international humanitarian icon and bestselling author general roméo dallaire on a crucial and inspiring journey from past wars through post modern conflict toward a vision of lasting peace in the peace roméo dallaire shows us the past present and future of war through the prism of his own life trained in classic warfare during the cold war era of mutual deterrence dallaire in good faith commanded the un s peacekeeping mission for rwanda in 1994 only to see the country abandoned and descend into the hell of genocide the battered tortured warrior who emerged from that catastrophe grew determined to help repair the new world disorder to prevent genocide abolish the use of child soldiers and find ways to intervene in even prevent conflicts in defence of humanity and so dallaire helped advance the doctrines of responsibility to protect and the will to intervene only to witness those initiatives falter because of the same old power politics national self interest and general indifference that had allowed the genocide in rwanda to unfold unchecked in his final act dallaire has become a warrior working towards a better future in which those old paradigms are rejected and replaced in the peace he calls out the elements that undermine true security because they reinforce the dangerous self interested belief that balance of power and truces are the best we can do too often we say we are at peace because the bombs are falling elsewhere and we ourselves are not under attack dallaire shows us a path instead to what he calls the peace a state where above all else humanity values the ties that bind us and the planet together and acts accordingly this book is the cri de coeur of a warrior who has been to hell and back and hopes to help guide us to a better place ninety years ago the league of nations convened for the first time hoping to create a safeguard against destructive world wide war by settling disputes through diplomacy this book looks at how the league was conceptualized and explores the multifaceted body that emerged this new form for diplomacy was used in ensuing years to counter territorial ambitions and restrict armaments as well as to discuss human rights and refugee issues the league s failure to prevent world war ii however would lead to its dissolution and the subsequent creation of the united nations as we face new forms of global crisis this timely book asks if the un s fate could be ascertained by reading the history of its predecessor in this important collection of fifty pieces edward said questions the very foundations of the oslo accords signed in september 1993 on the white house lawn by israel and the plo the accords were immediately hailed as a success and a breakthrough for peace in the middle east but said realized that the imbalance of power between the signees would set up a problematic dynamic bringing only an illusory stability the later interim agreements of taba hebron and the wye plantation would already limit the next phase the final status negotiations set to conclude this year when the future condition of refugees jerusalem borders water and compensations must be decided incisively cutting through the hyperbole in the press surrounding the accords these pieces document the historic content but also give otherwise unreported accounts of what has really gone on in the occupied territory since the signing the continuing expansion of israeli settlements the repressive leadership and inflated bureaucracy of yasir arafat said s own return to jerusalem after forty five years the subsequent banning of his books by the palestinian authority and oslo s inability to recognize palestine s self determination are among the issues of peace and justice he discusses together these essays are an eloquent and courageous statement for peaceful coexistence and equality between two peoples and for an end to the separation of jews and non jews the only hope for a lasting solution in the middle east excerpt from glimpses of the peace conference that i thomas p hart president of the catholic press association of the united states and canada reposing special confidence and thank you for being an important part of keeping this knowledge alive and relevant benjamin franklin trueblood was secretary of the american peace society 1892 1915 and editor of its publication advocate of peace one of the most important economic documents of the 20th century john maynard keynes at the time a rising young economist abruptly resigned his position as adviser to the british delegation negotiating the peace treaty ending world war i frustrated and angered by the allies focus on german war guilt keynes predicted that the vindictive reparations policy which locked germany into long term payments would not only stifle the german economy for another generation but leave europe in ruins published in 1919 keynes s the economic consequences of the peace aroused heated debates throughout europe his remarkably prescient conclusions were frequently cited by german leaders during the decades between the wars keynes s well reasoned yet impassioned arguments peppered with biting portraits of the statesmen involved in the peace treaty including lloyd george georges clemenceau and woodrow wilson brought him immediate fame for more than seventy years penguin has been the leading publisher of classic literature in the english speaking world with more than 1 700 titles penguin classics represents a global bookshelf of the best works throughout history and across where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy in this book jay nordlinger gives a history of what the subtitle calls the most famous and controversial prize in the world the nobel peace prize like the other nobel prizes began in 1901 so we have a neat sweeping history of the 20th century and about a decade beyond the nobel prize involves a first world war a second world war a cold war a terror war and more it contends with many of the key issues of modern times and of life itself it also presents a parade of interesting people more than a hundred laureates not a dullard in the bunch some of these laureates have been historic statesmen such as roosevelt teddy and mandela some have been heroes or saints such as martin luther king and mother teresa some belong in other categories where would you place arafat controversies also swirl around the awards to kissinger gorbachev gore and obama to name just a handful probably no figure in this book is more interesting than a non laureate alfred nobel the swedish scientist and entrepreneur who started the prizes the book also addresses missing laureates people who did not win the peace prize but might have or should have gandhi peace they say is enlightening and enriching and sometimes even fun it has its opinions but it also provides what is necessary for readers to form their own opinions what is peace anyway all these people who have been crowned champions of peace and the world s foremost should they have been such is the stuff this book is made on excerpt from the inside story of the peace conference it is almost superfluous to say that this book does not claim to be a history however summary of the peace conference seeing that such a work was made sheer impossible now and forever by the chief delegates themselves when they decided to dispense with records of their conversations and debates it is only a sketch a sketch of the problems which the war created or rendered pressing of the conditions under which they cropped up of the simplistic ways in which they were conceived by the distinguished politicians who volunteered to solve them of the delegates natural limitations and electioneering commitments and of the secret influences by which they were swayed of the peoples needs and expectations of the unwonted procedure adopted by the conference and of the fateful consequences of its decisions to the world in dealing with all those matters i aimed at impartiality which is an unattainable ideal but i trust that sincerity and detachment have brought me reasonably close to it having no pet theories of my own to champion my principal standard of judgment is derived from the law of causality and the rules of historical criticism the fatal tactical mistake chargeable to the conference lay in its making the charter of the league of nations and the treaty of peace with the central powers interdependent about the indexed not illustrated 1921 edition excerpt the problem of disarmament by tasker howard bliss the problem of the limitation of armaments differs in one important aspect from all the other important problems of the paris peace conference those other problems however much they affected for good or ill the relations of the world at large primarily and many of them mainly if not entirely concerned the nations that were then making peace they were created by the war itself or were those for the solution of which the war was fought and the general line of their solution was a foregone conclusion the moment it became evident with which side victory would rest the factors were known the case could be concretely expressed waiving differences of opinion as to the relative value of these factors some sort of a solution could be arrived at without great difficulty and a discussion of them is largely a historical statement of these factors the various opinions expressed as to their value and the conclusions reached but the problem of the limitation of armaments differs from all these it did not grow out of the world war but long antedated it that war accentuated it but did not create it its factors are vague and complex growing from the very roots of national policies and intertwined in the growth of these policies the failure to solve it made such a war as the recent one possible and directly brought it on this all important one is still unsolved and until it is solved other such wars are as certain to come as the sun is to rise with their grim threat of destruction of our civilization it underlies the possibility of the existence of an association of nations for the maintenance of international peace and the successful operation of an international court of this work to benefit the race require disinterested leadership and popular support the peace movement is no exception in the past men and women with noble purpose have worked inspiringly to the end that warfare may be abolished in america in the united states in canada and the latin american republics there never was a time when international harmony appeared to signify more to the welfare of the world than it does to day in eur0pe and in the far east the peace movement is advancing more slowly yet no less irresistibly than in the western hemisphere a book dealing with the peace movement in america must of necessity be somewhat fragmentary where so many swiftly changing factors enter into the international scheme for amity not too much can be expected from the marshalling of data considerable of which is so recent as to preclude it from being historic at the same time the very freshness of the american peace movement its spontaneity with ranks augmented and strengthened leadership would seem international peace congress in boston has been emphasizing in england in addresses since that time the importance of the contributions of the united states to the peace movement he has said that the united states itself is in his judgment the greatest and most influential peace society in the world because it illustrates over a broader area and with greater power than is anywhere else the case the beneficent operation of the three great principles of interstate free trade an interstate court and federation which are all that is necessary to extend to international affairs to give us precisely the kind of organized world that we want he has also been telling his english brethren that he counts it a capital misfortune that they are not more familiar than most of them are with the writings of sumner and charming and the other great leaders of the peace movement in the united states during the last century we in america know too well that this unfortunate unfamiliarity is not three empires of russia germany and austria hungary the various currencies which were all maintained on a stable basis in relation to gold and to one another facilitated the easy flow of capital and of trade to an extent the full value of which we only realize now when we are deprived of its advantages over this great area there was an almost absolute security of property and of person these factors of order security and uniformity which europe had never before enjoyed over so wide and populous a territory or for so long a period prepared the way for the organization of that vast mechanism of transport coal distribution and foreign trade which made possible an industrial order of life in the dense urban centers of new population this is too well known to require detailed substantiation with figures but it may be illustrated by the figures for coal which has been the key to the industrial growth of central europe hardly less than of england there are more scott copy 1 illustrated about the economic consequences of the peace by john maynard keynes the economic consequences of the peace 1919 is a book written and published by john maynard keynes keynes attended the versailles conference as a delegate of the british treasury and argued for a much more generous peace it was a best seller throughout the world and was critical in establishing a general opinion that the versailles treaty was a carthaginian peace it helped to consolidate american public opinion against the treaty and involvement in the league of nations the perception by much of the british public that germany had been treated unfairly in turn was a crucial factor in public support for appeasement the success of the book established keynes reputation as a leading economist especially on the left when keynes was a key player in establishing the bretton woods system in 1944 he remembered the lessons from versailles as well as the great depression the marshall plan after second world war is treatise of the 20th century this work by legendary economist john maynard keynes is relevant reading even today for anyone who wants to understand international economics and foreign affairs first published in 1919 the economic consequences of peace created an intense and immediate controversy for its brazen criticism of world leaders and the treaty of versailles that ended world war i keynes argued that as a blueprint for peace it was destined to create tension and conflict ahead and history proved him right when world war broke out again within a generation the popularity of this key work and its place in history helped cement keynes's status as one of the 20th century's principal economists

The Literature of the Peace Movement, by Edwin D. Mead... 1912

generally regarded as the most influential social science treatise of the 20th century this work by legendary economist john maynard keynes is relevant reading even today for anyone who wants to understand international economics and foreign affairs first published in 1919 the economic consequences of peace created an intense and immediate controversy for its brazen criticism of world leaders and the treaty of versailles that ended world war i keynes argued that as a blueprint for peace it was destined to create tension and conflict ahead and history proved him right when world war broke out again within a generation the popularity of this key work and its place in history helped cement keynes s status as one of the 20th century s principal economists
