Popular Science 2008-04 we have reached a point in human history where the continued survival of our species is in doubt humanity has progressed scientifically and materially but our spiritual psychological and emotional development has lagged far behind technological advancements this has resulted in humankind finding itself in a perilous situation that can be characterized as an age of anxiety the solution to this condition is likely more obvious than the intellect is willing to admit in existence with and without time i examine the question of whether the paradox that is human nature which encompasses the unity of opposites contains within itself

the answer to our current plight what i conclude is that the remedy to our present predicament can be found in the collective unconscious of humanity it is by bringing into consciousness what the intellect either does not know or does not wish to know that we realize a fantastic future awaits us as individuals and as a society the freedom to determine what and who we are is pivotal for us to fulfill our potential and secure our destiny political and religious freedom come to mind quickly when we think of being free but also integral for self realization are cognitive and emotional freedom the prescience to achieve a thriving tomorrow will depend upon the humility to accept that our growth and development are dependent upon intelligence beyond solely that of the cognitive mind existence with and without time explores how to bring the wisdom of intelligence that is not our own into knowable reality through the use of myth mindfulness and devotion to authenticity we can then experience the stillness and peace in the true nature of humankind which reveals the presence and love of ultimate reality as well as the rationale for existence

EXISTENCE WITH AND WITHOUT TIME: Discovering the True Nature of Humankind 2022-09-25 maclife is the ultimate magazine about all things apple it s authoritative ahead of the curve and endlessly entertaining maclife provides unique content that helps readers use their macs iphones ipods and their related hardware and software in every facet of their personal and professional lives

Mac Life 2008-04 many people look at the world through a scientific lens that seems to forbid religious conviction but then find themselves drawn by curiosity if not longing to the religious worldview is this tension inevitable or unnecessary the famously successful marriage of charles and emma darwin illustrates the problem charles and emma were very close to each other in social background and knowledge of the world yet they found it difficult to agree on the question of god were their religious beliefs driven apart more by his science or by their society were these potentially compatible or inherently irreconcilable charles and emma darwin the option to believe searches for answers in the family s history and individual personalities as well as in the cultural social and intellectual history of that family s society the book also looks back on the darwins predicament from the perspective of modern science and theology and suggests it is society not science that creates the modern tension between science and religion there is an intellectual option to believe in god that seemed unavailable to victorians like charles darwin yet is certainly available to us today

Charles and Emma Darwin: The Option to Believe 2022-05-05 popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

Yoga Journal 2007-09 big history is a new field on a grand scale it tells the story of the universe over time through a diverse range of disciplines that spans cosmology physics chemistry astronomy geology evolutionary biology anthropology and archaeology thereby reconciling traditional human history with environmental geography and natural history weaving the myriad threads of evidence based human knowledge into a master narrative that stretches from the beginning of the universe to the present the big history framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them teaching big history is a powerful analytic and pedagogical resource and serves as a comprehensive guide for teaching big history as well for sharing ideas about the subject and planning a curriculum around it readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around big history the book includes teaching materials examples and detailed sample exercises this book is also an engaging first hand account of how a group of professors built an entire big history general education curriculum for first year students demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike

Teaching Big History 2015 the modern west has made the focus on individuality individual freedom and self identity central to its self definition and these concepts have been crucially shaped by christianity this book surveys how the birth of the christian worldview affected the evolution of individualism in western culture as a cultural meme applying a biological metaphor and richard dawkins definition of a meme this work argues the advent of individualism was not a sudden innovation of the renaissance or the enlightenment but a long evolution with characteristic traits this evolution can be mapped using profiles of individuals in different historical eras who contributed to the modern notion of individualism utilizing excerpts from original works from augustine to nietzsche a compelling narrative arises from the slow but steady evolution of the modern self the central argument is that christianity with its characteristic inwardness was fundamental in the development of a sense of self as it affirmed the importance of the everyday man and everyday life

The Christian Roots of Individualism 2019-11-28 how can you turn an english department into a revenue center how do you grade students if they are customers you must please how do you keep industry from dictating a university s research agenda what happens when the life of the mind meets the bottom line wry and insightful shakespeare einstein and the bottom line takes us on a cross country tour of the most powerful trend in academic life today the rise of business values and the belief that efficiency immediate practical usefulness and marketplace triumph are the best measures of a university s success with a shrewd eye for the telling example david kirp relates stories of marketing incursions into places as diverse as new york university s philosophy department and the university of virginia s business school the high minded university of chicago and for profit devry university he describes how universities brand themselves for greater appeal in the competition for top students how academic super stars are wooed at outsized salaries to boost an institution s visibility and prestige how taxpayer supported academic research gets turned into profitable patents and ideas get sold to the highest bidder and how the liberal arts shrink under the pressure to be self supporting far from doctrinaire kirp believes there s a place for the market but the market must be kept in its place while skewering philistinism he admires the entrepreneurial energy that has invigorated academe s dreary precincts and finally he issues a challenge to those who decry the ascent of market values given the plight of higher education what is the alternative table of contents introduction the new u part i the higher education bazaar 1 this little student went to market 2 nietzsche s niche the university of chicago 3 benjamin rush s brat dickinson college 4 star wars new york university part ii management 101 5 the dead hand of precedent new york law school 6 kafka was an optimist the university of southern california and the university of michigan 7 mr jefferson s private college darden graduate school of business administration university of virginia part iii virtual worlds 8 rebel alliance the classics departments of sixteen southern liberal arts

quite fair and a good reporter he has a keen eye for the important ways in which bean counting has transformed universities making them financially responsible and also more concerned about developing shakespeare einstein and the bottom line lays out dozens of ways in which the ivory tower has leaned under the gravitational influence of economic pressures and the market carlos alcal sacramento bee reviews of this book the real subject of kirp s well researched and amply footnoted book turns out to be more than this volume s subtitle the marketing of higher education it is in fact the american soul where will our nation be if instead of colleges transforming the brightest young people as they come of age they focus instead on serving their paying customers and chasing the tastes they should be shaping where will we be without institutions that value truth more than money and intellectual creativity more than creative accounting kirp says plainly that the heart of the university is the common good the more we can all reflect upon that common good not our pocketbooks or retirement funds but what is good for the general mass of men and women the better the world of the american university will be and the better the nation will be as well peter s temes san francisco chronicle reviews of this book david kirp s excellent book shakespeare einstein and the bottom line provides a remarkable window into the financial challenges of higher education and the crosscurrents that drive institutional decision making kirp explores the continuing battle for the soul of the university the role of the marketplace in shaping higher education the tension between revenue generation and the historic mission of the university to advance the public good this fine book provides a cautionary note to all in higher education while seeking as many additional revenue streams as possible it is important that institutions have clarity of mission and values if they are going to be able to make the case for continued public support lewis collens chicago tribune reviews of this book in this delightful book david kirp tells the story of markets in u s higher education it should be the hour may already be too late stanley fish dean of the college of liberal arts and sciences the university of illinois at chicago this is quite simply the most deeply informed and best written recent book on the dilemma of undergraduate education in the united states david kirp is almost alone in stressing what relentless commercialization of higher education does to undergraduates at the
