an eyewitness to profound change affecting marine environments on the newfoundland coast antony adler argues that the history of our relationship with the ocean lies as much in what we imagine as in what we discover we have long been fascinated with the oceans seeking to pierce the profundity of their depths in studying the history of marine science we also learn about ourselves neptune s laboratory explores the ways in which scientists politicians and the public have invoked ocean environments in imagining the fate of humanity and of the planet conjuring ideal world fantasies alongside fears of our species weakness and ultimate demise oceans gained new prominence in the public imagination in the early nineteenth century as scientists plumbed the depths and marine fisheries were industrialized concerns that fish stocks could be exhausted soon emerged in europe these fears gave rise to internationalist aspirations as scientists sought to conduct research on an oceanwide scale and nations worked together to protect their fisheries the internationalist program for marine research waned during world war i only to be revived in the interwar period and again in the 1960s during the cold war oceans were variously recast as battlefields post apocalyptic living spaces and utopian frontiers the ocean today has become a site of continuous observation and experiment as probes ride the ocean currents and autonomous and remotely operated vehicles peer into the abyss embracing our fears fantasies and scientific investigations antony adler tells the story of our relationship with the seas

our spiritual destiny manifesting new bodies discusses the ways that evolutionary forces are continuing to unfold through all gradations of life it explains the purpose of human life as the expansion of consciousness in matter through ongoing body development we have the choice to fulfill this purpose consciously at an accelerated pace by changing and raising the matter of our bodies to a level of our divine essence utilizing the capacities of our higher selves within an initiatory framework of growth and transmutation we can actively participate in our body development thereby helping to expedite the manifestation of new bodies the following are passages from various chapters in the book from alignment clarification many of the ancient wisdom traditions sacred religious texts and modern day writers have all alluded to some form of physical transcendence life extension or the raising and refinement of the physical body from the past each culture religion or entity has its own interpretation and language of what the stories mean or symbolize and how they apply to the present day i believe that many of these references relate to physical ascension physical body perfection or physical immortality all include the same premise that our bodies are of a nature and essence which enable their transformation from our journey into matter i have come to see all of creation as a work in progress gradually working its way towards fulfillment through evolutionary forces matter is continually being prepared to express ever higher aspects of consciousness in our physical life it may not always seem like it but i also believe we are important agents of change for the expansion of consciousness in the world our immortal human spirit repeatedly reincarnates within humanity with increasing experience to help unfold and expand a higher plan for matter however our main problem with this task is that by taking physical form in matter bodies we cannot remember our divine origins in the inner unseen realms from remembering some religious scholars suggest that the essence of all sacred material is somehow buried deep within our being if this is true then helping us remember must be the intent and purpose of all divinely inspired sacred books spiritual literature and cultural myths in the world somewhere in our being or higher self we already know the purpose of physical life in matter as evolution progresses and our consciousness expands through time we are incrementally working towards remembering this purpose from spiritual orientation and alignment for most of us the physical demands of our daily lives capture our conscious attention and vital energies this happens gradually within our ritualized patterns and daily activities through this physical focus and orientation the crystallizing force in matter constructs barriers within our consciousness and bodies that maintain and reinforce this alignment because of its compelling and coalescing nature our life energies are drained through attachment to the form and routine of our lives as a result we usually feel and believe we have little left over to devote to our spiritual development from health and new body alignment most people have grown up with a body centered identity everything about living in the world

seems to condition us to identify with this orientation the realities of physical life throughout history have encouraged us to strengthen build up or perfect our natural body in one way or another this alignment has ensured the survival of our species even today in our modern world we continue to value the attributes of physical strength fitness and vitality as the ultimate experience of a good life from the standpoint of our present bodies and our collective beliefs about them this orientation is helpful and necessary however
