this memorandum contains a highly detailed program listing for the logic theory machine lt a computer program written in information processing language v ipl v and developed especially for use as a pedagogical model the text portions of the memorandum expand upon the documentation in the listing tracing program flow analyzing routines utilized and providing insight into the structure and the development of the program lt was originally programmed in an early version of ipl by newell shaw and

simon to derive proofs of logic expressions in the sentential calculus of whitehead and russell in rewriting the program for use as a teaching aid a new method of replacement on subexpressions has been included and many minor changes effecting improvements in clarity have been incorporated features of the code that were unjustifiably hard to explain have been simplified the memorandum defines lt s activity in terms of problem solving and then a representation of the defined problem is given in terms of ipl v finally what lt does is discussed in terms of process hierarchies which operate on the lists structure representations of logic expressions author

layer of protection analysis lopa is a recently developed simplified method of risk assessment that provides the much needed middle ground between a qualitative process hazard analysis and a traditional expensive quantitative risk analysis beginning with an identified accident scenario lopa uses simplifying rules to evaluate initiating event frequency independent layers of protection and consequences to provide an order of magnitude estimate of risk lopa has also proven an excellent approach for determining the safety integrity level necessary for an instrumented safety system an approach endorsed in instrument standards such as isa s84 and iec 61511 written by industry experts in lopa this pioneering book provides all the necessary information to undertake and complete a layer of protection analysis during any stage in a processes life cycle loaded with tables charts and examples this book is invaluable to technical experts involved with ensuring the safety of a process because of its simplified quicker risk assessment approach lopa is destined to become a widely used technique join other major companies and start your lopa efforts now by purchasing this book
