this new edition of fluorescent proteins presents current applications of autofluorescent proteins in cell and molecular biology authored by researchers from many of the key laboratories in the field starting from a current review of the broad palette of fluorescent proteins available several chapters focus on key autofluorescent protein variants including spectral variants photodynamic variants as well as chimeric fp approaches molecular applications are addressed in chapters that detail work with single molecules approaches to generating protein fusions and biosensors as well as analysis of protein protein interactions in vivo by fret fluorescence polarization and fluorescence cross correlation techniques a number of approaches to in vivo dynamics are presented including frap photoactivation and 4 dimensional

microscopy behavior of spindle components membrane proteins mrna trafficking as well as analysis of cell types in tissues and in development are detailed and provide models for a wide variety of experimental approaches in addition several chapters deal directly with the computational issues involved in processing multidimensional image data and using fluorescent imaging to probe cellular behavior with quantitative modeling this volume brings together the latest perspective and techniques on fluorescent proteins and will be an invaluable reference in a wide range of laboratories

Wallaces' Farmer and Dairyman

1997

backpacker brings the outdoors straight to the reader s doorstep inspiring and enabling them to go more places and enjoy nature more often the authority on active adventure backpacker is the world s first gps enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish backpacker s editors choice awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured
