writers observers and practitioners of international politics frequently invoke the term geopolitics to describe explain or analyze specific foreign policy issues and problems such generalized usage ignores the fact that geopolitics as a method of understanding international relations has a history that includes a common vocabulary well established if sometimes conflicting concepts an extensive body of thought and a recognized group of theorists and scholars in geopolitics francis p sempa presents a history of geopolitical thought and applies its classical analyses to cold war and post cold war international relations while mindful of the impact of such concepts as globalization and the information revolution on our understanding of contemporary events sempa emphasizes traditional geopolitical theories in explaining the outcome of the cold war he shows that the struggle between the western allies and the soviet empire was unique in its ideological component and nuclear standoff the cold war fits into a recurring geopolitical pattern it can be seen as a consequence of competition between land powers and sea powers and between a potential eurasian hegemonic power and a coalition of states opposed to that would be hegemony the collapse of the soviet empire ended the most recent threat to global stability acting as a successor to the british empire the united states organized funded and led a grand coalition that successfully countered the soviet quest for domination no power or alliance posed an immediate threat to the global balance of power indeed the end of the cold war generated hopes for a new world order and predictions that economics would replace geopolitics as the driving force in international politics russian instability the nuclear dimension of
