professional and the chief information officer with information such that they can do their duty protect the information assets of their organizations where presidents or members of affluent families were previously seen it is increasingly the case that car manufacturers are owned by banks and investment funds which have taken control of the entire economic life of these firms this has significant impact on the terms of

employment and layoffs wages and precarious work growing inequalities in income strata compensation levels for executives and the implementation of short termist strategies across business operations this book explores this increasing financialisation the predominance of the financial sector over the productive sector in the automotive industry in particular it is shown that the financial operations of these companies through leasing insurance loans and other financial instruments is now much more profitable than the manufacturing aspects of the business which was originally the *raison d'être* for these firms the chapters demonstrate how there are great demands to increase the return to shareholders as a main concern despite other metrics and or other stakeholders the work studies the impact of financialisation at the world's five largest automakers which together represent almost 50% of car production providing an exploratory analysis of profitability shareholder composition compensation to executives workers salaries dividend payments to shareholders and employment encouraging debate on contemporary economy this book marks a significant addition to the literature on financialisation contemporary forms of capitalism labour and economic sociology more broadly the definitive guide to the smart card industry will help you to keep track of the major
