new generation of readers khat marijuana peyote are these dangerous drugs or vilified plants with rich cultural and medical values in this book lisa gezon brings the drug debate into the 21st century proposing criteria for evaluating psychotropic substances focusing on khat whose bushy leaves are an increasingly popular stimulant and the target of vehement anti drug campaigns she explores biocultural and socioeconomic contexts on local national and global levels gezon provides a multidisciplinary examination of the plant s direct physical and psychological effects as well as indirect social and structural effects on income and labor productivity identity gendered relationships global drug discourses and food security this sophisticated multi leveled analysis cuts through the traditional battle lines of the drug debate and is a model for understanding and evaluating psychotropic substances around the world a groundbreaking collection of essays highlighting the links between contemporary society s over reliance on both media and drugs leading authorities on drugs discuss the use abuse and effects of marijuana alcohol lsd heroin and other drugs and the alternatives to drug use this is designed to bring the everyday reader face to face with drugs of abuse and addiction through frank no nonsense explanations of the stimulants depressants psychedelics and inhalants this accessible guide will help the reader to understand how drugs of abuse affect thinking behavior perceptions and emotions current approaches to drugs tend to be determined by medical and criminal visions that emerged over a century ago the concepts of addiction on the one hand and drug control on the other having imposed themselves as the unquestionable central notions surrounding drug issues and discourses pathologization and criminalization are the dominant perspectives on psychoactive drugs and it is difficult to describe drug consumption in any terms other than those of medicine or to conceive of regulation except in terms of control and eradication drugs and culture presents other voices and understandings of drug issues highlighting the socio cultural features of drug use and regulation in modern societies it examines the cultural dimensions of drugs and their regulation with special attention to questions of how consumption of specific psychoactive substances becomes associated with particular social groups the social dynamics involved in our coming to think of these phenomena as we do and the factors that determine the political and policy responses to drug use adopting approaches from anthropology sociology history political science and geopolitics to challenge the prevailing pathologization and criminalization of drug use this book provides international and comparative perspectives on drug research based on the latest research in europe the usa the middle east and hong kong in this volume contributors employ sociological and public health perspectives to offer insights into behaviours common at raves and nightclubs the volume provides theoretical observations on illicit club drug use and supply helping to challenge current orthodoxies on the role of drug use within young peoples lives drawing material from the usa uk and hong kong the volume allows the demystification of stereotypical presentations surrounding young people who attend clubs and or use club drugs this work provides a badly needed and objective analysis of youthful drug use and a foundation from which future

sociological and public studies on young people clubs and drugs as well as young people themselves will benefit current approaches to the drug problem are not working and almost everyone agrees that more effective solutions are needed this comprehensive volume offers a dynamic new approach to understanding and solving the drug problem this text applies the techniques and formulations of general semantics to investigate and make recommendations about various aspects of drug abuse general semantics a process problem solving approach based on the primacy of the scientific method and importance of language as a shaper of thoughts and perceptions has a proven record of success in problem solving across a wide variety of disciplines and fields topics examined include american drug history and policy the legalization issue drugs and creativity treatment and prevention a chronological overview of drug taking in human history and a resource guide are provided one chapter offers an in depth description of an effective drug abuse prevention model and a program using the model the history of drug abuse prevention campaigns suggests limitations in producing measurable changes in behavior in the past there was concern over the possibility of such publicity actually encouraging interest in drug use rather than discouraging such behavior although little or no scientifically sound empirical evidence has been found to support such a view several social science textbooks still refer to this as something of which to be wary reviews of early research appear to indicate inadequate methods and a lack of rigor in theory testing in recent years however research in communication and its uses in drug abuse prevention has become considerably more sophisticated and communication is being used far more effectively in this book the editors bring together some of the most successful drug abuse prevention researchers in the country along with other experts in this field or in persuasive communication to address use and effects of both mass media and interpersonal strategies this collection illustrates just how far the study of public influence through mass media has come especially regarding such a vital relevant issue as drug abuse prevention explains the medical benefits of cannabis discusses its use in the treatment of back pain arthritis insomnia epilepsy and aids and tells how to make tinctures and topical applications this book describes the processes that are involved in the development of new drugs the authors discuss the history role of natural products and concept of receptor interactions with regard to the initial stages of drug discovery in a single highly readable volume it outlines the basics of pharmacological screening drug target identification and
