Culture and Psychology

1996

David Matsumoto uses cross-cultural research as a platform to evaluate psychology as we know it and shows readers how to develop their own critical thinking skills. He encourages readers to raise questions about traditional knowledge and theories and to investigate the world around them so they can reap the benefits of diversity and turn its challenges into assets.

Observing and Recording the Behavior of Young Children, 6th Edition

2015-11-20

In the sixth edition of their classic text, the authors reiterate the critical importance of observing and recording the behaviour of young children, especially in the current atmosphere of accountability and testing. In addition, because children with special needs are now widely included in a majority of early childhood classrooms, they have completely rewritten a chapter to focus more broadly on observing behaviours that may be viewed as disquieting, designed to help teachers better understand children's behaviour. The book outlines methods for record-keeping that provide a realistic picture of each child's interactions and experiences in the classroom. Numerous examples of teachers' observations of children from birth to age 8 enrich this work and make it accessible, practical, and enjoyable to read. With over 130,000 copies in print, this valuable resource for pre- and in-service educators features fresh information about how children think and learn, how their language develops, and how their families, their culture, and their environment influence and help to shape them. Observations that reflect the increasingly diverse population in contemporary early childhood classrooms and the imperative for teachers to widen their lens in order to meet the needs of young children with a range of developmental capacities, abilities, and behaviours.

the state as cultural practice offers a fully worked out account of the authors distinctive interpretive approach to political science it challenges the new institutionalism probably the most significant present day strand in both american and british political science it moves away from such notions as bringing the state back in path dependency and modernist empiricism instead bevir and rhodes argue for an anti foundational analysis ethnographic and historical methods and a decentred approach that rejects any essentialist definition of the state and espouses the idea of politics as cultural practice the book has three aims to develop an anti foundational theory of the state to develop a new research agenda around the topics of rule rationalities and resistance by exploring empirical shifts and debates about the changing nature of the state to show how anti foundational theory leads us to see them differently bevir and rhodes argue for the idea of the stateless state or the state as meaning in action so the state is neither monolithic nor a causal agent it consists solely of the contingent actions of specific individuals of diverse beliefs about the public sphere about authority and power which are constructed differently in contending traditions continuity and change are products of people inheriting traditions and modifying them in response to dilemmas a decentred approach explores the limits to the state and seeks to develop a more diverse view of state authority and its exercise in short political scientists need to bring people back in to the study of the state
