american exceptionalism calvinist protestantism republicanism liberalism and 20th century pragmatism the second half of the book applies these traditions to a broad range of 20th century conditions and issues power and democracy justice and injustice multiculturalism and pluralism civil society social theory and the role of the intellectual the works of some of the most influential figures in jargon free this treatment will be useful for students and scholars alike discusses the most influential political and social movements and their roles in the history of modern world politics including liberalism conservatism facism and religious fundamentalism the problem of social order is the question of what holds complex and diverse societies together today this question has become increasingly urgent in the world yet our ability to ask and answer the question in a helpful way is constrained by the intellectual legacy through which the question has been handed down to us in this impressive erudite study henrik enroth describes and analyzes how the problem of social order has shaped concept formation theory and normative arguments in political science the book covers a broad range of influential thinkers and theories throughout the history of political science from the early twentieth century onwards social order has long been a presupposition for inquiry in political science now we face the challenge of turning it into an object of inquiry this book is a concise guide to the main doctrines and trends in western social and political thought since the french revolution clearly and simply written the book includes brief biographical details of major individual thinkers as well as an annotated bibliography which gives guidance to further reading in this book zirakzadeh examines different types of social movements from the greens in germany to the shining path in peru the book concludes with a juxtaposition of the three major theoretical approaches and historical findings and proposes a fourth theoretical approach emphasizing factional conflict and reconciliation this is a new release of the original 1932 edition this book probes three issues about the linkage between political protests and social change first why do individuals participate in protest activities including nonviolent movements and revolutions how do cultural beliefs sociopolitical structures personal attitudes motives and perceptions shape the decision to participate second why do participants choose certain tactics protesters use different types of tactics violent vs nonviolent public vs covert organized vs spontaneous and confrontation vs accommodation with other groups political parties and government agencies most activists view a particular tactic as a useful means to attain their policy demands third what policy consequences emerge from the activities of protest movements the book explores the impact of protests on social change and on the distribution of political power particularly greater access of subordinate groups to government policymakers a theory of political opportunities helps explain these issues about the origins activities and outcomes of protests including cases drawn from africa the middle east asia and latin america this collection of scholarly essays is relevant to the growing state theory literature in the social sciences stressing a state in society approach to the study of political development social capital networks of civic engagements norms of reciprocity and attitudes of trust is widely seen as playing a key role for the health of democracy while many authors have examined the consequences of social capital there is a pressing need to explore its sources this collection brings together leading american and european scholars in the first comparative analysis of how social trust and other civic attitudes are generated the contributors to this volume examine the generation of social capital from two directions society based approaches that emphasize voluntary associations and institutional approaches that emphasize policy the question as to what position social democracy should occupy in the political fight can be answered easily and confidently if we clearly understand that socialism and democracy are inseparable socialism and democracy are not identical but they are simply different expressions of the same principle they belong together supplement each other and one can never be incompatible with the other socialism without democracy is pseudo socialism just as democracy without socialism is pseudo democracy the democratic state is the only feasible form for a society organized on a socialist basis human beings are social animals yet despite vast amounts of research into political decision making very little attention has been devoted to its social dimensions in political science social relationships are generally thought of as mere sources of information rather than active influences on one s political decisions drawing upon data from settings as diverse as south los angeles and chicago s wealthy north shore betsy sinclair shows that social networks do not merely inform citizen s behavior they can and do have the power to change it from the decision to donate money to a campaign or vote for a particular candidate to declaring oneself a democrat or republican basic political acts are surprisingly subject to social pressures when members of a social network express a particular political opinion or belief sinclair shows others notice and conform particularly if their conformity is likely to be highly visible we are not just social animals but social citizens whose political choices are significantly shaped by peer influence the social citizen has important implications for our concept of democratic participation and will force political scientists to revise their notion of voters as socially isolated decision makers the social and political thought of noam chomsky questions chomsky s claim not to have a theory about the relationship between human beings and their society other than that which can be written on the back of postage stamp edgley compares chomsky s vision of the good society with liberal communitarian perspectives and establishes that it is grounded in a hopeful belief about human nature she argues that sympathy with this vision of the good

society is essential for understanding the nature of chomsky s critique of state capitalism its inherent nationalism and the media the author concludes that chomsky s analysis is coherent and systematic when one acknowledges that he is not just a critic but a theorist draws on debates and themes that cross cut the social sciences excerpt from social evolution and political theory the present volume contains the substance of eight lectures given on the beer foundation under the faculty of political science of columbia university during april 1911 the lecture form is preserved but with additions which necessitate a division into nine chapters a portion of the argument of chapter vi is set out in more detail in the writer s morals in evolution and the subject of chapter ix is cultural framing and ideologies the essays are comparative and include studies of the former soviet union and eastern europe the united states italy the netherlands and germany their authors are amongst the leaders in the development of social movement theory and the empirical study of social movements in the field of political sociology and european studies there has long been a discussion on transnational neoliberal development and ethnic groups self governance notwithstanding there has been limited exploration in relation to modes of knowledge production associated with neoliberal governance of the other e.g ethnic and indigenous groups which capture its idiosyncratic modes of political expression and empowerment drawing on michel foucault s political philosophy this book discusses european social integration as transnational neoliberal governmentality and challenges its epistemologically constituted subaltern subject neoliberalism is questioned in relation to its programs of securitisation of poverty and authoritarian models of self governance associated with instrumentality of the market in this context the book s rich political historical ethnography develops a new framework for the study of social power furthermore inspired by jacques rancière s radical philosophy european social integration and the roma proposes a new mode of knowledge production about populations excessively subjected to neoliberal governmentality heralding the epistemological decolonisation of the neoliberal subject presenting an insightful new prospect in critical sociology as well as the conceptualization of power and the application of theories of governmentality this book will appeal to scholars interested in the areas of political sociology and anthropology international relations social and political theory philosophy and post development studies this book highlights the parallel transformations of the concepts of citizenship and the welfare state and their dependence on the dominant political ideology from the post war period to the present kourachanis presents the welfare state as an integral part of the capitalist state and consequently suggests that any structural changes to the capitalist state will have major impacts on the texture and content of the restructuring of the welfare state the research compares different formulations of citizenship and the welfare state reflecting on social citizenship and the post war or keynesian welfare state as well as welfare provision under neoliberalism the research will be vital reading for academics researchers and students of social and public policy political and humanitarian studies as well as policy makers and members of labour unions and activists excerpt from imperfections that remain are intentionally left to preserve the state of such historical works this thought provoking book offers a new global approach to understand how four social class structures have rocked our political systems to the extent that no politician or political party can exist today without claiming to be speaking on their behalf and no politician can hope to win an electoral majority without building a coalition among these classes based on a four fold analysis urban and liberal creatives suburban middle class white working class and the millennials this book shows that while many have focused on a supply side vision of politics to explain the upheavals in our political party systems a vision centred on demand and the weberian take on political parties as vehicles for class interests is more compelling in 2016 our political world was changed forever by the victories of brexit in the uk and donald trump in the usa far from being confined to the anglosphere however changes have also rocked the political landscapes in europe as the crisis of 2008 has shaken the foundations of western societies shrinking the size of the previously all powerful middle class new classes have emerged and with them a new political demand that new or old parties have tried to satisfy this book will be of key interest to political practitioners politicians advisors consultants journalists political pundits party builders and government officials and more broadly to academics students and readers of european and western politics political sociology party politics and political parties and electoral demographics suitable for students and scholars of political communication and mass media in democracies this book challenges the traditional scholarship on various provides a broad panorama of continuing interest developing a sociological perspective in comparative and historical analysis with particular reference to politics modernization and social stratification the opening section of the book contains in addition to a valuable new introductory chapter essays that interpret varying levels of socioeconomic development in the united states canada relationship between culture and politics chapters examine the tea party and occupy wall street in the united states third gender activism in india rastafari in jamaica courage to refuse in israel the environmental movement in the u s salafi movements in northern nigeria post socialist labor politics in romania and anti immigrant activism in denmark the breaking of the american social compact is a landmark volume from two of our most perceptive social critics frances fox piven and richard cloward address the tumultuous politics of the past three decades that have culminated in an all out assault on the american social compact delving into the political dynamics behind the rise of the working class in the 1930s and 1960s piven and cloward assign singular importance to disruptive protest and examine the ways protest has dwindled since the 1960s and how many reforms gained then have been swept away they cover the dramatic changes of recent years from the breakup of the traditional democratic party to the new power struggles between blacks and whites in northern cities to the increasing demonization of immigrants and the poor everywhere finally they examine the politics underlying governmental reform arguing that the recent devolution of federal authority is simply a strategy to increase the influence of business hong kong society is often regarded as politically apathetic yet throughout its history hong kong experienced periodic waves of social movement activity in part the perception of an apathetic populace stems from the colonial government's laissez faire policies the society's concentration on economic development the maintenance of traditional chinese culture and a consensus that hong kong would revert to chinese sovereignty since hong kong was a colony instead of evolving into a democratic government great britain instituted a system of elite consultation and absorption of the masses political problems through indirect participation butenhoff addresses the question of why social movements emerged and how they influenced the process of political reform her study presents and analyzes the activities of social movements so that a clearer picture of civil society and political change from below emerges butenhoff integrates the literature on hong kong civil society and social movements into an integrated approach to analyze social movement influence in hong kong politics her three case studies the independent labor movement the nontraditional christian movement and the democracy movement are analyzed using a social movement framework she evaluates the forces that drive and sustain social movements and argues that while the chinese and british governments debated the fate of democratic hong kong the hong kong people have been overlooked throughout the process and as a result hong kong
