Nursing care plans with critical thinking questions provide a clinical scenario and demonstrate application of the nursing process with updated NANDA-I nursing diagnoses to individual patient problems. Anatomy and physiology content in each body system overview chapter provides basic information for understanding the body system and its disorders and appears along with focused assessment boxes highlighting the key tasks of data collection for each body system. Assignment considerations discussed in Chapter 1 and highlighted in feature boxes address situations in which the RN delegates tasks to the LPN/LVN or the LPN/LVN assigns tasks to nurse assistants per the individual state nurse practice act. Gerontologic nursing presented throughout in the context of specific disorders with elder care points boxes that address the unique medical/surgical care issues that affect older adults. Safety alert boxes call out specific dangers to patients and teach you to identify and implement safe clinical care. Evidence-based practice icons highlight current references to research in nursing and medical practice. Patient teaching boxes provide step-by-step instructions and guidelines for post-hospital care and prepare you to educate patients on their health condition and recovery. Health promotion boxes address wellness and disease prevention strategies that you can provide in patient teaching.

Medical-Surgical Nursing 2016-02-05 workbook for introductory medical surgical nursing 11e is the perfect companion to the textbook. It allows the student to review and apply essential content to help retain the knowledge gained from the textbook. Each chapter of the workbook is divided into three sections: assessing your understanding, applying your knowledge, and getting ready for NCLEX. New to this edition is the inclusion of a case study in each unit with related critical thinking questions designed to help students understand and apply information to a real client situation.
