programs energy efficiency standards which started out as an action to reduce
demand for energy in individual countries has now become a subject of regional
and even worldwide dimension particularly in the context of global climate
change mitigation mandatory energy efficiency standards are in place for some
appliances in china canada mexico the philippines and the united states
standards for refrigerator freezers will take effect in australia and the
european union in 1999 voluntary energy efficiency standards are in place for
refrigerators in brazil india and korea and for air conditioners in india japan
and korea table i showed potential global energy use reductions from codes and
standards in buildings if individual country data can be assembled a more
accurate approach to estimating potential reductions in energy use and carbon
emissions would be to perform a bottom up analysis for energy using equipment
on an end use basis in as many large developing countries as possible the
impact of standards would be assessed as more efficient appliances replaced
existing stock models and new purchases that increased saturation rates were
made at higher efficiencies than would otherwise be the case this approach
would show the slow but steady buildup of annual energy savings from efficiency
standards or other programs to improve energy efficiency life magazine is the

with this masterful work louis a perez jr transforms the way we view cuba and
its relationship with the united states on becoming cuban is a sweeping
cultural history of the sustained encounter between the peoples of the two
countries and of the ways that this encounter helped shape cubans identity
nationality and sense of modernity from the early 1850s until the revolution of
1959 using an enormous range of cuban and u.s sources from archival records and
oral interviews to popular magazines novels and motion pictures perez reveals a
powerful web of everyday bilateral connections between the united states and
cuba and shows how u.s cultural forms had a critical influence on the
development of cubans sense of themselves as a people and as a nation he also
articulates the cultural context for the revolution that erupted in cuba in
1959 in the middle of the twentieth century perez argues when economic hard
times and political crises combined to make cubans painfully aware that their
american influenced expectations of prosperity and modernity would not be
realized the stage was set for revolution with this masterful work louis a p
