## ***Neuroethical Policy Design 2022-03-01***

this volume focuses on the emergent field of neuroethics comparing and contrasting how two democracies canada and the united states have begun adapting public policy design to better fit human minds the book focuses on issues relevant to all members of the general population and discusses a series of policy issues arranged roughly in the order in which they become relevant in a typical person s lifetime after the introductory chapter each chapter considers an area of public policy particularly relevant to a different stage of life from early childhood education policy to policies for higher education and the workplace to end of life decisions in living wills and advance directives the author puts forth that making the shift towards more neurologically appropriate policy will likely be a gradual process hampered primarily by two issues the first is the inability of neuroscientists to come to agreement on increasingly sophisticated research findings the second issue points out

that bringing policy and neurology into a more synchronous relationship requires a commitment to prolonged effort involves the largely unrecognized reality of entrenched neurological interests the first chapter introduces the concept of disconnect between policy design with traditional understandings of the brain and goes on to highlight developments in the science of human neurology in recent years to help contextualize the book examples of neurological misperceptions are explored in this introductory chapter chapters two through eleven each explores a specific type of policy incorporating understandings of the human brain which modern neuroscience suggests are debatable

## **Perspectives on Gratitude 2016-02-05**

psychologists philosophers theologians and educationalists have all lately explored various conceptual moral psychological and pedagogical dimensions of gratitude in a rapidly expanding academic and popular literature however while the distinguished contributors to this work hail from these distinct disciplines they have been brought together in this volume precisely in recognition of the need for a more interdisciplinary perspective on the topic while further developing such more familiar debates in the field as whether it is appropriate to feel grateful in circumstances in which there is no obvious benefactor whether it is proper to feel grateful to those who have benefited one only from a sense of duty and whether it makes sense to be grateful if so doing colludes with injustice the essays in this collection explore a wide variety of fresh conceptual psychological and moral issues for example in addition to identifying some new moral paradoxes about gratitude and seeking a generally more morally discriminating approach to gratitude education relations are explored between gratitude and humility forgiveness and appreciation and the religious and spiritual dimensions of the concept are also given much overdue attention by drawing together serious academic engagement with the study of gratitude and a serious attempt to undertake this within an interdisciplinary perspective perspectives on gratitude will be of value to academics and graduate students in the fields of philosophy psychology and theology as well as other research based disciplines
