no other western settlement story is more famous than the donner party's ill fated journey through the sierra nevada mountains but a few years later and several hundred miles south another group faced a similar situation just as perilous scrupulously researched and documented grit and gold tells the story of the death valley jayhawkers of 1849 and the young men who traveled by wagon and foot from iowa to the california gold rush the jayhawkers journey took them through the then uncharted and unnamed hottest driest lowest spot in the continent now aptly known as death valley after leaving salt lake city to break a road south to the pacific coast that would eliminate crossing the snowy sierra nevada the party veered off the old spanish trail in southern utah to follow a mountaineer's map portraying a bogus trail that claimed to cut months and hundreds of miles off their route to the gold country with winter coming however they found themselves hopelessly lost in the mountains and dry valleys of southern nevada and california abandoning everything but the shirts on their backs and the few oxen that became their pitiful meals they turned their dreams of gold to hopes of survival utilizing william lorton's 1849 diary of the trek from illinois to southern utah the reminiscences of the jayhawkers themselves the keen memory of famed pioneer william lewis manly and the almost daily diary of sheldon young johnson paints a lively but accurate portrait of guts grit and determination

research in science education rise volume 6 research based undergraduate science teaching  
examines research theory and practice concerning issues of teaching science with undergraduates  
this rise volume addresses higher education faculty and all who teach entry level science the focus is  
on helping undergraduates develop a basic science literacy leading to scientific expertise rise volume  
6 focuses on research based reforms leading to best practices in teaching undergraduates in science  
and engineering the goal of this volume is to provide a research foundation for the professional  
development of faculty teaching undergraduate science such science instruction should have short  
and longterm impacts on student outcomes the goal was carried out through a series of events over  
several years the website at nseus.org documents materials from these events the international call  
for manuscripts for this volume requested the inclusion of major priorities and critical research areas  
methodological concerns and results of implementation of faculty professional development programs  
and reform in teaching in undergraduate science classrooms in developing research manuscripts to  
be reviewed for rise volume 6 researchers were asked to consider the status and effectiveness of  
current and experimental practices for reforming undergraduate science courses involving all

undergraduates including groups of students who are not always well represented in stem education to influence practice it is important to understand how researchbased practice is made and how it is implemented the volume should be considered as a first step in thinking through what reform in undergraduate science teaching might look like and how we help faculty to implement such reform
