for twenty years this book now in its 5th edition has provided information on adverse drug interactions that is unrivalled in coverage and scholarship adverse drug reactions many of them ascribable to interactions with other drugs or with chemical substances in food or the environment are thought to cause or complicate one in twenty of hospital admissions the book is conveniently divided into two parts part 1 comments on drug interactions and their mechanisms on a pharmacokinetic and pharmacodynamic level while part 2 consists of drug interaction tables divided and subdivided into categories of disorders and the drugs used in the treatment of these disorders if safety in drugs is to improve education of prescribers is vitally important this book with its up to date and coordinated approach serves that purpose well the real threat as the authors remind us is the ignorance of practitioners not the drug itself the volume is therefore an essential addition to the shelves of those responsible for the prescription of drugs in order to prevent a potential backlash when used in combination with other drugs

or chemical substances

this book offers a description of current and recently developed laboratory assays in the field of haemostasis and thrombosis it is the result of a unique cooperation between experts from more than 60 institutes in 12 european countries brought together by the eca t european concerted action on thrombosis and disabilities under the auspices of the commission of the european communities in brussels belgium the ecat which was initiated in 1981 designed and performed three prospective clinical studies to establish haemostatic factors as risk indicators of thrombosis included were patients with angina pectoris at risk from myocardial infarction patients undergoing angioplasty at risk from re stenosis and patients receiving hip replacement at risk from deep venous thrombosis assay procedures were the

chosen training courses for technicians held and essential reagents were supplied from a central source a quality control assessment scheme served to compare assay results both within and between laboratories in the angina pectoris study centres determined most of the assays locally in the other two studies assays were performed centrally the need for further quality assessment in europe dr j f davidson in glasgow led to a separate activity coordinated by including coagulation inhibitors and plasminogen as risk factors for familial venous thrombosis the editors hope the eca t assay procedures book will contribute to further harmonization of haemostasis assays and ultimately to their standardization
