*ECRM 2018 17th European Conference on Research Methods in Business and Management 2018-07-12* this is a splendidly fresh and clear account of the main political events in England between the Norman Conquest and King John's Magna Carta. Michael Clanchy, FBA, Emeritus Professor of Medieval History at the Institute of Historical Research, University of London, lucid and perceptive, striking an effective balance between primary and secondary authorities. Huscroft's book is both a significant statement in its own right and an ideal introduction to other work in the field. Professor David Carpenter, King's College London, ruling England is about the exercise of political power in England at a time of formative change in the country's history, framed at one end by the Norman Conquest and at another by Magna Carta. It describes what happened, why, and with what consequences in politics, government, law, and the church. It analyses developments from a royal perspective and focuses on the policies and priorities of the English kings, the limitations of the political system within which they operated, and the efforts they made to expand their power. It explains how the ruler of the most sophisticated kingdom in twelfth-century Europe was eventually compelled to submit to the humiliation.

*Atlas of Seeds and Fruits of Central and East-European Flora* 2006 a right to equality and non discrimination is widely seen as fundamental in democratic legal systems but failure to identify the human interest that equality aims to uphold reinforces the argument of those who attack it as morally empty or unsubstantiated and weakens its status as a fundamental human right this book argues that an understanding of the human interest which equality aims to uphold is feasible within the jurisprudence of the european court of human rights ecthr and the european court of justice ecj in comparing the evolution of the prohibition of discrimination in the case law of both courts charilaos nikolaidis demonstrates that conceptual convergence within the european convention on human rights echr and the eu on the issue of equality is not as far as it might appear initially while the two bodies of equality law are extremely divergent as to the requirements they impose their interpretation by the international judiciary might be properly analysed under a common light to emphasise the substantive dimension of equality in european human rights law the book will be of great use and interest to scholars and students of human rights discrimination law and european politics
