an accompanying interactive dvd which contains a wealth of supplementary material including a procedures and equipment library case based scenarios to aid recall of important facts and a summary of important critical care literature

NHSQIC Annual Bibliography

1981

as women continue to bear children all parents should ask the following question how can a woman fulfill her unique responsibility as mother to her child when prevailing parenting practices deny the importance of breastfeeding and maternal care maternal care is now thought to be impractical and a luxury for those who can afford it thus many women need to defend their right and responsibility to care for even the youngest of babies dr kawasaki a pediatrician and stay at home mother of two asserts in mothering with breastfeeding and maternal care that current attitudes toward mothering have not evolved naturally over the course of a century child rearing experts sociologists and feminists have made systematic efforts to undermine the importance of a woman's role in the home dr kawasaki offers compelling reasons for parents to think seriously about the unique role women play in their children's lives particularly in early childhood she argues that the priceless benefits of breastfeeding and hands on maternal care help to ensure the optimal growth and development of young babies and children

Metabolic Diseases

2017-01-06
