Proceedings of the 9th ProLISSA Conference Google Android WebAPI Social Monitoring for Public Health

## **Proceedings of the 9th ProLISSA Conference 2018-12-17**

countries in the african continent are implementing strategies to overcome developmental and societal challenges to remain competitive in the new global knowledge based economy libraries and archives can play an important role in this process through provision of information information in modern society is valued as an essential component in the daily lives of people both at individual and organisational levels increasingly we expect information to meet our needs through technological interventions or interactions indeed recent technological developments have accentuated contemporary conceptions of the library and information field as an intersection of information technology people and society this volume explores the opportunities and challenges encountered in the practice of contemporary libraries archives and records management in the digital age it cannot be overemphasized that the traditional traits and practices of libraries archives and records management are constantly changing given the increased use of information and communication technologies icts in the different information management value chains this book will serve as a premier reference source for organisations in both private and public sectors researchers information practitioners in industry and postgraduate students in information management

## **Google Android WebAPI 2011-04**

public health thrives on high quality evidence yet acquiring meaningful data on a population remains a central challenge of public health research and practice social monitoring the analysis of social

media and other user generated web data has brought advances in the way we leverage population data to understand health social media offers advantages over traditional data sources including real time data availability ease of access and reduced cost social media allows us to ask and answer questions we never thought possible this book presents an overview of the progress on uses of social monitoring to study public health over the past decade we explain available data sources common methods and survey research on social monitoring in a wide range of public health areas our examples come from topics such as disease surveillance behavioral medicine and mental health among others we explore the limitations and concerns of these methods our survey of this exciting new field of data driven research lays out future research directions
