practitioners transportation decision makers public officials and even upper level undergraduate and graduate students who are studying transportation engineering this book presents the concept of unstaging war as a strategic response to the failure of the discourse and institutions of peace this failure is explained by exploring the changing character of conflict in current and emergent global circumstances such as asymmetrical conflicts insurgencies and terrorism fry argues that this pluralisation of war has broken the binary relation between war and peace conflict is no longer self evident and consequentially the changes in the conditions nature systems

philosophies and technologies of war must be addressed through a deep understanding of contemporary war fry explains why peace fails as both idea and process before presenting unstaging war as a concept and nascent practice that acknowledges conflict as structurally present and so is not able to be dealt with by attempts to create peace against a backdrop of increasingly tense relations between global power blocs the beginnings of a new nuclear arms race and the ever increasing human and environmental impacts of climate change a more viable alternative to war is urgently needed unstaging war is not claimed as a solution but rather as an exploration of critical problems and an opening into the means of engaging with them this new edition of the manual is comprehensively updated to include the 2011 2012 and 2013 world championship winning red bull cars the original book covers the 2010 rb6 in particular the anatomy chapter which includes details of developments this book presents the concept of unstaging war as a strategic response to the failure of the discourse and institutions of peace this failure is explained by exploring the changing character of conflict in current and emergent global circumstances such as asymmetrical conflicts insurgencies and terrorism fry argues that this pluralisation of war has broken the binary relation between war and peace conflict is no longer self evident and consequentially the changes in the conditions nature systems philosophies and technologies of war must be addressed through a deep understanding of contemporary war fry explains why peace fails as both idea and process before presenting unstaging war as a concept and nascent practice that acknowledges conflict as structurally present and so is not able to be dealt with by attempts to create peace against a backdrop of increasingly tense relations between global power blocs the beginnings of a new nuclear arms race and the ever increasing human and environmental impacts of climate change a more viable alternative to war is urgently needed unstaging war is not claimed as a solution but rather as an exploration of critical problems and an opening into the means of engaging with them
