1 if a 1 b 1 c 1 d 1 bojan kovacevic jun 10 2013 at 11 26 do you mean a and b equals 1 or c and d 1 or a 1 and b or c 1 and d 1 it is not clear imane fateh jun 10 2013 at 11 27 2 this is the case for most languages btw not just javascript user428517 jun 10 2013 at 11 29 2 the and operator in javascript is a logical operator that combines two or more conditions it returns true only if all the conditions being evaluated are true if any of the conditions is false the entire expression evaluates to false example let issunny true let iswarm true if issunny iswarm js for initialization condition afterthought statement when a for loop executes the following occurs the initializing expression initialization if any is executed this expression usually initializes one or more loop counters but the syntax allows an expression of any degree of complexity this expression can also declare variables javascript and operator is used to perform logical and operation on two boolean operands and operator is usually used in creating complex conditions like combining two or more simple conditions and operator symbol the symbol used for and operator is advertisement syntax the syntax to use and operator with operands a and b is a b instead of writing text cars 0 br text cars 1 br text cars 2 br text cars 3 br text cars 4 br text cars 5 br you can write for let i 0 i cars length i text cars i br try it yourself different kinds of loops the modern javascript tutorial how it s done now from the basics to advanced topics with simple but detailed explanations search last
