

Reading free Essentials of polymer science and engineering Copy

Explore the latest in polymer science across ACS Publications journals with cutting edge work that addresses novel approaches to the synthesis of new and existing polymers as well as research into the fundamental relationships between chemistry and function and insights into mechanisms critical to polymer performance and application. 2024-05-15

Journal of Polymer Science: A Wiley Polymers Journal publishes outstanding and in-depth research in all disciplines of polymer science as a well-established resource. We feature both the core sub-disciplines and research at the frontiers of the field in a unified inclusive and dynamic forum. 2023-12-15

Journal of Polymer Science: A Wiley Polymers Journal publishes outstanding and in-depth research in all disciplines of polymer science as a well-established resource. We feature both the core sub-disciplines and research at the frontiers of the field in a unified inclusive and dynamic forum. 2024-06-05

Polymer Journal: Official journal of the Society of Polymer Science, Japan publishes high quality papers in all areas of polymer and macromolecular research.

Journal of Applied Polymer Science: Part of Wiley's Polymer Journals portfolio is the largest scientific publication of quality research in polymer science. We publish research articles, reviews, comments, and perspectives relating to all applications of polymers including membranes, energy conversion, and storage, and biomedical implants.

Polymer Science Series A: A peer-reviewed journal dedicated to the physicochemical studies of the structure and properties of polymers. Publishes experimental and theoretical articles and critical reviews encompassing all fundamental aspects of polymer science.

Polymer: An interdisciplinary journal dedicated to publishing innovative and significant advances in polymer physics, chemistry, and technology. We welcome submissions on polymer hybrids, nanocomposites, and characterization.

Progress in Polymer Science: Publishes state-of-the-art overview articles by internationally recognized authorities in polymer science and engineering, one of the fastest growing disciplines. The journal provides a link between original articles, innovations published in patents, and up-to-date views. Full Aims & Scope: 5990. It includes regular articles, notes, and communications covering the whole range of polymer science: polymer syntheses and reactions, polymer structures, physical properties of polymers, functional polymers, biopolymers, and more. 2024-06-04

Polymers are either natural or synthetic macromolecules composed of many repeating units (monomers) usually arranged in the form of a chain. Examples of polymers are silk, rubber, silicone, DNA.
