i disliked numbers and they didn t think much of me either this famous quote by r j anderson says a lot about the finance of most companies worldwide badly run companies don t want to know how bad they re doing however even companies that are doing well are missing out on gains due to poor accounting and inadequate financial analysis poor accounting and finance can

result in the non acquisition of loans mistrust of business partners poor business decisions and in the long run even loss of assets or business after all the management of a company is responsible for the accuracy of its financial statements therefore the quality and professional competencies of the employees in the accounting service should be a criterion that weighs the price of the service especially in times of crisis cooperation between accounting services and management is very important maybe the last business year was worse than the previous one so it is even more important how the company presented the basic information the relationship between customers and suppliers the amount of financial liabilities the ratio of financial liabilities to the maturity of assets capital to finance operations turnover of funds and so on too often banks give companies a worse credit rating and then a lower borrowing limit as a consequence of poor accounting presentation this can mean fewer loans at a higher interest rate in the worst case the credit rating committee even rejects the company here s what s included in this book understand the important of accurate financial data analysis interpret income statements balance sheet and cash flow statements with lots of examples valuation ratios that are essential to run a business two techniques to manage asset valuations two critical metrics to analyze company growth two critical metrics to analyze company stability how anova and t test can be used to make business decisions how to inflation proof your business cost of capital and risk management and much more enjoy

behavioral finance presented in finance for normal people is a second generation behavioral finance the first generation starting in the early 1980s largely accepted standard finance s notion of people s wants as rational wants restricted to the utilitarian benefits of high returns and low risk that first generation commonly described people as irrational succumbing to cognitive and emotional errors and misled on their way to their rational wants the second generation describes people as normal it begins by acknowledging the full range of people s normal wants hope for riches and freedom from the fear of poverty nurturing our children and families being true to our values gaining high social status playing games and winning and more it distinguishes normal wants from errors and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants people s normal wants even more than their cognitive and emotional shortcuts and errors underlie answers to important questions of finance including saving and spending portfolio construction asset pricing and market efficiency these are presented in this book we often hear that behavioral finance is nothing more than a collection of stories about irrational people misled by cognitive and emotional errors that it lacks the unified structure of standard finance yet today s standard finance is no longer unified because wide cracks have opened between its theory and the evidence this book offers behavioral finance as a unified structure that incorporates parts of standard finance replaces others and includes bridges between theory evidence and practice

our prosperity requires the enterprise of innumerable individuals and businesses who exercise their imagination and judgment and bear responsibility for outcomes and widespread enterprise is fostered through dialogue and relationships not merely prices in anonymous markets yet modern finance blatantly neglects these necessary elements for enterprise in the last several decades finance has become increasingly centralized distanced and mechanistic instead of many lending officers making judgments about borrowers they know credit decisions are the output of the models of a few wall street wizards and credit agencies this robotic centralized finance stifles the dynamism of the real economy and leads to recurring collapses a call for judgment clearly explains how bad theories and mis regulation have caused a dangerous divergence between the real economy and finance in simple language bhid takes apart the so called advances in modern finance showing how backward looking top down models were used to mass produce toxic products thanks to excessively tight securities laws and loose banking laws anonymous transactions have displaced relationship based finance and bhid offers tough simple rules for restoring relationships and case by case judgment limit banks and all deposit taking institutions to basic lending and nothing else a call for judgment is both a primer on the role of finance in a dynamic modern economy and a cautionary tale about the pitfalls of banks functioning as highly centralized mechanistic entities it is essential reading for anyone interested in bringing the economy back to a point at which decisions can be made that foster organic economic growth without the potentially disastrous risks currently accepted by modern finance
