this new collection of papers from leading experts provides an overview of cutting edge research in old world zooarchaeology the research presented here spans various areas across europe western asia and north africa from the mediterranean to the atlantic several chapters focus on iberia but the eastern mediterranean and britain are also featured thematically the book covers many of the research areas where zooarchaeology can provide a significant contribution these include animal domestication bone modifications fishing fowling economic and social status as well as adaptation and improvement the investigation of these topics is carried out using a diversity of approaches thus making the book also a useful compendium of traditional as well as more recently developed methodological applications all contributions aim to present zooarchaeology as a discipline that studies animals to understand people and their richly diversified past histories this will be a valuable source of information not just for specialists but also for general archaeologists and potentially also historians palaeontologists and geographers who have an interest for the research themes discussed in the book the book is dedicated to simon davis who has been a genuine pioneer in the development of modern zooarchaeology it presents hugely stimulating case studies from the core areas where davis has worked in the course of his career the life of federico alicart garcés castelló 1902 madrid 1984 fills the first half of the book the other half is devoted to a scientific reference of his wide bibliography composed of more than 4000 titles federico alicart was a mathematician an engineer and a cultivated man who lived an age where his professional and personal achievements were deteriorated because of the civil war en un momento en la vida de juan un periodista que no encuentra su lugar en esta vida gracias a su hermana andrea también periodista conoce a jesús un monje que proviene de oriente y le abre las puertas a un conocimiento que hasta ese día desconocía el mundo de la meditación la historia genera un desenlace revelador y sorprendente que hará entender al lector la relatividad del tiempo la sensibilidad para con el entorno y la necesidad de generar consciencia respiratoria como parte de la vida choice highly recommended sept 2022 oceanography and marine biology an annual review remains one of the most cited sources in marine science and oceanography the ever increasing interest in work in oceanography and marine biology and its relevance to global environmental issues especially global climate change and its impacts creates a demand for authoritative refereed reviews summarizing and synthesizing the results of recent research for nearly 60 years ombar has been an essential reference for research workers and students in all fields of marine science this volume considers such diverse topics as the great barrier reef expedition of 1928 29 mediterranean marine caves macromedusae in eastern boundary currents marine biodiversity in korea and development of a geo ecological carbonate reef system model to predict responses of reefs to climate change volume 59 is available to read open access on the taylor francis ebooks site taylorfrancis com books 10 1201 9781003138846 an international editorial board ensures global relevance and expert peer review with editors from australia canada hong kong ireland singapore and the united kingdom the series volumes find a place in the libraries of not only marine laboratories and oceanographic institutes but also universities worldwide if you are interested in submitting a review for consideration for publication in ombar please email the editor in chief stephen hawkins at s j hawkins soton ac uk the book examines recent developments in regenerative medicine and the use of musculoskeletal ultrasound musculoskeletal regeneration has become a prominent research topic no doubt due to the sociological and economic pressures imposed by the current ageing population the ever expanding role of regenerative medicine and the identification as well as characterization of stem cells have introduced a major paradigm shift in the field of musculoskeletal and sports medicine as well as orthopaedic surgery whereas in the past diseased tissue was replaced with allograft material current trends in research revolve around regenerating damaged tissue specifically regenerative medicine stands in contrast to the standard treatment modalities which impair the body s natural abilities to facilitate endogenous repair mechanisms such as anti inflammatory drugs or destructive modalities e g radiotherapy nerve ablation injections of botulinum toxin and surgical interventions that permanently alter the functioning of a joint bone or spine when compared to other allopathic options including knee and hip arthroplasty with a 90 day mortality rate of 0 7 regenerative medicine treatment modalities have a lower incidence of adverse events with a growing body of statistically significant medical literature illustrating both their safety and efficacy focusing on the major values of regenerative medicine this book with its 21 chapters is expected to fill an important void in the current literature it will take that extra step to guide you in your day to day clinical practice featuring contributions from a large international group of leaders in regenerative medicine and musculoskeletal ultrasonography this book is an authoritative reference for rheumatologists physiatrists sonographers radiologists physiotherapists and orthopaedic specialists feb mar 1941 a cumulative volume covering period july 1936 dec 1940 this book highlights the discontinuities and the ongoing development of the urban question in policy making in the context of the controversial current issues of global reversal and regional revival it critically examines contemporary public policies and practices at the urban regional and national scales in order to offer a timely contribution to the debate on the significance of the urban dimension and interpretation in terms of the theory policy and practice of social spatial research in the twenty first century focusing on europe it explores the current urban policy agendas at different scales and the mobility of those agendas their implications contradictions and controversies it brings together original contributions from multiple disciplines but with an urban perspective including empirical case studies and critical discussions of the following topics the un 2030 agenda for sustainable development the global new urban agenda as part of the habitat iii process the urban agenda for the european union national spatial policies related to urban agendas urban agendas at regional urban levels city regionalism discourse and state rescaling new formal regional and metropolitan governments as a solution or problem the role of new actors in regional urbanization dynamics multi level governance processes in developing an urban agenda informal assemblages at the metropolitan scale aiming at constructing the urban concept and dimension given its scope the book is of interest to urban regional and eu policy makers scholars and students working in the fields of urban geography urban studies eu urban and regional policies and planning
