Mind, Money & Markets 2014-10 the 1 book on stock investments buy paperback version and get kindle version for free 1 the stock market has its peculiarities it s a world where a small matter has the potential of creating a massive impact one thing added or one thing left out could be the difference between making a million dollars and losing it all 2 there is no shortage of investors the world has many of them and you can be sure that some are extremely successful while others cry bitterly over their losses 3 the reason why most investors fail is that they approach investing as though it were some lottery game they are chance takers they have no plan they stagger from one failed investment to another taking stabs in the dark and soon enough they lose all their money 4 this book has been written to help you become an intelligent investor an intelligent investor is not a chance taker an intelligent investor is a vain investor who exploits market inconsistencies long before others have taken notice 5 you will learn all the basics of the stock market investment and how to optimize your investments and realize the largest possible profits 6 an investor should not turn himself into a speculator for a speculator acts on his instincts rather than his intellect when executing trades 7 the stock market is neither a mythical place beyond human understanding nor a place reserved for people with special genetics the investors who have made a fortune out of stock market are average people like everyone else except they took their time to understand everything before trying to get in the game 8 there are many investments in the securities markets beyond stocks you could invest in bonds and funds like mutual funds and index funds 9 investing in ipos gives you a chance to own a slice of a company and in return you play your part in providing the company with much needed resources 10 the best single thing an investor can do before taking up an investment deal is to conduct a fundamental analysis 11 fundamental analysis is the evaluation of a company s financial health with the intention of either solidifying your interest in the venture or finding out any red flag the strategies for succeeding as an investor are timeless they worked a lifetime ago in the days of ben graham the father of value investing and they still work today

Stock Market Investing for Beginners 2021-02-16 master s thesis from the year 2012 in the subject business economics investment and finance grade 2 0 university of regensburg international real estate business school irebs course immobilienwirtschaft language english abstract the basis of optimism is sheer terror this drastic quote by oscar wilde comes with a core of truth through the last century s history of money and financial markets the market players were usually driven by the same factors and financial laws for once you have to accept more risk if you want higher yields and therefore you have to pay more if you want a higher security of your invested capital and secondly capital is shy and driven by fear and only partially rational rather than driven by emotions no matter which crisis of for example the 20th century is analyzed usually bubbles were often born slowly but steadily market mechanisms failed and when too much money was available often too cheap prices of certain fields and goods went up drastically investors became greedy and at the peak everything was bursting and fear was ruling afterwards as for example after the dot com bubble investments into these segments were rare and trust needed to be built up again the commercial and professional real estate market theoretically is in this regard not different from other markets a usual behavior in times of crises is the wish for more security more stable investments and meaning significantly less volatile and ideally very liquid and realizable investments on a market capital investments should be safe havens and rather bring little or less money than losing heavily or all in the current time of crisis after the initialized 2008 lehman brothers crash and the following subprime crises followed by the global recessions in mostly 2009 some countries 2010 and even today in the days of the european and global sovereign debt crisis real estate investors are as an international phenomenon shifting money into secure real estate and on the professional site into core commercial real estate in a markets
