how military commanders interpret the rules of targeting impacts not only on whether civilians and civilian objects are harmed in the course of a military operation but also on the scale of harm that ensues commentators have queried whether military commanders observed the law even when parties to a conflict acted in accordance with mandates to protect civilians as was the case when a coalition of states bombed targets in libya in 2011 however limited guidance is publicly available on how military commanders apply these rules on the battlefield in order to allow military commanders to exercise judgment in determining what steps they are required to take to spare civilians in a specific set of circumstances the rules of targeting are formulated in an open ended fashion which complicates one's ability to evaluate whether a particular military operation complies with the law by examining case studies ranging from operation desert storm in 1991 to operation protective edge in 2014 this book addresses lacunae in current scholarship it puts forward principles which capture how military commanders deliberate while interpreting what the rules of targeting require in particular scenarios international humanitarian law this book contends places a duty on attackers to assume risk in order to mitigate danger to civilians drawing on the field of psychology this study provides an explanation of how military commanders assess when circumstances do not permit them to inform civilians about a forthcoming attack the must have guide to the cwts exam updated for 2017 cwts certified wireless technology specialist study guide is your number one resource for comprehensive exam preparation updated to study in 2017 and beyond this book takes a multi modal approach to ensure your complete confidence and ability for the big day full coverage of all cwts exam objectives reinforces your conceptual knowledge hands on exercises help hone your practical skills and the sybex online learning environment provides flashcards a glossary and review questions to help
