Management of Technology

2000

this text brings an engineer's perspective to the discussion of effective management of technology it stresses technology's role in creating wealth and achieving competitiveness there is emphasis on the importance of considering both the speed and scope of change in technological development

Management of Technology Innovation and Value Creation

2008

the international association for management of technology iamot is one of the largest scientific associations dealing with the education research and application of management of technology the annual conferences held by iamot assemble the most important scientists and experts in the field the 16th conference held in 2007 included papers by experts from 32 countries this book compiles the best of those papers presented at the conference it covers topics and issues related to the knowledge economy commercialization of knowledge green technologies and sustainable development

Creating and Managing a Technology Economy

2010

The Technology Doesn't Matter

2023-02-22

discover the secret to productive it business alignment in the technology doesn't matter prioritizing the people in it business alignment veteran it executive rachel lockett delivers an engaging and insightful discussion of how to turn around it departments struggling to effectively collaborate with their business counterparts in the book you'll explore the proven and established people process technology framework and break down innovative approaches to it business alignment in a clear and accessible style the author explains how to manage up and manage down to create inter and intra departmental synergy as well as how to identify the four types of business leaders and the ways they can contribute to an effective it business alignment practical solutions to even the most seemingly intractable technology alignment problems hands on professional development guidance for it and business leaders an essential and original resource for executives managers directors founders entrepreneurs and other business leaders the technology doesn't matter will also appeal to tech leaders and technology service providers seeking to better communicate with non technical professionals it's also a practical handbook for business leaders who want to better understand relate to and collaborate with their it colleagues improve engagement and retention amongst it employees and align the interests of technical and non technical professionals

Management of Technology

2001-08-13

this text tackles some of the issues facing practitioners and researchers in the field of management of technology special attention is given to the challenges facing nations and companies at the dawn of a new millennium where technology is expected to dominate every aspect of human endeavour it presents thoughts in this field especially with respect to technological change economic growth globalization and sustainable development this collection contains a number of papers contributed by authors from around the world the papers were selected from those presented at the 9th international conference on management of technology held in miami florida in february 2000 this is the official conference of the international association for management of technology iamot an international association concerned with the promotion of education research and practice in this

growing field

Management of Technology

2006-10-20

the 13th international conference on management of technology iamot convened during the period of april 30 2004 in washington dc usa derived from that conference this book discusses collaboration between government industry and university

Achieving Competitive Edge

2012-12-06

there is now a widely accepted view among manufacturing and service organisations that operations can provide the means of achieving competitive edge the oma uk sixth international conference has taken this view as its theme and focuses in particular on how technology and people can be used to improve manufacturing and service competitiveness these proceedings have been organised according to the topics addressed within the overall conference theme and generally fall within three broad areas technology based topics human resource based topics and general topics the technology based topics are materials control supply chain management and logistics flexibility in operations systems computer aided management of operations design process planning and time to market factors application of kbs expert systems and modelling production planning and control the human resource based topics are work organisation human factors managing the implementation of technology managing the quality improvement process education training and development employee participation and involvement the general topics are operations strategy international comparisons and country based papers performance and productivity measurement and improvement a particular feature of all the papers is that they emphasise the application of techniques technologies and concepts rather than concentrating on specific functional description the authors are drawn from around 14 countries and represent both the academic and industrial communities many are involved in the mainstream of operations management while a number are from other disciplines relevant to the conference theme such as industrial engineering and organisational behaviour

Management of Technology

2005-06

the 12th international conference of the international association for management of technology iamot held in march 2002 in nancy france focused on innovation and sustainable development this book represents a selection of the best contributions presented in nancy

Handbook of Research on Human Resources Strategies for the New Millennial Workforce

2016-11-17

each new generation of upcoming professionals requires different strategies for effective management within the workforce in order to promote a cohesive and productive environment managers must take steps to better understand their employees the handbook of research on human resources strategies for the new millennial workforce is an authoritative reference source for the latest scholarly research on theoretical frameworks and applications for the management of millennials entering the professional realm focusing on methods and practices to enhance organizational performance and culture this book is ideally designed for managers professionals upper level students and researchers in the fields of human resource and strategic management

STRATEGIC MANAGEMENT

2010-10-04

primarily intended for the postgraduate students of commerce and management this compact text covers all the topics prescribed in almost all universities and autonomous institutes in india each concept is explained with the help of many real life examples from the indian context considering the fact that the understanding of the concept of strategic intent is prerequisite to the understanding of strategic management the chapter on strategic intent is included which brings out the differences between various elements of strategic intent it also covers the current happenings in the businesses from the indian context similarly a topic on strategic choice has been discussed at length because of the fact that bcg growth share matrix and ge nine cell matrix are extremely useful in making a strategic decision in real life besides the book contains ten case studies on various topics of strategic management such as environmental appraisal critical success factors swot analysis strategic intent strategic choice business level strategy formulation and choice of growth strategy all these cases are provided with authentic industry specific data firms are chosen from different businesses thereby giving business specific flavour and a broad understanding of various business domains

Developing Technology Managers in the Pacific Rim

1996

examines regional trends and developments in the pacific rim in the field of human resource development of technology

Management of Technology

2013

developments in the areas of biology and bioinformatics are continuously evolving and creating a plethora of data that needs to be analyzed and decrypted since it can be difficult to decipher the multitudes of data within these areas new computational techniques and tools are being employed to assist researchers in their findings the handbook of research on computational intelligence applications in bioinformatics examines emergent research in handling real world problems through the application of various computation technologies and techniques featuring theoretical concepts and best practices in the areas of computational intelligence artificial intelligence big data and bio inspired computing this publication is a critical reference source for graduate students professionals academics and researchers

Handbook of Research on Computational Intelligence Applications in Bioinformatics

2016-06-20

new developments in bio and nanotechnologies and also in information and communication technologies have shaped the research environment in the last decade increasingly highly educated experts in r d departments are collaborating with scientists and researchers at universities and research institutes to develop new technologies transnational companies that have acquired various firms in different countries need to manage diverse r d strategies and cultures the new knowledge based economy permeates across companies universities research institutes and countries creating a cross disciplinary global environment clearly managing technology in this new climate presents significant challenges this book comprises selected papers from the 14th international conference on management of technology which was convened under the auspices of iamot and unido on 22 26 may 2005 in vienna austria it deals with some important aspects of these challenges and discusses in detail the changing dynamics of innovation and technology management it will certainly appeal to academics scientists managers and policy makers alike

Challenges in the Management of New Technologies

2007

the european conference on innovation and entrepreneurship has been running now for 16 years this event has been held in italy northern ireland france belgium portugal and finland to mention some of the countries who have hosted it the conference is generally attended by participants from more than 40 countries and attracts an interesting combination of academic scholars practitioners and individuals who are engaged in various aspects of innovation and entrepreneurship teaching and research the 16th european conference on innovation and entrepreneurship will be hosted by instituto universitário de lisboa iscte portugal and the conference chair will be florinda matos

ECIE 2020 16th European Conference on Innovation and Entrepreneurship

2020-09-17

the growth in the bioinformatics and computational biology fields over the last few years has been remarkable and the trend is to increase its pace in fact the need for computational techniques that can efficiently handle the huge amounts of data produced by the new experimental techniques in biology is still increasing driven by new advances in next generation sequencing several types of the so called omics data and image acquisition just to name a few the analysis of the datasets that produces and its integration call for new algorithms and approaches from fields such as databases statistics data mining machine learning optimization computer science and artificial intelligence within this scenario of increasing data availability systems biology has also been emerging as an alternative to the reductionist view that dominated biological research in the last decades indeed biology is more and more a science of information requiring tools from the computational sciences in the last few years we have seen the surge of a new generation of interdisciplinary scientists that have a strong background in the biological and computational sciences in this context the interaction of researchers from different scientific fields is more than ever of foremost importance boosting the research efforts in the field and contributing to the education of a new generation of bioinformatics scientists pacbb 11 hopes to contribute to this effort promoting this fruitful interaction pacbb 11 technical program included 50 papers from a submission pool of 78 papers spanning many different sub fields in bioinformatics and computational biology therefore the conference will certainly have promoted the interaction of scientists from diverse research groups and with a distinct background computer scientists mathematicians biologists the scientific content will certainly be challenging and will promote the improvement of the work that is being developed by each of the participants

5th International Conference on Practical Applications of Computational Biology & Bioinformatics

2011-03-09

the global energy scenario is undergoing an unprecedented transition in the wake of enormous challenges such as increased population higher energy demands increasing greenhouse gas emissions depleting fossil fuel reserves volatile energy prices geopolitical concerns and energy insecurity issues the energy sector is experiencing a transition in terms of energy resources and their utilization this modern transition is historically more dynamic and multidimensional compared to the past considering the vast technological advancements socioeconomic implications and political responses and ever evolving global policies and regulations energy insecurity in terms of its critical dimensions access affordability and reliability remains a major problem hindering the socioeconomic progress in developing countries the handbook of energy transitions presents a holistic account of the 21st century energy transition away from fossil fuels it provides an overview of the unfolding transition in terms of overall dimensions drivers trends barriers policies and geopolitics and then discusses transition in terms of particular resources or technologies such as renewable energy systems solar energy hydropower hydrogen and fuel cells electric vehicles energy storage systems batteries digitalization smart grids blockchain and machine learning it also discusses the present energy transition in terms of broader policy and developmental perspectives further it examines sustainable development the economics of energy and green growth and the role of various technologies and initiatives like renewables nuclear power and electrification in promoting energy security and energy transition worldwide key features includes technical economic social and policy perspectives of energy transitions features practical case studies and comparative assessments examines the latest renewable energy and low carbon technologies explains the connection between energy transition and global climate change

Handbook of Energy Transitions

2022-10-14

this book constitutes the refereed proceedings of the 9th dortmund fuzzy days dortmund germany 2006 this conference has established itself as an international forum for the discussion of new results in the field of computational intelligence the papers presented here all thoroughly reviewed are devoted to foundational and practical issues in fuzzy systems neural networks evolutionary algorithms and machine learning and thus cover the whole range of computational intelligence

Computational Intelligence, Theory and Applications

2006-09-09

technical plasmas have a wide range of industrial applications the encyclopedia of plasma technology covers all aspects of plasma technology from the fundamentals to a range of applications across a large number of industries and disciplines topics covered include nanotechnology solar cell technology biomedical and clinical applications electronic materials sustainability and clean technologies the book bridges materials science industrial chemistry physics and engineering making it a must have for researchers in industry and academia as well as those working on application oriented plasma technologies also available online this taylor francis encyclopedia is also available through online subscription offering a variety of extra benefits for researchers students and librarians including citation tracking and alerts active reference linking saved searches and marked lists html and pdf format options contact taylor and francis for more information or to inquire about subscription options and print online combination packages us tel 1 888 318 2367 e mail e reference taylorandfrancis com international tel 44 0 20 7017 6062 e mail online sales tandf co uk

Encyclopedia of Plasma Technology - Two Volume Set

2016-12-12

this handbook presents the current state of knowledge in the area of epoxy fiber composites the book emphasizes new challenges and covers synthesis characterization and applications of epoxy fiber composites leading researchers from industry academy government and private research institutions across the globe have contributed to this book the contents comprehensively cover the current status trends future directions and application opportunities in the field this highly application oriented handbook will be of use to researchers and professionals alike

Handbook of Epoxy/Fiber Composites

2022-08-01

this book gathers selected papers presented at the inventive communication and computational technologies conference icicct 2022 held on may 12 13 2022 at gnanamani college of technology tamil nadu india the book covers the topics such as internet of things social networks mobile communications big data analytics bio inspired computing and cloud computing the book is exclusively intended for academics and practitioners working to resolve practical issues in this area

Inventive Communication and Computational Technologies

2022-11-13

advanced analytic control techniques for thermal systems with heat exchangers presents the latest research on sophisticated analytic and control techniques specific for heat exchangers hxs and heat exchanger networks hxns such as stability analysis efficiency of hxs fouling effect delay phenomenon robust control algebraic control geometric control optimal control fuzzy control and artificial intelligence techniques editor libor pekar and his team of global expert contributors combine their knowledge and experience of investigated and applied systems and processes in this thorough review of the most advanced networks analyzing their dynamics efficiency transient features physical properties performance feasibility flexibility and controllability the structural and dynamic analyses and control approaches of hxns as well as energy efficient manipulation techniques are discussed in addition to the design of the control systems through the full life cycle this equips the reader with an understanding of the relevant theory in a variety of settings and scenarios and the confidence to apply that knowledge to solve problems in an academic or professional setting graduate students and early mid career professionals require a robust understanding of how to suitably design thermal systems with hxs and hxns to achieve required performance levels which this book offers in one consolidated reference all examples and solved problems included have been tried and tested and these combined with the research driven theory provides professionals researchers and students with the most recent techniques to maximize the energy efficiency and sustainability of existing and new thermal power systems analyses several advanced techniques the theoretical background of these techniques and includes models examples and results throughout focusses on advanced analytic and control techniques which have been investigated or applied to thermal systems with hxs and hxns includes practical applications and advanced ideas from leading experts in the field as well as case studies and tested problems and solutions

Advanced Analytic and Control Techniques for Thermal Systems with Heat Exchangers

2020-07-10

tarek cherkaoui reveals how geo political and ideological legacies of the past which divide the world into a dichotomy of us against them play a dominant role in reinforcing the ensuing polarisation of our media

Advanced use of materials in orthodontics

2023-01-20

this book is an important contribution to recovering a nuanced contextually aware view of access to knowledge and global knowledge governance yochaie benkler harvard law school this is a must read for scholars and practitioners interested in economic development cultural production and access to knowledge susan sell george washington university this volume features five chapters on current issues facing intellectual property innovation and development policy from the egyptian perspective these include information and communications technology for development copyright and comparative business models in music open source software patent reform and access to medicines and the role of the egyptian government in promoting access to knowledge internationally and domestically together these chapters offer an overview of the challenges and opportunities facing efforts to promote access to knowledge combining both theoretical and empirical approaches the work will be of interest to scholars and practitioners dealing with intellectual property and innovation property the world over

The Report: Egypt 2007

2021-07-29

this book presents the abstracts of the 19th international congress of heterocyclic chemistry 19th ichc held in fort collins colorado 10 15th august 2003 and provides the reader with a topical comprehensive reference source covering the latest developments in the heterocycles area each lecture from the 19th ichc is presented as a one page abstract containing a textual summary of the lecture including references figures and contact details of the author s papers are divided into the following sections heterocyclic natural products heterocycles in organic synthesis bioactive heterocycles heterocyclic materials related topics heterocyclic pharmaceuticals the book of abstracts provides a topical reference source covering the latest developments in the heterocycles area

The News Media At War

2010-01-14

she was born on the streets he was born to rule idella goes by one name only in the glamorous world of music her sultry voice mesmerizes millions her albums have gone platinum and her elusiveness is legendary however the version of herself that truly drives her goes by another name dallas she s an assassin employed to eliminate some of the

worst criminals in the world sheikh tarek saif ad din understands that power and money can corrupt it is his job to ensure the safety of his people his country and his royal family after an attack leaves him near death he swears he hears the voice of an amirat khurafiat alsahra a desert fairy princess helping a wounded prince was not part of the plan her targets were the insurrectionists she was supposed to prevent them from gaining control of the largest production of microchips in the world at any cost even if both the first and second born sons die another in the royal family line would become heir and the country would stabilize yet she can't leave tarek to die in a dangerous dance between two identities idella must decide if she can trust tarek enough to reveal who she really is a singer an assassin and the woman who loves him if she can't this mission may be final in more ways than one a ny times and usa today bestselling author the internationally acclaimed s e smith presents a new story with her signature humor and unpredictable twists exciting adventure hot romance and iconic characters have won her a legion of fans over two million books sold

Access to Knowledge in Egypt

2012-12-02

in a history of private markets renowned private markets investor and expert dr stefan w hepp delivers an insightful and comprehensive exploration of the history nature and influence of private market investing the author offers a robust examination of the key practical and conceptual issues faced by investors as they move forward into the future in the book you'll find fulsome discussions of the rise of private market investment following the conclusion of world war ii as well as why the limited partnership became the dominant investment vehicle for private equity you'll also discover the importance of the convergence of technology government academia and venture capital that came to define what we now know as silicon valley the book includes explanations of the emergence of buyout firms as well as why and how buyouts differ from other forms of mergers and acquisitions examinations of the explosive growth of private equity and other private asset classes since the turn of the millennium discussions of the issues set to dominate the future of private markets including esg investing value creation unicorns special purpose acquisition companies spacs and more a must read book for regulators investors asset managers entrepreneurs founders and other businesspeople a history of private markets will earn a place on the bookshelves of anyone with a stake or interest in private equity and other private asset classes

19th International Congress on Heterocyclic Chemistry

2022-09-13

for one hundred and forty two years the statesman's yearbook has been relied upon to provide accurate and comprehensive information on the current political economic and social status of every country in the world the 2006 edition is fully updated and contains more information than ever before a foldout colour section provides a political world map

and flags for the one hundred and ninety two countries of the world in an endlessly changing world the annual publication of the statesman s yearbook gives you all of the information you need in one easily digestible single volume it will save hours of research and cross referencing between different sources and it is an essential annual purchase

Colours of the Soul

2024-02-27

the book features research papers presented at the international conference on emerging technologies in data mining and information security iemis 2018 held at the university of engineering management kolkata india on february 23 25 2018 it comprises high quality research by academics and industrial experts in the field of computing and communication including full length papers research in progress papers case studies related to all the areas of data mining machine learning iot and information security

Private Capital

2017-02-07

this book represents the most comprehensive and up to date collection of information on the topic of computational molecular biology bringing the most recent research into the forefront of discussion algorithms in computational molecular biology studies the most important and useful algorithms currently being used in the field and provides related problems it also succeeds where other titles have failed in offering a wide range of information from the introductory fundamentals right up to the latest most advanced levels of study

The Statesman's Yearbook 2006

2018-09-01

this 112 page publication sets out to shine a spotlight on the egyptian economic landscape and examines how different actors of the economy are navigating the current economic woes examining topics including digital transformation construction and real estate energy solutions and more it features interviews with dozens of public and private sector leaders and is a key handbook for anyone looking to invest in egypt

Emerging Technologies in Data Mining and Information Security

2011-04-04

governments the world over fret continuously about the low level of transfer of technology especially within their own countries the general problem is military to industry although the variations are numerous problems of presentation offering and support complicate an already byzantine world yet somewhere within this dilemma lie the seeds of tomorrow s economic uptick besides the nontrivial problems involved here the reluctance of the people having the technology to share it with someone who can profit from it stands out this book presents the issues and offers a comprehensive bibliography for easy access

Algorithms in Computational Molecular Biology

2002

the objective of this monograph is to provide a concise introduction to the dynamics of systems comprised of charged small scale particles flowing small scale particles particulates are ubiquitous in industrial processes and in the natural sciences applications include electrostatic copiers inkjet printers powder coating machines etc and a variety of manufacturing processes due to their small scale size external electromagnetic fields can be utilized to manipulate and control charged particulates in industrial processes in order to achieve results that are not possible by purely mechanical means alone a unique feature of small scale particulate flows is that they exhibit a strong sensitivity to interparticle near field forces leading to nonstandard particulate dynamics agglomeration and cluster formation which can strongly affect manufactured product quality this monograph also provides an introduction to the mathematically related topic of the dynamics of swarms of interacting objects which has gained the attention of a number of scientific communities in summary the following topics are discussed in detail 1 dynamics of an individual charged particle 2 dynamics of rigid clusters of charged particles 3 dynamics of flowing charged particles 4 dynamics of charged particle impact with electrified surfaces and 5 an introduction to the mechanistic modeling of swarms the text can be viewed as a research monograph suitable for use in an upper division undergraduate or first year graduate course geared towards students in the applied sciences mechanics and mathematics that have an interest in the analysis of particulate materials

Special Report: Egypt

2012-04-05

this book presents detailed explanations of how to formulate field development plans for oil and gas discovery the data and case studies provided here obtained from the authors field experience in the oil and gas industry around the globe offer a real world context for the theories and procedures discussed the book covers all aspects of field development plan processes from reserve estimations to economic analyses it shows readers in both the oil and gas industry and in academia how to prepare field development plans in a straightforward way and with substantially less uncertainty

Global Technology Transfer

2020-03-31

the purpose of this primer is to provide the basics of the finite element method primarily illustrated through a classical model problem linearized elasticity the topics covered are 1 weighted residual methods and galerkin approximations 2 a model problem for one dimensional linear elastostatics 3 weak formulations in one dimension 4 minimum principles in one dimension 5 error estimation in one dimension 5 construction of finite element basis functions in one dimension 6 gaussian quadrature 7 iterative solvers and element by element data structures 8 a model problem for three dimensional linear elastostatics 9 weak formulations in three dimensions 10 basic rules for element construction in three dimensions 11 assembly of the system and solution schemes 12 assembly of the system and solution schemes 13 an introduction to time dependent problems and 14 a brief introduction to rapid computation based on domain decomposition and basic parallel processing

Dynamics of Charged Particulate Systems

2014-08-12

when the longevity gene was released into the wild one year ago 400 000 000 people were suddenly returned to a state of youthful vigor all facets of human culture across the globe are under tremendous pressure in the us access to the longevity treatment is the central issue in a bitter presidential race that is tearing the nation apart already high unemployment is exploding as those who have become young again swell the workforce many of the rich and powerful are aligned behind a candidate who opposes any further distribution of the longevity gene in the name of protecting the public from a dangerous untested technology but these same forces are at work behind the scenes to ensure they have access to the longevity treatment if they are successful in suppressing this technology and keeping it exclusively for the elite the split between the haves and the have nots will not be only about wealth and power but life itself

Technical Guidance for Petroleum Exploration and Production Plans

2018-06-24

this two volume set Incs 12035 and 12036 constitutes the refereed proceedings of the 42nd european conference on ir research ecir 2020 held in lisbon portugal in april 2020 the 55 full papers presented together with 8 reproducibility papers 46 short papers 10 demonstration papers 12 invited clef papers 7 doctoral consortium papers 4 workshop papers and 3 tutorials were carefully reviewed and selected from 457 submissions they were organized in topical sections named part i deep learning i entities evaluation recommendation information extraction deep learning ii retrieval multimedia deep learning iii queries ir general question answering prediction and bias and deep learning iv part ii reproducibility papers short papers demonstration papers clef organizers lab track doctoral consortium papers workshops and tutorials due to the covid 19 pandemic this conference was held virtually
