and uncertainty the de legitimization of international institutions and a declining role for global norms and rules did these events bring substantial correctives and modifications to the extant conceptualization of international relations does the conflict significantly alter previous assumptions and foster a new academic vocabulary or does it confirm the validity of well established schools of thought in international relations has the crisis in ukraine confirmed the vitality and academic vigour of conventional concepts these questions are the starting points for this book covering conceptualisations from rationalist to reflectivist and from quantitative to qualitative most contributors agree that many of the old concepts such as multi polarity spheres of influence sovereignty or even containment are still cognitively valid yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings it is these multiple conceptual languages that the volume puts at the centre of its analysis this text will be of great interest to students and scholars studying international relations politics and russian and ukrainian studies
