Community as Client 1988 the internet of things iot has emerged as a trending technology that is continually being implemented into various practices within the field of engineering and science due to its versatility and various benefits despite the levels of innovation that iot provides researchers continue to search for networks that maintain levels of sustainability and require fewer resources a network that measures up to these expectations is narrowband iot nb-iot which is a low power wide area version of iot networks and is suitable for larger projects engineers and other industry professionals are in need of in depth knowledge on this growing technology and its various applications principles and applications of narrowband internet of things nb-iot is an essential reference source that provides an in depth understanding on the recent advancements of nb-iot as well as the crucial roles of emerging low power iot networks in various regions of the world featuring research on topics such as security monitoring sustainability and cloud infrastructure this book is ideally designed for developers engineers practitioners researchers students managers and policymakers seeking coverage on the large scale deployment and modern applications of nb-iot

The 1994 Goddard Conference on Space Applications of Artificial Intelligence 1994 your hands on step by step guide to building connected service oriented applications teach yourself the essentials of windows communication foundation wcf 4 one step at a time with this practical learn by doing tutorial you get the clear guidance and hands on examples you need to begin creating services for robust windows based business applications discover how to build and host soap and rest services maintain service contracts and data contracts control configuration and communications programmatically implement message encryption authentication and authorization manage identity with windows cardspace begin working with windows workflow foundation to create scalable and durable business services implement service discovery and message routing optimize performance with service throttling encoding and streaming integrate wcf services with asp net clients and enterprise services components your step by step digital content includes practice exercises downloadable code samples fully searchable online edition of the book with unlimited access on the web

Principles and Applications of Narrowband Internet of Things (NB-IoT) 2021-01-08 parlay will enable rapid and cost effective delivery of services based on telecommunications networks and will be an essential part of the 3g future we live in an exciting time 3g networks are taking off and as greater bandwidth and communication speeds become available people are seeking new means by which to increase their interaction potential newer and more exciting services are being developed to drive more revenues and to enhance end user experiences new technologies are being designed and implemented to supplement and leverage the new capabilities being built into core networks parlay osa from standards to reality is an accessible primer on network ecosystems and operations today discussing the need for parlay the details of standards aspects of network evolution and support for legacy systems and advanced topics from an implementation perspective the authors examine the potential of the parlay osa open service access solution from a number of points of view business need service development and service deployment parlay osa from standards to reality provides a comprehensive account and examination of the parlay technology covers standards capabilities and directions and the twelve service capability features including call control mobility management data session control generic messaging service and content based charging and policy management addresses architectural alternatives and advanced architecture patterns provides use cases architecture deployment scenarios and advanced topics for further reading this invaluable resource will provide product managers software developers application developers network architects and engineers as well as advanced students and researchers in academia and industry with an in depth understanding of parlay

Windows Communication Foundation 4 Step by Step 2010-11-23 the two volume set lncs 8802 and lncs 8803 constitutes the refereed proceedings of the 6th international symposium on leveraging applications of formal methods verification and validation isola 2014 held in imperial corfu greece in october 2014 the total of 67 full papers was carefully reviewed and selected for inclusion in the proceedings featuring a track introduction to each section the papers are organized in topical sections named evolving critical systems rigorous engineering of autonomic ensembles automata learning formal methods and analysis in software product line engineering model based code generators and compilers engineering virtualized systems statistical model checking risk based testing medical cyber physical systems scientific workflows evaluation and reproducibility of program analysis processes and data integration in the networked healthcare semantic heterogeneity in the formal development of complex systems in addition part i contains a tutorial on automata learning in practice as well as the preliminary manifesto to the lncs transactions on the foundations for mastering change with several position papers part ii contains information on the industrial track and the doctoral symposium and poster session

Parlay / OSA 2006-08-04 this volume contains the papers presented at the 20th international conference on logic programming held in saint malo france september 6 10 2004 since the first meeting in this series held in marseilles in 1982 iclp has been the premier international conference for presenting research in logic programming this year we received 70 technical papers from countries all over the world and the program committee accepted 28 of them for presentation they are included in this volume a stand by your poster session took place during the conference it served as a forum for presenting work in a more informal and interactive setting abstracts of the 16 posters selected by the program committee are included in this volume as well the conference program also included invited talks and invited tutorials we were privileged to have talks by three outstanding researchers and excellent speakers nachum dershowitz tel aviv university israel talked on ter nation by abstraction michael gelfond texas tech university usa on swer set programming and the design of deliberative agents and gerard huet inria france on non determinism lessons two of the invited talks appear in these proceedings the tutorials covered topics of high interest to the logic programming community ilkka niemela gave a tutorial on the implementation of answer set solvers andreas podelskion tree automata in program analysis and verification and guillermo r simari on defeasible logic programming and belief revision satellite workshops made the conference even

more interesting six workshops collocated with iclp 2004 ciclops2004 colloquium on implementation of constraint and logic programming systems organized by manuel carro colops2004 2nd international workshop on constraint logic programming in security organized by frank valencia multicpl2004 3rd international workshop on multiparadigm constraint organized by petra hofstedt teach lp2004 1st international workshop on teaching logic programming organized by dietmar seipel
Leveraging Applications of Formal Methods, Verification and Validation. Technologies for Mastering Change 2014-09-26 this book is for the new courses on client server architecture and client server applications which are emerging in many mis programs particularly those with telecommunications concentrations because of its flexible organization and practical orientation it is appropriate for a wide variety of levels including community college undergraduate and graduate it incorporates the same pedagogical models and hands on business oriented emphasis which has been successful in goldman s previous books

Logic Programming 2004-11-18 the expert guidance you need to get the most out of access 2010 get the access 2010 information you need to succeed with this comprehensive reference if this is your first encounter with access you ll appreciate the thorough attention to database fundamentals and terminology if you re familiar with earlier versions you can jump right into access 2010 enhancements such as the new access user interface and wider use of xml and services takes you under the hood of microsoft access 2010 the database application included with microsoft office 2010 explores the latest enhancements such as a new user interface and wider use of xml and services also how to exchange data with word excel powerpoint and other office apps covers how to create tables manipulate datasheets and work with multiple tables explains the seven database objects and how to use a seven step design method to build a database tailored to your needs shows you how to build forms use visual basic and the vba editor automate query parameters create functions and subroutines use xml to create data access pages and more includes a cd with all source code from the book and working examples plus bonus shareware freeware trial demo and evaluation programs that work with or enhance microsoft office you ll want to keep this soup to nuts access reference close at hand note cd rom dvd and other supplementary materials are not included as part of ebook file

Client/Server Information Systems 1999 the two volume set lncs 8802 and lncs 8803 constitutes the refereed proceedings of the 6th international symposium on leveraging applications of formal methods verification and validation isola 2014 held in imperial corfu greece in october 2014 the total of 67 full papers was carefully reviewed and selected for inclusion in the proceedings featuring a track introduction to each section the papers are organized in topical sections named evolving critical systems rigorous engineering of autonomic ensembles automata learning formal methods and analysis in software product line engineering model based code generators and compilers engineering virtualized systems statistical model checking risk based testing medical cyber physical systems scientific workflows evaluation and reproducibility of program analysis processes and data integration in the networked healthcare semantic heterogeneity in the formal development of complex systems in addition part i contains a tutorial on automata learning in practice as well as the preliminary manifesto to the lncs transactions on the foundations for mastering change with several position papers part ii contains information on the industrial track and the doctoral symposium and poster session

Access 2010 Bible 2010-05-10 building client server applications with vb net an example driven approach is based on release 1 0 of the net framework release 1 0 of visual studio net net framework service pack 1 jeff levinson walks readers through how to write a complete application no snippets of code and will show readers examples of how when and why to perform a task building client server applications with vb net an example driven approach will be the manual on software development for enterprise application development

Leveraging Applications of Formal Methods, Verification and Validation. Specialized Techniques and Applications 2014-09-26 the use of cloud applications is becoming increasingly popular due to their scalability and cost advantages however companies need help in adopting cloud applications due to their internal policies and compliance requirements trust and security are crucial factors that influence the adoption of cloud applications this book proposes a cloud architecture that addresses this challenge by shifting the trust for compliance driven configurations of cloud applications from the cloud application provider to the blockchain the architecture was developed using design science research and evaluated using mixed method semi structured guided interviews the results show that the proposed architecture can significantly reduce adoption risk due to compliance driven cloud application configurations shifting trust from the cloud provider to the blockchain this book presents an innovative approach to address the challenge of adopting cloud applications and enhancing trust and security for businesses

Building Client/server Applications With Vb.Net: An Example-Driven Approach 2023-11-06 this multiple volume publication advances the emergent field of mobile computing offering research on approaches observations and models pertaining to mobile devices and wireless communications from over 400 leading researchers provided by publisher

A Generic Approach for the Automated Notarization of Cloud Configurations Using Blockchain-Based Trust 2008-11-30 the semantic is an extension of the current in which information is given well defined meaning better enabling computers and people to work in cooperation tim berners lee scientific american may 2001 this authoritative guide shows how the semantic works technically and how businesses can utilize it to gain a competitive advantage explains what taxonomies and ontologies are as well as their importance in constructing the semantic companion site includes further updates as the framework develops and links to related sites

Mobile Computing: Concepts, Methodologies, Tools, and Applications 2003-07-07 everything today s cpa candidates need to pass the cpa exam published annually this auditing and attestation volume of the comprehensive four volume paperback reviews all current aicpa content requirements in auditing and attestation many of the questions are taken directly from previous cpa exams with 2 800 multiple choice questions in all four volumes these study guides provide all the information

candidates need to master in order to pass the computerized uniform cpa examination its unique modular format helps you zero in on those areas that need more attention and organize your study program complete sample exam the most effective system available to prepare for the cpa exam proven for over thirty years timely up to the minute coverage for the computerized exam contains all current aicpa content requirements in auditing and attestation unique modular format helps candidates zero in on areas that need work organize their study program and concentrate their efforts comprehensive questions over 2 800 multiple choice questions and their solutions in the four volumes guidelines pointers and tips show how to build knowledge in a logical and reinforcing way other titles by whittington audit sampling an introduction fifth edition wiley cpa exam review 2014 arms test takers with detailed outlines study guidelines and skill building problems to help candidates identify focus on and master the specific topics that need the most work

The Semantic Web 2013-11-08 this book presents innovative ideas cutting edge findings and novel techniques methods and applications in a broad range of cybersecurity and cyberthreat intelligence areas as our society becomes smarter there is a corresponding need to be able to secure our cyberfuture the approaches and findings described in this book are of interest to businesses and governments seeking to secure our data and underpin infrastructures as well as to individual users

Wiley CPAexcel Exam Review 2014 Study Guide 2019-07-31 develop powerful standards based back end business logic with beginning ejb 3 java ee 7 edition led by an author team with 20 years of combined enterprise javabeans experience you ll learn how to use the new ejb 3 2 apis you ll gain the knowledge and skills you ll need to create the complex enterprise applications that run today s transactions and more targeted at java and java ee developers with and without prior ejb experience beginning ejb 3 is packed with practical insights strategy tips and code examples as each chapter unfolds you ll not only explore a new area of the spec you ll also see how you can apply it to your own applications through specific examples beginning ejb 3 will serve not only as a reference but it will also function as a how to guide and repository of practical examples to which you can refer as you build your own applications it will help you harness the power of ejbs and take your java ee 7 development to the next level what you ll learn how to employ session beans message driven beans and entity beans how to use the updated ejb 3 persistence and object relational mappings how to choose which ejb option is right for your application how to enrich your application s behavior with cdi services how to test the ejb container inside and out how to migrate from older ejb to the newest ejb apis who this book is for this book is for those java and java ee developers with and without prior ejb experience table of contents introduction to the ejb 3 architecture session beans entities and the java persistence api advanced persistence features message driven beans ejb and services integrating session beans entities message driven beans and services transaction management ejb performance and testing context and dependency injection cdi packaging and deployment ejb client applications ejb runtime environments

International Conference on Applications and Techniques in Cyber Intelligence ATCI 2019 2013-04-23 this volume constitutes the refereed proceedings of the confederated international international workshop on enterprise integration interoperability and networking ei2n fact based modeling fbm industry case studies program icsp and international workshop on methods evaluation tools and applications for the creation and consumption of structured data for the e society meta4es held as part of otm 2018 in october 2018 in valletta malta as the three main conferences and the associated workshops all share the distributed aspects of modern computing systems they experience the application pull created by the internet and by the so called semantic in particular developments of big data increased importance of security issues and the globalization of mobile based technologies

Beginning EJB 3 2019-02-06 this book constitutes the refereed proceedings of the 4th european conference on multimedia applications services and techniques ecmast 99 held in madrid spain in may 1999 the 37 revised full papers presented were carefully reviewed and selected from a total of 71 submissions the book is divided in sections on services and applications multimedia terminals content creation physical broadcast infrastructure multimedia over the internet metadata 3d imaging multicast protocols security and protection and mobility

On the Move to Meaningful Internet Systems: OTM 2018 Workshops 1999-05-19 black hat inc is the premier worldwide provider of security training consulting and conferences in black hat physical device security exploiting hardware and software the black hat experts show readers the types of attacks that can be done to physical devices such as motion detectors video monitoring and closed circuit systems authentication systems thumbprint and voice print devices retina scans and more the black hat briefings held every year in las vegas washington dc amsterdam and singapore continually expose the greatest threats to cyber security and provide it mind leaders with ground breaking defensive techniques there are no books that show security and networking professionals how to protect physical security devices this unique book provides step by step instructions for assessing the vulnerability of a security device such as a retina scanner seeing how it might be compromised and taking protective measures the book covers the actual device as well as the software that runs it by way of example a thumbprint scanner that allows the thumbprint to remain on the glass from the last person could be bypassed by pressing a gummy bear piece of candy against the glass so that the scan works against the last thumbprint that was used on the device this is a simple example of an attack against a physical authentication system first book by world renowned black hat inc security consultants and trainers first book that details methods for attacking and defending physical security devices black hat inc is the premier worldwide provider of security training consulting and conferences

Multimedia Applications, Services and Techniques - ECMAS'T'99 2005-03-15 this book constitutes the refereed proceedings of the 19th international conference on architecture of computing systems arcs 2006 held in march 2006 the 32 revised full papers presented together with two invited and keynote papers were carefully reviewed and selected from 174 submissions the papers are organized in topical sections on pervasive computing memory systems architectures multiprocessing energy efficient design power awareness network protocols security and distributed networks

Black Hat Physical Device Security: Exploiting Hardware and Software 2006 this book constitutes the refereed proceedings of the 9th ifip wg 8 8 11 2 international conference on smart card research and advanced application cardis 2010 held in passau germany in april 2010 the 16 revised full papers presented were carefully reviewed and selected from numerous submissions the papers are organized in topical sections on mathematical algorithms side channel analysis systems logical attacks fault analysis and privacy

Architecture of Computing Systems - ARCS 2006 2010-04-11 research strategize market and continuously measure the effectiveness of apis to meet your saas business goals with this practical handbook key featurestransform your apis into revenue generating entities by turning them into productsmeet your business needs by improving the way you research strategize market and measure resultscreate and implement a variety of metrics to promote growthbook description apis are crucial in the modern market as they allow faster innovation but have you ever considered your apis as products for revenue generation api analytics for product managers takes you through the benefits of efficient researching strategizing marketing and continuously measuring the effectiveness of your apis to help grow both b2b and b2c saas companies once you ve been introduced to the concept of an api as a product this fast paced guide will show you how to establish metrics for activation retention engagement and usage of your api products as well as metrics to measure the reach and effectiveness of documentation an often overlooked aspect of development of course it s not all about the product as any good product manager knows you need to understand your customers needs expectations and satisfaction too once you ve gathered your data you ll need to be able to derive actionable insights from it this is where the book covers the advanced concepts of leading and lagging metrics removing bias from the metric setting process and bringing metrics together to establish long and short term goals by the end of this book you ll be perfectly placed to apply product management methodologies to the building and scaling of revenue generating apis what you will learnbuild a long term strategy for an apiexplore the concepts of the api life cycle and api maturityunderstand apis from a product management perspectivecreate support models for your apis that scale with the productapply user research principles to apisexplore the metrics of activation retention engagement and churncluster metrics together to provide contextexamine the consequences of gameable and vanity metricswho this book is for if you re a product manager engineer or product executive charged with making the most of apis for your saas business then this book is for you basic knowledge of how apis work and what they do is essential before you get started with this book since the book covers the analytical side of measuring their performance to help your business grow

Smart Card Research and Advanced Applications 2023-02-21 this book constitutes the refereed proceedings of the 13th international workshop on security iwsec 2018 held in sendai japan in september 2018 the 18 regular papers and 2 short papers presented in this volume were carefully reviewed and selected from 64 submissions they were organized in topical sections named cryptanalysis implementation security public key primitives security in practice secret sharing symmetric key primitives and provable security

API Analytics for Product Managers 2018-08-08 java for artists the art philosophy and science of object oriented programming is a java programming language text tradebook that targets beginner and intermediate java programmers

Advances in Information and Computer Security 2006 these proceedings present technical papers selected from the 2012 international conference on intelligent systems and knowledge engineering iske 2012 held on december 15 17 in beijing the aim of this conference is to bring together experts from different fields of expertise to discuss the state of the art in intelligent systems and knowledge engineering and to present new findings and perspectives on future developments the proceedings introduce current scientific and technical advances in the fields of artificial intelligence machine learning pattern recognition data mining knowledge engineering information retrieval information theory knowledge based systems knowledge representation and reasoning multi agent systems and natural language processing etc furthermore they include papers on new intelligent computing paradigms which combine new computing methodologies e g cloud computing service computing and pervasive computing with traditional intelligent methods by presenting new methodologies and practices the proceedings will benefit both researchers and practitioners who want to utilize intelligent methods in their specific fields dr fuchun sun is a professor at the department of computer science technology tsinghua university china dr tianrui li is a professor at the school of information science technology southwest jiaotong university chengdu china dr hongbo li also works at the department of computer science technology tsinghua university china

Java for Artists 2013-07-24 this book contains the refereed proceedings of the 11th international conference on agile software development xp 2010 held in trondheim norway in june 2010 in order to better evaluate the submitted papers and to highlight the applicational aspects of agile software practices there were two different program committees one for research papers and one for experience reports regarding the research papers 11 out of 39 submissions were accepted as full papers and as far as the experience reports were concerned the respective number was 15 out of 50 submissions in addition to these papers this volume also includes the short research papers the abstracts of the posters the position papers of the phd symposium and the abstracts of the panel on collaboration in an agile world

Knowledge Engineering and Management 2010-05-20 the book consists of 21 chapters which present interesting applications implemented using the labview environment belonging to several distinct fields such as engineering fault diagnosis medicine remote access laboratory internet communications chemistry physics etc the virtual instruments designed and implemented in labview provide the advantages of being more intuitive of reducing the implementation time and of being portable the audience for this book includes phd students researchers engineers and professionals who are interested in finding out new tools developed using labview some chapters present interesting ideas and very detailed solutions which offer the immediate possibility of making fast innovations and of generating better products for the market the effort made by all the scientists who contributed to editing this book was significant and as a result new and viable

applications were presented

Agile Processes in Software Engineering and Extreme Programming 2011-08-01 this book provides a comprehensive assessment of the latest developments in services research focusing on composing and coordinating services xml security and service oriented architecture and presenting new and emerging research in the services discipline provided by publisher

Practical Applications and Solutions Using LabVIEW™ Software 2010-02-28 asp net api is a key part of asp net mvc 4 and the platform of choice for building restful services that can be accessed by a wide range of devices everything from javascript libraries to ria plugins rfid readers to smart phones can consume your services using platform agnostic http with such wide accessibility securing your code effectively needs to be a top priority you will quickly find that the wcf security protocols you re familiar with from net are less suitable than they once were in this new environment proving themselves cumbersome and limited in terms of the standards they can work with fortunately asp net api provides a simple robust security solution of its own that fits neatly within the asp net mvc programming model and secures your code without the need for soap meaning that there is no limit to the range of devices that it can work with if it can understand http then it can be secured by api these soap less security techniques are the focus of this book what you ll learn identity management and cryptography http basic and digest authentication and windows authentication http advanced concepts such as web caching etag and cors ownership factors of api keys client x 509 certificates and saml tokens simple token swt and signed and encrypted json token jwt oauth 2 0 from the ground up using jwt as the bearer token oauth 2 0 authorization codes and implicit grants using dotnetopenauth two factor authentication using google authenticator owasp top ten risks for 2013who this book is for no prior experience of net security is needed to read this book all security related concepts will be introduced from first principles and developed to the point where you can use them confidently in a professional environment a good working knowledge of and experience with c and the net framework are the only prerequisites to benefit from this book table of contents welcome to asp net api building restful services extensibility points http anatomy and security identity management encryption and signing custom sts through wif knowledge factors ownership factors tokens oauth 2 0 using live connect api oauth 2 0 from the ground up oauth 2 0 using dotnetopenauth two factor authentication security vulnerabilities appendix asp net api security distilled

Web Services Research for Emerging Applications: Discoveries and Trends 2013-03-26 developing and utilizing e learning applications provides a complete investigation of new methods technologies and practices critical to modern educational environments exploring topics such as virtual worlds learning methods and icts as well as interoperability in e learning environments this reference provides essential knowledge for educators practitioners and students alike

Pro ASP.NET Web API Security 2010-08-31 build advanced authentication solutions for any cloud or web environment active directory has been transformed to reflect the cloud revolution modern protocols and today s newest saas paradigms this is an authoritative deep dive guide to building active directory authentication solutions for these new environments author vittorio bertocci drove these technologies from initial concept to general availability playing key roles in everything from technical design to documentation in this book he delivers comprehensive guidance for building complete solutions for each app type bertocci presents high level scenarios and quick implementation steps illuminates key concepts in greater depth and helps you refine your solution to improve performance and reliability he helps you make sense of highly abstract architectural diagrams and nitty gritty protocol and implementation details this is the book for people motivated to become experts active directory program manager vittorio bertocci shows you how to address authentication challenges in the cloud or on premises systematically protect apps with azure ad and ad federation services power sign in flows with openid connect azure ad and ad libraries make the most of openid connect s middleware and supporting classes work with the azure ad representation of apps and their relationships provide fine grained app access control via roles groups and permissions consume and expose apis protected by azure ad understand new authentication protocols without reading complex spec documents

Developing and Utilizing E-Learning Applications 2015-12-17 this book focuses on building air conditioning demand response and power storage batteries as the resources that make up the virtual power plant the research and its outcomes presented in this book provide an overview of virtual power plant technology the contents focus on both fundamentals and advanced topics such as role of central power supply control office battery charge and discharge control system power system simulation system design for practical application etc this is a highly informative and carefully presented book providing insight to students engineers and researchers in the field of power systems

Modern Authentication with Azure Active Directory for Web Applications 2021-10-07 the only way to stop a hacker is to think like one coldfusion is a application development tool that allows programmers to quickly build robust applications using server side markup language it is incredibly popular and has both an established user base and a quickly growing number of new adoptions it has become the development environment of choice for e commerce sites and content sites where databases and transactions are the most vulnerable and where security is of the utmost importance several security concerns exist for coldfusion due to its unique approach of designing pages using dynamic page templates rather than static html documents because coldfusion does not require that developers have expertise in visual basic java and c applications created using coldfusion markup language are vulnerable to a variety of security breaches hack proofing coldfusion 5 0 is the seventh edition in the popular hack proofing series and provides developers with step by step instructions for developing secure web applications teaches strategy and techniques using forensics based analysis this book gives the reader insight to the mind of a hacker interest in topic continues to grow network architects engineers and administrators are scrambling for security books to help them protect their new networks and applications powered by coldfusion unrivalled based support up to the minute links white papers and analysis for two years at solutions synergis

com

Virtual Power Plant System Integration Technology 2002-04-25 real world lessons excellent support whatever you do in business you will experience mis what kind of experience will you have with mis will you understand how businesses use and need information systems to accomplish their goals and objectives and develop their competitive strategy by presenting real world cases experiencing mis helps you to experience mis right now at university where you can exercise your enquiring mind and unlock the potential of information systems for business with an approachable easy to use and sometimes humorous attitude this text shows you how to become a better problem solver and a valued business professional

Hack Proofing ColdFusion 2013-09-20 encompassing a broad range of forms and sources of data this textbook introduces data systems through a progressive presentation introduction to data systems covers data acquisition starting with local files then progresses to data acquired from relational databases from rest apis and through web scraping it teaches data forms formats from tidy data to relationally defined sets of tables to hierarchical structure like xml and json using data models to convey the structure operations and constraints of each data form the starting point of the book is a foundation in python programming found in introductory computer science classes or short courses on the language and so does not require prerequisites of data structures algorithms or other courses this makes the material accessible to students early in their educational career and equips them with understanding and skills that can be applied in computer science data science data analytics and information technology programs as well as for internships and research experiences this book is accessible to a wide variety of students by drawing together content normally spread across upper level computer science courses it offers a single source providing the essentials for data science practitioners in our increasingly data centric world students from all domains will benefit from the data aptitude built by the material in this book

Experiencing MIS 2011 after a brief introduction to visual studio 2005 and the net framework the expert authors introduce readers to the fundamentals of the visual basic 2005 language end of chapter exercises help readers to quickly learn to build rich and professional looking applications for microsoft windows intranets and the internet and mobile devices offers thorough coverage of the new visual studio 2005 tools and features covers object oriented programming creating custom controls working with databases creating menus and working with graphics addresses building class libraries services and net remoting and deploying applications

Management Information System 2020-12-04 this book constitutes the refereed proceedings of the 6th ifip wg 6 1 international conference on distributed applications and interoperable systems dais 2006 held in bologna italy june 2006 the book presents 21 revised regular and 5 revised work in progress papers on architectures models technologies and platforms for interoperable scalable and adaptable systems and cover subjects as methodological aspects tools and language of building adaptable distributed and interoperable services and many more

Introduction to Data Systems 2005-10-13 this book is for strategic decision makers as it discusses quality issues related to services provided by publisher

Beginning Visual Basic 2005 2006-06-06

Distributed Applications and Interoperable Systems 2008-10-31
