at the end of the great war the u s army faced the challenge of integrating what it had learned in the failures and ultimate success of its war effort during the interwar years the army sought to balance readiness and modernization in a period of limited resources and technological advances with profound implications for the conduct of warfare in after the trenches william o odom traces the development of combat doctrine between the world wars through an examination of the army s primary

doctrine manuals the field service regulations the field service regulations of 1923 successfully assimilated the experiences of the first world war and translated them into viable tactical practice odom argues in this unique study rapidly developing technologies generated more efficient tools of war and greatly expanded the scale tempo and complexity of warfare personnel and material shortages led to a decline in the quality of army doctrine evidenced in the 1939 regulations examining the development of doctrine and the roles of key personalities such as john pershing hugh drum george lynch frank parker and lesley mcnair odom concludes that the successive revisions of the manual left the army scurrying to modernize its woefully outdated doctrine on the eve of the new war this impressively researched study of the doctrine of the interwar army fills a significant gap in our understanding of the development of the u s army during the first half of the twentieth century it will serve scholars and others interested in military history as the standard reference on the subject moreover many of the challenges and conditions that existed seventy years ago resemble those faced by today s army this study of the army s historical responses to a declining military budget and an ever changing technology will broaden the perspectives of those who must deal with these important contemporary issues

the etherized wife seeks to provide a comprehensive examination of the evolution of sex therapy through the prism of gender it focuses in particular on how sex therapists treat women's sexual problems arguing that these practices have actually enshrined male sexuality and supremacy by advocating for heterosexual intercourse as the pinnacle of a healthy sex life it holds that in sex like other domains of life in which men set the standard of normality women have been judged normal to the degree they match men's expectations to support these claims margolin maps a series of case studies drawn from the sex therapy literature the articles and books that have been and continue to be treated as exemplars of the discipline's collective consciousness through examination of case studies which focus on discrepancies in sexual desire where the male partner wants more sex and the female wants less the

book shows how therapists have favored the male side the etherized wife shows how the sex therapy discipline has upheld male sexuality as the model of normal natural healthy sexuality
