includes a mid december issue called buyer guide edition

Flying Magazine

1969-07

covers london and an area approximately 50 miles around it

Interavia

1964

in june 1967 israel which seemed on the verge of being annihilated by its arab neighbors took six days to redraw the middle eastern strategic map in one of the most dramatic reversals of fortune in modern times the success was over a decade in the making following the suez crisis with the israeli forces being radically changed to create an army and air force upon which the country would rely when it became obvious the international community would take no action to implement guarantees made after the events of 1956 the israeli forces were honed in low level clashes during the 1960s notably the water wars which the israelis did so much to provoke by contrast the arab forces became complacent largely due to supplies of arms from the warsaw pact states with proper training this complacency could have been turned into military effectiveness but the arab forces were plagued by internal rivalries and high commands too often depending upon politically reliable officers rather than those who were militarily effective the egyptian forces could not fight the israelis alone complained loudly about president nasser s lack of action against israel nasser s decision in early 1967 to regain the prestige he had lost since the heady days of the suez crisis with a demonstration in the sinai peninsula was interpreted by the israelis as preparations for an invasion nasser did nothing to persuade them otherwise and when it was clear the international community would do nothing the israelis decided to strike egypt and in turn syria and jordan the israeli campaign was heralded by a massive surprise air attack first on the egyptians and then on the other neighboring states and ground offensives then followed in succession volume 1 of the june 1967 arab israeli six day war provides an in depth background to the long running confrontation between arab and jew in the middle east a detailed overview of the rival air forces that would become embroiled in the conflict and an account of the opening israeli air strikes against egyptian target

World Aviation Directory

1988

covers the whole civil aviation scene regarding aircraft registered in britain as well as those overseas airliners likely to be seen in british skies

Air Pictorial

1959

flying as everyone knows is generally regarded as the safest means of transportation yet for that to be the case an enormous amount of testing is undertaken central to this of course are the test pilots who fly the aircraft but it is the men behind the scenes who deal with the technical aspects of the aircraft the flight test observers and engineers numerous books have been written by test pilots but few if any from the perspective of an aeronautical engineer working as flight test observer engineer in partnership with the test pilot this book is an account of the author s flight testing career from the 1960s to early 1980s at avro and the civil aviation authority caa during the author s time at avro he flew on the development and certification test flights of the avro 748 748mf shackletons nimrod and handley page victor tanker in the caa his role turned to regulation making flight test assessments of manufacturer s prototypes and production aircraft to check compliance with the caa s flight safety requirements the scope ranged from single engine light aircraft to large civil transport aircraft it involved frequent visits to foreign manufacturers and also included his participation in the caa s concorde certification flight test programme flight testing involves risk advancements in the understanding of aerodynamics and an increasingly professional approach to risk management improved safety but it would never be risk free several of the author s close friends and colleagues died in flight test accidents during this period of rapid aeronautical development all on civil aircraft types it is because of such people that the millions of flights undertaken each year are trouble free
