Research Methods for the Self-Study of Practice

2009-06-12

this is a book designed with the teacher educator in mind it provides in depth examination of specific methods used effectively in self study research the chapters are written by researchers engaged in self study of their practice

Self-Study of Practice as a Genre of Qualitative Research

2009-04-05

teacher educators live hectic lives at institutional and discipline boundaries our greatest potential for influence is through developing relationships with others in our practice our work is fundamentally relational and emotional we are obligated to the teachers we teach and the public students they teach our practice exists in the midst of experience conflicting and often hostile boundaries and between what we know from research and what we understand from practice self study of practice invites researchers to embrace the hectic and fragmented territory of practice as the space for study this book educates those who would like to explore practice in the methodology of self study it provides both a pragmatic and theoretic guide it grounds the research in ontology and establishes dialogue as the inquiry process it supports researchers through the use of frameworks to guide research and explication of strategies for conducting it

Self-study of Teaching Practices Primer

2006

self study of teaching practices is an excellent introduction to the field of self study research and practice this student and teacher friendly primer provides a comprehensive review and synthesis of the self study literature complete with guidelines and examples of cutting edge self study methods it addresses four central areas of self study of teaching practices purposes foundations nature and guidelines for practice school based and university based teachers interested in rethinking and reframing their instructional methods will benefit from reading this book and assigning it in the classroom this primer which includes glossaries and references is an invaluable resource for undergraduate and graduate education students searching for guidelines to develop and improve their teaching practice

International Handbook of Self-Study of Teaching and Teacher Education Practices

2007-07-03

the international handbook on self study of teaching and teacher education practices is of interest to teacher educators teacher researchers and practitioner researchers this volume offers an encyclopaedic review of the field of self study examines in detail self study in a range of teaching and teacher education contexts outlines a full understanding of the nature and development of self study explores the development of a professional knowledge base for teaching through self study purposefully represents self study through research and practice illustrates examples of self study in teaching and teacher education

Study Notes for the Conduct and Practices Handbook Course

2002

culture learning and technology research and practice provides readers with an overview of the research on culture learning and technology clt and introduces the concept of culture related theoretical frameworks in 13 chapters the book explores the theoretical and philosophical views of clt presents research studies that examine various aspects of clt and showcases projects that employ best practices in clt written for researchers and students in the fields of educational technology instructional design and the learning sciences this volume represents a broad conceptualization of clt and encompasses a variety of settings as the first significant collection of research in this emerging field of study culture learning and technology overflows with new insights into the increasing role of technology use across all levels of education

Culture, Learning, and Technology

2017-02-17

this revised edition of the classic text explores the complexity of what learning to teach means

Practice Makes Practice

2003-04-09

self study in teacher education is a growing field and a natural progression from the concept of reflective practice for pre service teachers this book is designed to introduce teacher educators to the theory and practice of self study in order to explore understand and improve their teaching about teaching with studies from an international range of contributors this book illustrates a variety of approaches to self study it describes the issues that teacher educators have chosen to study how they carried out their research and what the learning outcomes were throughout the emphasis is on placing teacher educators knowledge and practice at the centre of their academic work this book will be of interest to all teacher educators wishing to improve their knowledge and practice

Improving Teacher Education Practices Through Self-study

2002

the international handbook on self study of teaching and teacher education practices is of interest to teacher educators teacher researchers and practitioner researchers this volume offers an encyclopaedic review of the field of self study examines in detail self study in a range of teaching and teacher education contexts outlines a full understanding of the nature and development of self study explores the development of a professional knowledge base for teaching through self study purposefully represents self study through research and practice illustrates examples of self study in teaching and teacher education

International Handbook of Self-Study of Teaching and Teacher Education Practices

2004-04-30

this summary highlights the findings of a u s scanning tour to study the republic of south africa s pavement and related technologies this scanning tour was sponsored by the federal highway administration fhwa and conducted may 13 17 1996 the scanning team was composed of representatives from federal state and local governments contractors contractor associations and a consulting engineer as expressed in the team s mission statement the purpose of this trip was to observe what the south africans are doing well with regard to their highways learn from them and inform the u s highway community

FHWA Study of South African Pavement and Other Highway Technologies and Practices

1997

keeping found things found the study and practice of personal information management is the first comprehensive book on new favorite child of r d at microsoft and elsewhere personal information management pim it provides a comprehensive overview of pim as both a study and a practice of the activities people do and need to be doing so that information can work for them in their daily lives it explores what good and better pim looks like and how to measure improvements it presents key questions to consider when evaluating any new pim informational tools or systems this book is designed for r d professionals in hci data mining and data management information retrieval and related areas plus developers of tools and software that include pim solutions focuses exclusively on one of the most interesting and challenging problems in today s world explores what good and better pim looks like and how to measure improvements presents key questions to consider when evaluating any new pim informational tools or systems

Keeping Found Things Found: The Study and Practice of Personal Information Management

2010-07-27

this book advances understandings about and practices for effectively integrating practice based e g workplace experiences in higher education programs this issue is becoming of increasing salient because higher education programs globally are increasingly focussing on preparing students for specific occupations such imperatives are reflected in the cooperative education movement in north america the foundation degree programs of the united kingdom the work integrated learning approach within australian higher education and initiatives in a range of other countries there are clear and growing expectations that graduates from such should be able to move smoothly into being effective in their occupational practice these expectations rise from the imperatives and interest of government employers community and students themselves the book achieves a number of important goals firstly it identifies and delineates the educational worth of students and engagement in practice based experiences and their integration within their programs of study secondly it advances conceptions of the integration of such experiences that is essential to inform how these programs might be enacted thirdly drawing on the findings of two teaching fellowships it proposed bases and propositions for how experiences in higher education programs might be organised and augmented to support effective learning fourthly pedagogic practices seen to be effective in maximising the learning from those practice experiences and integrating them within the curriculum are identified and discussed fifthly a particular focus is given to students personal epistemologies and how these might be developed and directed towards supporting effective learning within practice settings and the integration of that learning in their university programs

Integrating Practice-based Experiences into Higher Education

2015-07-24

addressing studying as a distinct educational concept and phenomenon in its own right the essays in this volume consider study and studying from a range of perspectives

countering dominant educational discourses which place a heavy emphasis on learning and instruction the contributors explore questions such as what does it mean to study something how is studying something different from being taught about it or learning something about it what does the difficulty demanded by study mean for the one who studies and for the teacher what mode of existence does study induce the book highlights the significance of study not only or even primarily for its educational outcome but as a human activity

Reconceptualizing Study in Educational Discourse and Practice

2019-05-07

reflection is a technique for aiding and reinforcing learning used in education and professional development this volume offers practitioners and students guidance that cuts across theoretical approaches enabling them to understand and use reflection to enhance learning in practice

Study of Administrative Organization, Procedure, and Practice

1958

this book provides an accessible introduction to using case studies it makes sense of literature in this area and shows how to generate collaborations and communicate findings the authors bring together the practical and the theoretical enabling readers to build expertise on the principles and practice of case study research as well as engaging with possible theoretical frameworks they also highlight the place of case study as a key component of educational research with the help of this book m level students teacher educators and practitioner researchers will gain the confidence and skills needed to design and conduct a high quality case study dr lorna hamilton is a senior lecturer in education research at the university of edinburgh dr connie corbett whittier is an associate professor of english and humanities at friends university topeka kansas drawing on a wide range of their own and others experiences the authors offer a comprehensive and convincing account of the value of case study in educational research what comes across quite passionately is the way in which a case study approach can bring to life some of the complexities challenges and contradictions inherent in educational settings the book is written in a clear and lively manner and should be an invaluable resource for those teachers and students who are incorporating a case study dimension into their research work ian menter professor of teacher education university of oxford this book is comprehensive in its coverage yet detailed in its exposition of case study research it is a highly interactive text with a critical edge and is a useful tool for teaching it is of particular relevance to practitioner researchers providing accessible guidance for reflective practice it covers key matters such as purposes ethics data analysis technology dissemination and communities for research and it is a good read professor anne campbell formerly of leeds metropolitan university this excellent book is a principled and theoretically informed guide to case study research design and methods for the collection analysis and presentatin of evidence professor andrew

pollard institute of education university of london research methods in education series each book in this series maps the territory of a key research approach or topic in order to help readers progress from beginner to advanced researcher each book aims to provide a definitive market leading overview and to present a blend of theory and practice with a critical edge all titles in the series are written for master s level students anywhere and are intended to be useful to the many diverse constituencies interested in research on education and related areas other books in the series qualitative research in education atkins and wallace action research in education mcateer ethnography in education mills and morton

Survey and Study of Administrative Organization, Procedure, and Practice in the Federal Agencies: Department of the Interior

1957

burnout is a common metaphor for a state of extreme psychophysical exhaustion usually work related this book provides an overview of the burnout syndrome from its earliest recorded occurrences to current empirical studies it reviews perceptions that burnout is particularly prevalent among certain professional groups police officers social workers teachers financial traders and introduces individual inter personal workload occupational organizational social and cultural factors burnout deals with occurrence measurement assessment as well as intervention and treatment programmes this textbook should prove useful to occupational and organizational health and safety researchers and practitioners around the world it should also be a valuable resource for human resources professional and related management professionals

Survey and Study of Administrative Organization, Procedure, and Practice in the Federal Agencies by the Committee on Government Operations

1957

study and practice of meditation gives a vivid and detailed account of the meditative practices necessary to develop a calm alert mind that is capable of penetrating the depths of reality the buddhist meditative states known as the concentrations and formless absorptions are best known in the west from theravada scriptures and from vasubandhu s treasury of manifest knowledge in this book the reader is exposed to tibetan buddhist views on the mental states attained through meditation as described by three contemporary tibetan lamas the book discusses the ways in which certain meditative states act as bases of the spiritual path as well as the nature of meditative calm and the prerequisites for cultivating and attaining it in addition to reviewing and translating tibetan sources the author considers their major indian antecedents and draws comparisons with theravadin presentations

Reflection in Learning and Professional Development

2013-09-05

this is a book about an attempt to change the way math was taught in a particular classroom its title plays on our everyday usage of the terms theory and practice in education these terms are conventionally treated oppositionally we have theories about what we should do and we have what teachers actually do do in this way theory stands prior logically and chronologically to practice practice inevitably becoming theory s imperfect realization we seek in this volume however to develop a different stance with regard to the relationship between the two taking the details of instructional practice as our principle object of study we explore what role theories of learning might play in illuminating such practices the book is about actual practices by which teaching is done and how contemporary theories of learning might help us understand those practices it seeks to provide a foundation for future practice based inquiry in education by addressing the methodological question how do we go about studying instructional practice in a principled way

Survey and Study of Administrative Organization, Procedure, and Practice in the Federal Agencies

1957

the body matters in practice how then might we think about the body in our work in and on professional practice learning and education what value is there in realising and articulating the notion of the professional practitioner as crucially embodied beyond that what of conceiving of the professional practice field itself as a living corporate body how is the body implicated in understanding and researching professional practice learning and education body practice is an extensive volume dedicated to exploring these and related questions philosophically and empirically it constitutes a rare but much needed reframing of scholarship relating to professional practice and its relation with professional learning and professional education more generally it takes bodies seriously developing theoretical frameworks offering detailed analyses from empirical studies and opening up questions of representation the book is organized into four parts i introducing the body in professional practice learning and education ii thinking with the body in professional practice iii the body in question in health professional education and practice iv concluding reflections it brings together researchers from a range of disciplinary and professional practice fields including particular reference to health and education across fifteen chapters the authors explore a broad range of issues and challenges with regard to corporeality practice theory and philosophy and professional education providing an innovative coherent and richly informed account of what it means to bring the body back in with regard to professional education and beyond

Using Case Study in Education Research

2012-11-19

co published with the association for american colleges and universities aac u if we are all becoming global citizens what then are our civic responsibilities colleges and universities across the united states have responded to this question by making the development of global citizens part of their core mission a key strategy for realizing this goal is study abroad after all there may be no better way for students to acquire the knowledge skills and attitudes required to become effective change agents in international contexts the handbook of practice and research in study abroad is a comprehensive survey of the field each chapter eloquently conveys an enthusiasm for study abroad alongside a critical assessment of the most up to date research theory and practice this contributed volume brings together expert academics senior administrators practitioners of study abroad and policy makers from across the united states canada and other part of the world who meticulously address the following questions what do we mean by global citizenship and global competence what are the philosophical pedagogical and practical challenges facing institutions as they endeavor to create global citizens how is study abroad and global citizenship compatible with the role of the academy what are the institutional challenges to study abroad including those related to ethics infrastructure finances accessibility and quality control which study abroad programs can be called successful the handbook of practice and research in study abroad is an indispensable reference volume for scholars higher education faculty study abroad professionals policy makers and the academic libraries that serve these audiences it is also appropriate for a wide range of courses in higher education master s and ph d programs

The Burnout Companion To Study And Practice

1998-11-17

qualitative research the essential guide to theory and practice provides a one stop resource for all those approaching qualitative research for the first time as well as those revisiting core concepts and issues it presents a comprehensive overview of this rapidly developing field of inquiry cleverly combined with practical hands on advice on how to conduct a successful qualitative study written in an engaging and accessible style the authors break through difficult terminology to guide readers through the choices they will face during research design implementation and beyond each chapter is then brought to life by an array of relevant real life examples from expert researchers around the globe divided into seven sections this unique text covers considering perspectives acknowledging a position framing the study choosing a research approach collecting data working with data and findings writing about the research a dedicated companion website offers a whole host of additional teaching and learning resources including additional chapters on publishing qualitative research sample lesson plans and activities further case studies and much more from the foundations of the subject through to its application in practice qualitative research the essential guide to theory and practice is an indispensable companion for qualitative researchers worldwide

Study And Practice Of Meditation

2009-06-16

in this age of mandated reforms reflective practice is a truly effective empowering way to make meaningful positive changes

Theories of Learning and Studies of Instructional Practice

2011-04-19

this book is intended to guide advisors administrators and faculty members engaged with study abroad who are concerned with answering the question what does study abroad achieve it will also inform the work of study abroad organizations as well as institutions receiving study abroad students offering a broad based approach to assessment the book will appeal to those starting out however an array of case studies illustrating the often untidy process of implementation will equally appeal to those further along by offering creative and often simple approaches to common problems following an account of how and why assessment in the field has evolved the first part of the book sets the stage for the reader to consider the role of mission and context in determining purpose goals and outcomes to identify and consult with stakeholders determine what data and expertise may already be available on campus match methods and tools to questions and create realistic plans to communicate findings and to act upon them the second part of the book offers an overview of appropriate tools and strategies for assessing study abroad emphasizing the importance of carefully formulating and prioritizing assessment questions and understanding the advantages and drawbacks of different instruments it describes an array of qualitative quantitative and mixed methods illustrating their application with examples of practice and concludes by outlining the process of putting a plan into action the book concludes with ten case studies that illustrate various approaches to planning experimentation and implementation some revealing false starts and lessons learned and all conveying the message that assessment is an iterative on going process that needs constant refinement the cases represent a wide variety of institutional and organizational types and demonstrate how each selected methods suited to their capacities and cultures

The Body in Professional Practice, Learning and Education

2014-11-14

writing qualitative research on practice brings together key authors in the field of qualitative research to critique current trends and expand discourse about the challenges and practices of writing qualitative research this book is located in the context of professional practice and the practice world it scopes and maps the broad horizons of qualitative

research on practice and explores writing in major qualitative research traditions a key issue addressed in writing qualitative research particularly the narrative forms is finding a way to write that encapsulates the goals and genre of the research project writing is presented as a process and journey and also a way of thinking and creating knowledge within research writing is an essential expression of the research frame of reference and a key element of the research genre this book explores writing for a range of publications including books chapters theses and papers for journals the practical and accessible style of this book makes it an invaluable resource for postgraduate research students teachers and supervisors and scholars of qualitative research

The Handbook of Practice and Research in Study Abroad

2010-11-24

offering an overview of the major fields in literacy studies this book presents a detailed and accessible discussion of key theories and their relevance in the primary classroom each chapter uses a real life case study to explore the application of theory in practice followed by a detailed discussion of the case study material by a leading name in the field including contributions from barbara comber michele knobel colin lankshear gunther kress brian street kevin leander and patricia enciso the text also offers reflections on theoretical foundations for research exploring literacy as a practice grounded in social cultural historical and political contexts and in relationships of power this second edition includes new chapters covering digital literacy space and play and multimodality examples and contributions from a range of international contexts including us uk canada australia and south africa further reading links essential reading for students at undergraduate and post graduate level on primary education courses and an invaluable guide for anyone wanting to understand literacy theory and successfully apply this to the classroom

Qualitative Research

2012

learning to learn provides a much needed overview and international guide to the field of learning to learn from a multidisciplinary lifelong and lifewide perspective a wealth of research has been flourishing on this key educational goal in recent years internationally it is considered to be one of the key competencies needed to compete in the global economy but also a crucial factor for individual and social well being this book draws on leading international contributors to provide a cutting edge overview of current thinking on learning to learn research policy and implementation in both formal and informal learning environments but what learning to learn is exactly and what its constituting elements are are much debated issues these seem to be the crucial questions if assessment and development of this malleable side of intelligence are to be accomplished the approach of this volume is to consider a broad conception of learning to learn not confined to only study strategies or metacognition yet acknowledging the importance of such

elements the book sets out to answer five main questions what is learning to learn what are its functions and how do we assess it what does it promise to the individual and society at large how is it conceived in national curricula internationally how can it be developed in a variety of contexts the text is organized into two parts the first addresses the core question of the nature of learning to learn from a theoretical and policy viewpoint and the second presents recent research carried out in several educational systems with special attention to assessment and curriculum it gives an account of pedagogical practices of learning to learn and its role in individual empowerment from childhood to adulthood contributors also highlight the potential use of learning to learn as an organizing concept for lifelong learning school improvement and teacher training along with potential conflicts with existing incentive practices and policies this book is a vital starting point and guide for any advanced student or researcher looking to understand this important area of research

Reflective Practice for Educators

2004-04-08

written specifically for education practitioners an introduction to educational research connecting methods to practice approaches research methods from a practice first perspective that aligns research with professional experiences and identifies the tools and resources readers can use when conducting their own research throughout the book authors chad r lochmiller and jessica n lester illuminate complex research concepts using problems of practice confronting educators to help readers make meaningful connections with key concepts and research practices the authors present balanced coverage across research methodologies that is linked to practice so readers clearly see research as a tool they can use to improve classrooms schools districts and educational organizations

Assessing Study Abroad

2015

case study research in practice explores the theory and practice of case study research helen simons draws on her extensive experience of teaching and conducting case study to provide a comprehensive and practical account of how to design conduct and communicate case study research it addresses questions often raised by students and common misconceptions about case research in four sections the book covers rationale concept and design of case study research methods ethics and reflexivity in case study interpreting analyzing and reporting the case generalizing and theorizing in case study research rich with tales from the field and summary memos as an aide memoire to future action the book provides fresh insights and challenges for researchers to guide their practice of case study research this is an ideal text for those studying and conducting case study research in education health and social care and related social science disciplines helen simons is professor emeritus of education university of southampton

Writing Qualitative Research on Practice

2009-01-01

this book has been written specifically for postgraduate students carrying out small scale research projects in and around their work environments and for those undertaking research projects as part of their higher education courses the book will also be useful to teachers tutors lecturers and trainers who want to use the concept of practitioner based enquiry to enquire into their own institutional practices and produce reports which can be submitted for academic credits leading to the award of certificates and degrees from universities and other professional bodies

Making Literacy Real

2014-11-17

master content from your textbook with this helpful study tool corresponding to the chapters in basic nursing 7th edition this study guide helps you understand and apply material with chapter review questions activities case studies and more chapter review questions include matching short answer multiple choice and true false questions to provide evaluation and test taking practice skills performance checklists help you measure your mastery of important nursing procedures each chapter includes a case study with related questions allowing you to apply what you ve learned instructions for creating and using study charts assist you in organizing the material and reviewing key concepts study group questions make it easier for you to review material with your peers

Learning to Learn

2014-04-28

lost in practice offers a further development of the notion of nordic educational action research as described in a earlier volume nurturing praxis 2008 aiming to deepen and enrich understandings of the nordic educational tradition and its various practices it explores nordic traditions and theories such as bildung practical knowledge regime and translation theory with the aim of furthering a seminal conversation between practice theory and action research furthermore it illuminates the use of these theories in the context of nordic countries by presenting a number of case studies on professional development practices in which specific forms and arenas for enhancing dialogue and meaning making are in focus the practices of study and research circles peer group mentoring and dialogue conferences as developed in the nordic countries throughout the 20th century are presented

and discussed both in terms of established traditions and of practices of collaborative development the book also reflect on the regional traditions and educational practices in the nordic countries are reflected on in the third part of the book the volume addresses teachers at all levels in the educational system particularly those who are interested in understanding educational action research and furthering collaborative forms of professional development based on insights from different traditions for understanding and furthering the development of educational practices without getting lost

An Introduction to Educational Research

2015-12-11

this manual provides practical advice on teaching in a wide range of technologies including the internet and multimedia packages

Case Study Research in Practice

2009-03-18

this book is the only research methods book you need to succeed whilst studying nursing and midwifery ideal for all pre and beyond registration nurses this book has everything you need to know about consuming critiquing and using research it then builds on this foundation to develop these ideas into workable practice for real world research inspired by over 25 years combined experience the authors have structured the book around the complimentary spheres of theory and practice and take you through each step of the research process demonstrating how to choose a question design your research proposal collect data analyse your findings and write up your research it explores evidence based research literature and systematic reviews ethics secondary data research design methodologies and individual methods data analysis quantitative and qualitative interwoven with case studies and embracing quantitative qualitative and mixed methods alike this balanced textbook provides an introduction to a wide range of theories and methods and is packed full of material specially created to meet student and instructor needs whether you are new to research methods or returning to formal education and hoping to conduct your own research this book is your ideal companion

Practitioner-Based Enquiry

2013-04-15

this book shares a range of examples where international students have undertaken a work placement practicum internship or participated in work integrated learning contributions reflect on the successes and challenges that this particularly diverse group of students experience when undertaking work placement programs in a variety of disciplines such as education engineering and health the book explores these experiences via three main conceptualisations 1 internationalisation and interculturalisation including the diversity of international student cohorts and the associated policy practices and assessment related to international students in higher education 2 multi socialisation of international students with a focus on new cultural contexts professional learning and disciplinarity and 3 reflection and reflective practice acknowledging that for improvement and change to occur those involved need to reflect on current and possible future practice a working model of effective practice is introduced which can inform prospective international students their mentors supervisors work placement coordinators and other relevant university staff
