## ***Study of Species of Fish of Particular Interest to Sports Anglers of the Atlantic Coast 1950***

although the united states and other affluent nations have more than an adequate food supply other nations daily face the specter of starvation the world now has a critical population food dilemma of potentially major proportions production from the sea and the land is not keeping pace with a world population that is doubling every thirty five years unless this age old malthusian problem is solved millions face starvation and ultimately death the situation has stimulated

substantial international interest in the sea as a source of food and raw materials the potential of the sea not as a panacea but as an important source of protein to augment the world's food supplies and thereby as a means of mitigating the crises we face is a continuing theme throughout this book at present fish provide approximately 9 percent of the world's protein fish are sought not only for food but also for recreation and pleasure what forces determine the present supply and demand for fishery products more important what steps are needed to utilize the full potential of the sea as a source of food and recreation this book explores these forces and thus provides an insight into food potential from the sea

## **Department of the Interior and Related Agencies Appropriations for Fiscal Year 1967 1966**

provides a comprehensive history of the swordfish from prehistoric fossils to its present day endangerment and describes its adaptability and its relationship with humans
