The Divine Drama of History and Civilisation 2020-04-29 excerpt from the divine mystery a reading of the history of christianity down to the time of christ the present volume is the first of a series intended to elucidate the history and significance of the greatest revolution in history the writer is proceeding with a study of jesus the nazarene and the intricate problem of the growth and formation of the christian creed and scriptures it was not my original purpose to do more than summarise and combine the labours of previous students and hence this outline was written mainly from memory in deference to the wishes of others i have now provided it with a modest furniture of references and citations for the guidance of readers unfamiliar with the subject in doing which i have had the expert assistance of mr dudley wright but i need not say that these notes give a very inadequate idea of the material actually drawn upon it is as a work of interpretation and not as a work of reference that the volume has been planned and the only scientific merit it can pretend to is that claimed by bossuet for his universal history the merit of a general chart which shows the relations between different provinces current literature is seriously deficient in comprehensive surveys of the kind and i may be allowed to pay a tribute in passing to professor myres lucid sketch the dawn of history which i could wish to be read by way of introduction to these pages about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Manual of Sacred History 1883 excerpt from the hand of god in history or divine providence historically illustrated in the extension and establishment of christianity the history of the world is gradually losing itself in the history of the church the full history of the world is a history of redemption in no period of the history of redemption not even when preparing the fullness of time for the messiah s advent has the providence of god been more marked than of late years in its bearing on the extension of the redeemer s kingdom the providence of god in respect to this work says another would form one of the most interesting chapters in the history of his government to the casual observer of providence to the ordinary reader of this world s history the whole appears like a chaos of incidents no thread no system no line of connection running through it one course of events is seen here and another there kingdoms rise on the stage one after another and become great and powerful and then pass away and are forgotten and the history of the church seems scarcely less a chaos than that of the world changes arc continually going on within it and around it and these apparently without much order yet all is not a chaos about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Divine Aspect of History V2 (1916) 2008-06-01 excerpt from gregory of nazianzum the divine a contribution to the ecclesiastical history of the fourth century in this spirit of candour and impartiality i have endeavoured to exhibit the life and the theological opinions of one of the most remarkable and influential fathers of the fourth century gregory naziamzen it has been my main object in this work to portray him as he was to give a living and true copy of his charac ter and to compose his intellectual portrait from the noble and beautiful as well as the less attractive fea tures of his nature the essential requisites for such a representation are truth and life that i have honestly striven to give truth to the portrait i dare to attest of myself i have desired to conceal nothing and to give an unfair prominence to nothing neither to embellish nor to undervalue to subserve no preconceived philo sophic or dogmatic system to promote no party object about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books

The Divine Programme of the World's History 2018-02-24 genius with hints of madness and mystery moral license and visionary force the word suggests an almost otherworldly power the power to create to divine the secrets of the universe even to destroy yet the notion of genius has been diluted in recent times today rock stars football coaches and entrepreneurs are labeled geniuses and the word is applied so widely that it has obscured the sense of special election and superhuman authority that long accompanied it as acclaimed historian darrin m mcMahon explains the concept of genius has roots in antiquity when men of prodigious insight were thought to possess or to be possessed by demons and gods adapted in the centuries that followed and applied to a variety of religious figures including prophets apostles sorcerers and saints abiding notions of transcendent human power were invoked at the time of the renaissance to explain the miraculous creativity of men like leonardo and michelangelo yet it was only in the eighteenth century that the genius was truly born idolized as a new model of the highest human type assuming prominence in figures as varied as newton and napoleon the modern genius emerged in tension with a growing belief in human equality contesting the notion that all are created equal geniuses served to dramatize the exception of extraordinary individuals not governed by ordinary laws the phenomenon of genius drew scientific scrutiny and extensive public commentary into the 20th century but it also drew religious and political longings that could be abused in the genius cult of the nazis and the outpouring of reverence for the redemptive figure of einstein genius achieved both its apotheosis and its armageddon the first comprehensive history of this elusive concept divine fury follows the fortunes of genius and geniuses through the ages down to the present day showing how despite its many permutations and recent democratization genius remains a potent force in our lives reflecting modern needs hopes and fears

The Memoirs of God 2004 the human and the divine in history investigates the possibility that the author of daniel knew and drew upon the histories of herodotus daniel uses and develops herodotean concepts such as the succession of world empires dynastic dreams and the focus on both human and divine causation in explaining historical events a comparative reading of these two texts illuminates daniel s theology of history showing it to be neither as exclusively eschatological nor as sectarian as is often supposed rather it is specifically the end of exile understood as foreign domination that daniel envisions for the entire jewish people
