Structural Performance of Cylindrical Pressure Housings of Different Ceramic Compositions Under External Pressure Loading: Silicon carbide particulate reinforced alumina ceramic 1993

in the same way that it has become part of all our lives computer technology is now integral to the work of the legal profession the jurix foundation has been organizing annual international conferences in the area of computer science and law since 1988 and continues to support cutting edge research and applications at the interface between law and computer technology this book contains the 16 full papers and 6 short papers presented at the 26th international conference on legal knowledge and information systems jurix 2013 held in december 2013 in bologna italy the papers cover a wide range of research topics and application areas concerning the advanced management of legal information and knowledge including computational techniques for classifying and extracting information from and detecting conflicts in regulatory texts modeling legal argumentation and representing case narratives improving the retrieval of legal information and extracting information from legal case texts conducting e discovery and applications involving intellectual property and ip licensing online dispute resolution delivering legal aid to the public and organizing the administration of local law and regulations the book will be of interest to all those associated with the legal profession whose work involves the use of computer technology

Ionic composition and nitrate in drainage water from fields fertilized with different nitrogen sources, Middle Swamp watershed, North Carolina, August 2000-August 2001 2004

frequently attempts to design experiments utilizing the methodology described in articles in trade journals can be frustrating description of procedures because of space constraints are not always complete the present volume attempts to bring together in one reference source many of the techniques which are utilized in the study of the kidney it provides a thorough compendium of research tools framed by the critical analysis of the theoretical background of renal physiology biochemistry and pharmacology discussed in volume 4a some areas previously dealt with are not covered from a methodological point of view since adequate information does exist elsewhere e g methods of whole kidney atpase isolation since drugs acting on the kidney may alter not only functional but anatomical integrity a chapter on the preparation of tissue for morphological studies has been included the important developments in analysis of minute ultramicro quantities of tissue and biological fluids as well as methodological advances in studies of the isolated kidney are thoroughly covered it is my hope that investigators research fellows and graduate students will benefit from the information contained in this volume and that together with its companion tome it will be a ready reference for the renal physiologist the renal pharmacologist and the nephrologist the contributors have provided painstaking descriptions and when required mathematical analyses of the techniques described herein i wish to thank all of them for their enthusiasm and the excellence of their contributions

Ionic Composition and Nitrate in Drainage Water from Fields Fertilized with Different Nitrogen Sources, Middle Swamp Watershed, North Carolina, August 2000-August 2001 1869

this book is an examination of the music of the balinese gendér wayang the quartet of metallophones gendér that accompanies the balinese shadow puppet play wayang kulit the book focuses on processes of musical variation the main means of creating new music in this genre and the implications of these processes for the social and historical study of balinese music musical aesthetics concepts of creativity and compositional methods dr nick gray tackles a number of core ethnomusicological concerns in a new way including the relationship between composition and improvisation and also highlights issues specific to balinese music including the importance of flexibility in performance an aspect that has been largely ignored by scholars gray thus breaks new ground both in the study of issues relating to improvisation and composition and in balinese music studies

Prize-essays and Transactions of the Highland and Agricultural Society of Scotland 2013-11-28

this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Legal Knowledge and Information Systems 1884

research on small groups is highly diverse because investigators who study such groups vary in their disciplinary identifications theoretical interests and methodological preferences the goal of this volume is to capture that diversity and thereby convey the breadth and excitement of small group research by acquainting students with work on five fundamental aspects of groups the volume also includes an introductory chapter by the editors which provides an overview of the history of and current state of the art in the field together with introductions to each section discussion questions and suggestions for further reading make the volume ideal reading for senior undergraduate and graduate students interested in group dynamics

Report on Agricultural Education in North Germany, France, Denmark, Belgium, Holland, and the United Kingdom 2013-06-29

gertrude stein s composition as explanation delves into the intricate relationship between language and artistic expression published in 1926 the essay explores stein s unique approach to writing and challenges conventional perceptions of composition with a distinctive prose style she reflects on the nature of creativity emphasizing the significance of repetition and abstraction stein s work serves as both an exploration of her own artistic process and a broader commentary on the essence of language in shaping our understanding of art

Renal Pharmacology 1888

laser techniques offer possibilities for the examination and conservation of artwork and for the prevention of cultural heritage this collection of peer reviewed papers from the 8th international conference on lasers in the conservation of artworks sibiu romania september 21 25 2009 addresses various aspects of cultural heritage preservation

Report of the Pennsylvania State College for the Year ... 1892

the workshop on the cosmology of extra dimensions and varying fundamental constants which was part of jenam 2002 was held at the physics department of the university of porto fcup from the 3rd to the 5th of september 2002 it was regularly attended by about 110 participants of which 65 were officially registered in the vfc workshop while the others came from the rest of the jenam workshops there were also a few science correspondents from the national and international press during the 3 days of the scientific programme 8 invited reviews and 30 oral communications were presented the speakers came from 11 different european countries and also from argentina australia canada japan and the u s a there were also speakers from six portuguese research institutions and nine of the speak ers were ph d students the contributions are presented in these proceedings in chronological

order the workshop brought together string theorists particle physicists theoretical and observational cosmologists relativists and observational astrophysicists it was generally agreed that this inter disciplinary was the greatest strength of the work shop since it provided people coming into this very recent topic from the various different backgrounds with an opportunity to understand each other s language and thereby gain a more solid understanding of the overall picture

Watts' Dictionary of Chemistry 2016-12-05

the leading textbook on the subject a completely rewritten and up to date fifth edition based upon the highly respected fourth edition edited by c jacobs c m kjellstrand k m koch and j f winchester this new edition is truly global in scope and features the contributions of the top experts from around the world

Improvisation and Composition in Balinese Gendér Wayang 1897

the transportation sector cannot continue on its current path the volatility of oil prices threatens the u s economy the large proportion of oil importation threatens u s energy security and the massive contribution of greenhouse gases threatens the environment the development of domestic sources of alternative transportation fuels with lower greenhouse emissions is now a national imperative coal and biomass are in abundant supply in the united states and can be converted to liquid fuels that can be combusted in existing and future vehicles their abundant supply makes them attractive candidates to provide non oil based liquid fuels to the u s transportation system however there are important questions about the economic viability carbon impact and technology status of these options liquid transportation fuels from coal and biomass provides a snapshot of the potential costs of liquid fuels from biomass by biochemical conversion and from biomass and coal by thermochemical conversion policy makers investors leaders in industry the transportation sector and others with a concern for the environment economy and energy security will look to this book as a roadmap to independence from foreign oil with immediate action and sustained effort alternative liquid fuels can be available in the 2020 time frame if or when the nation needs them

The Studio 2016-04-23

our knowledge of mars has grown enormously over the last decade as a result of the mars global surveyor mars odyssey mars express and the two mars rover missions this book is a systematic summary of what we have learnt about the geological evolution of mars as a result of these missions it describes the diverse martian surface features and summarizes current ideas as to how when and under what conditions they formed and explores how earth and mars differ and why the two planets evolved so differently the author also discusses possible implications of the geologic history for the origin and survival of indigenous martian life up to date and highly illustrated this book will be a principal reference for researchers and graduate students in planetary science the comprehensive list of references will also assist readers in pursuing further information on the subject colour images can be found at cambridge.org/9780521872010

The Composition of Different Varieties of Red Peppers 2008-02-19

oral physiology contains the proceedings of the werner gren center international symposium held in stockholm sweden in august 1971 contributors explore common problems and trends in oral physiology from the regulation of salivary glands and the role of electrolytes in the formation of saliva to neural mechanisms underlying salivary excretion the effect of citric acid on parotid flow and secretion of salivary glycoproteins circulation of the tongue monitoring of oral circulation physiology of mastication and development of fetal gustatory receptors are also covered this volume consists of 27 chapters and begins with a discussion of mechanisms underlying control of different types of effector cells that comprise the salivary gland the reader is methodically introduced to the nerves to the parotid gland electrolyte and water transport in salivary glands neural mechanisms controlling the excretion of saliva and how the function of salivary fibers is affected by different conditions situated along the course of the seventh and ninth cranial nerves the next chapters focus on the effect of citric acid on the variance of the parotid flow rate ductal transport processes and glandular effects of neurotransmitters and pharmacological agents

and neuro effector sites in salivary glands the book concludes by presenting experimental evidence indicating that nerve impulses can be recorded from dentine this book will be useful for researchers and teachers not only of oral physiology but also of odontology and medicine in general

Small Groups 2024-01-09

co editors of the volume are federico Álvarez alessandro bassi michele bezzi laurent ciavaglia frances cleary petros daras hermann de meer panagiotis demestichas john domingue theo g kanter stamatis karnouskos srdjan krčo laurent lefevre jasper lentjes man sze li paul malone antonio manzalini volkmar lotz henning müller karsten oberle noel e o connor nick papanikolaou dana petcu rahim rahmani danny raz gaël richards elio salvadori susana sargento hans schaffers joan serrat burkhard stiller antonio f skarmeta kurt tutschku theodore zahariadis the internet is the most vital scientific technical economic and societal set of infrastructures in existence and in operation today serving 2 5 billion users continuing its developments would secure much of the upcoming innovation and prosperity and it would underpin the sustainable growth in economic values and volumes needed in the future future internet infrastructures research is therefore a must the future internet assembly fia is a successful conference that brings together participants of over 150 research projects from several distinct yet interrelated areas in the european union framework programme 7 fp7 the research projects are grouped as follows the network of the future as infrastructure connecting and orchestrating the future internet of people computers devices content clouds and things cloud computing internet of services and advanced software engineering the public private partnership projects on future internet future internet research and experimentation fire the 26 full papers included in this volume were selected from 45 submissions they are organized in topical sections named software driven networks virtualization programmability and autonomic management computing and networking clouds internet of things and enabling technologies and economic incentives

Composition as Explanation 1874

excerpt from the composition of different varieties of red peppers chilli colorado a mild pepper grown in mexico the pods in the sample are of a dull brick color and from 7 to 10 cm long and attened from 2 to 4 cm wide the stems and calyxes are absent natal or durban cayenne pepper the dark red pods from 1 to 2 cm broad and 5 to 10 cm long are free from stems and calyxes about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Annual Report of the Secretary of the Connecticut Board of Agriculture 1872

the aim of this book is to unlock the power of the freeware r language to advanced university students and researchers dealing with whole rock geochemistry of meta igneous rocks the first part covers data input output calculation of commonly used indexes and plotting in r the core of the book then focusses on the presentation and practical implementations of modelling techniques used for fingerprinting processes such as partial melting fractional crystallization binary mixing or afc using major trace element and radiogenic isotope data the reader will be given a firm theoretical basis for forward reverse modelling followed by exercises dealing with typical problems likely to be encountered in real life and their solutions using r the concluding sections demonstrate using practical examples how a researcher can proceed in developing a realistic model simulating natural systems the appendices outline the fundamentals of the r language and provide a quick introduction to the open source r package gcdkit for interpretation of whole rock geochemical data from igneous and metamorphic rocks

Essay on the Use of Various Alloys, Especially of Phosphorous Bronze, for the Founding of Cannon 2010-12-01

the first edition appeared fourteen years ago since then there have been significant advances in our science that warrant an updating and revision of sand and sandstone the main framework of the first edition has been retained so that the reader can begin with the mineralogy and textural properties of sands and sandstones progress through their organization and classification and their study as a body of rock to consideration of their origin prove nance transportation deposition and lithification and finally to their place in the stratigraphic column and the basin the last decade has seen the rise of facies analysis based on a closer look at the stratigraphic record and the recognition of characteristic bedding sequences that are the signatures of some geologic process such as a prograding shallow water delta or the migration of a point bar on an alluvial floodplain the environment of sand deposition is more closely determined by its place in such depositional systems than by criteria based on textural characteristics the fingerprint approach our revision reflects this change in thinking as in the geological sciences as a whole the concept of plate tectonics has required a rethinking of our older ideas about the origin and accumulation of sediments especially the nature of the sedimentary basins

The Cosmology of Extra Dimensions and Varying Fundamental Constants 2013-06-05

the two volume set lncs 8802 and lncs 8803 constitutes the refereed proceedings of the 6th international symposium on leveraging applications of formal methods verification and validation isola 2014 held in imperial corfu greece in october 2014 the total of 67 full papers was carefully reviewed and selected for inclusion in the proceedings featuring a track introduction to each section the papers are organized in topical sections named evolving critical systems rigorous engineering of autonomic ensembles automata learning formal methods and analysis in software product line engineering model based code generators and compilers engineering virtualized systems statistical model checking risk based testing medical cyber physical systems scientific workflows evaluation and reproducibility of program analysis processes and data integration in the networked healthcare semantic heterogeneity in the formal development of complex systems in addition part i contains a tutorial on automata learning in practice as well as the preliminary manifesto to the lncs transactions on the foundations for mastering change with several position papers part ii contains information on the industrial track and the doctoral symposium and poster session

Replacement of Renal Function by Dialysis 1881

cumulation of a variety of short reports

A Text-book of human physiology 1869

pulp and paper industry microbiological issues in papermaking features in depth and thorough coverage of microbiological issues in papermaking and their consequences and the current state of the different alternatives for prevention treatment and control of biofilm slime considering the impact of the actual technological changes in papermaking on the control programmes the microbial issues in paper mill systems chemistry of deposits on paper machines the strategies for deposit control and methods used for the analysis of biofouling are all dealt in this book along with various growth prevention methods the traditional use of biocides is discussed taken into account the new environmental regulations

regarding their use finally discusses the trends regarding the future of the microbiological control in papermaking systems in depth coverage of microbiological issues in papermaking and their consequences discusses eco efficient processes green processes for biofilm slime control offers a thorough review of the current literature with links to the primary literature comprehensive indexing author is an authority in the pulp and paper industry

Memoranda of the (origin) plan and results of the field (and other) experiments conducted on the farm (and in the laboratory) of John Bennet Lawes, esq., at Rothamsted, Herts 2010-01-24

volcanic eruptions have killed thousands of people and damaged homes villages infrastructure subsistence gardens and hunting and fishing grounds in papua new guinea and the solomon islands the central business district of a town was destroyed by a volcanic eruption in the case of rabaul in 1994 volcanic disasters litter not only the recent written history of both countries particularly papua new guinea but are recorded in traditional stories as well furthermore evidence for disastrous volcanic eruptions many times greater than any witnessed in historical times is to be found in the geological record volcanic risk is greater today than at any time previously because of larger mainly sedentary populations on or near volcanoes in both countries an attempt is made in this book to review what is known about past volcanic eruptions and disasters with a view to determining how best volcanic risk can be reduced today in this tectonically complex and volcanically threatening region

Liquid Transportation Fuels from Coal and Biomass 2007-01-11

written for students and professionals this revised textbook surveys the mineral industry from geological environmental and economic perspectives thoroughly updated the text includes a new chapter on technology industry metals as well as separate chapters on mineral economics and environmental geochemistry carefully designed figures simplify difficult concepts and show the location of important deposits and trade patterns emphasising the true global nature of mineral resources featuring boxes highlighting special interest topics the text equips students with the skills they need to contribute to the energy and mineral questions currently facing society including issues regarding oil pipelines nuclear power plants water availability and new mining locations technical terms are highlighted when first used and references are included to allow students to delve more deeply into areas of interest multiple choice and short answer questions are provided for instructors online at cambridge org kesler to complete the teaching package

The Surface of Mars 2013-10-22

during late 1978 a symposium entitled science underlying radioactive waste management was one component of the annual meeting of the materials research society held in boston massachusetts the purpose of this symposium was to bring together for the first time the entire range of sciences that form the basis for the treatment solidification and isolation of radioactive wastes some 79 papers were presented to an international audience of over 300 the symposium was such an impressive success that another will be held at the 1979 annual meeting of the materials research society the proceedings of the forthcoming symposium will also be published and it is for this reason that the present volume has been designated volume 1 the scope of the symposium was defined by the following steering committee rustum roy the pennsylvania state university chairman richard s claassen sandia laboratories don ferguson oak ridge national laboratory victor i spitsyn u s s r academy of sciences moscow david b stewart united states geological survey torbjorn westermarck royal institute of technology stockholm the program was organized by the following committee gregory j mccarthy the pennsylvania state university chairman harry c burkholder battelle memorial institute arnold m friedman argonne national laboratory werner lutze hahn meitner institut berlin john g moore oak ridge national laboratory robert w potter ii united states geological survey richard l schwoebe1 sandia laboratories roger w staehle ohio state university

Oral Physiology 2013-04-22

this book explores the internet and mobile ecosystems which are powered by cloud computing an essential if not indispensable part of our everyday lives billions of users world wide use this technology for information sharing communication and social networking and a high proportion of activity is driven by massive media content such as images videos and other emerging 3d visual media however managing searching and visualizing this gigantic amount of data to facilitate communication is difficult which has led to an influx of innovation and research in these areas the research is from academics from all around the world focusing on the intersection of mobile cloud visual and multimedia computing and is split into five clear parts topics covered in the book include mobile augmented reality computational photography mobile visual recognition and search and human computer interaction hci the findings discussed is meant to spur on further creative development in both academia and industry within this area mobile cloud visual media computing would of great interest to researchers and academics wishing to see how the state of the art in media computing research is applied to innovative applications whilst engineers and software designers from industry will gain an insight into the key set of technologies which support mobile and cloud media computing

The Future Internet 2016-12-08

this collection initiates a resolutely interdisciplinary research dynamic specifically concerning musical creativity creativity is one of the most challenging issues currently facing scientific psychology and its study has been relatively rare in the cognitive sciences especially in artificial intelligence this book will address the need for a coherent and thorough exploration musical creativity multidisciplinary research in theory and practice comprises seven sections each viewing musical creativity from a different scientific vantage point from the philosophy of computer modelling through music education interpretation neuroscience and music therapy to experimental psychology each section contains discussions by eminent international specialists of the issues raised and the book concludes with a postlude discussing how we can understand creativity in the work of eminent composer jonathan harvey this unique volume presents an up to date snapshot of the scientific study of musical creativity in conjunction with escom the european society for the cognitive sciences of music describing many of the different aspects of musical creativity and their study it will form a useful springboard for further such study in future years and will be of interest to academics and practitioners in music psychology cognitive science artificial intelligence neuroscience and other fields concerning the study of human cognition in this most human of behaviours
