Solving Management Problems 1979

there are many books about implemented strategic plans yet only 5 of plans are implemented as planned or meet their objectives no one seems to have asked why this is until now it is the thesis of this book that the implementation of strategic plans fail because the paradigm we use is wrong the solution to the problem is to acknowledge that collective human behavior occurs in complex socio cultural systems and secondly to change the method by which we inquire into and solve organizational problems by using a systems approach in terms of such an approach the key to organizational change is to change an organization s culture and the key to changing culture is leadership there should be an appropriate fit between how activities in the organization are structured the organization s culture and its leadership function the leadership function initiates change by creating a vision of the organization s future to which people may aspire and drives change by enabling and aligning people to the vision the most effective way for changing beliefs and assumptions is by action learning and facilitative leadership leadership is not a simple unitary concept but is itself a complex social function and system
