this reference covers all aspects of antibiotic therapy the first section reviews all of the major microorganisms including bacteria viruses fungi and parasites the second section covers all aspects of vaccine and drug use for these microorganisms focusing on mechanisms of action resistance dosage regimens for adult and paediatric side effects and drug interactions a comprehensive and updated volume for the clinical virologist details laboratory procedures for detecting and handling viruses from specimen requirements and quality assurance to virus detection and identification from the fundamentals through the latest molecular methods presents the most current knowledge on the wide range of specific viral pathogens includes information on services provided by federal and state public health virology laboratories provides essential information for clinicians and laboratory virologists interferons documents the proceedings of a major international conference on chemistry and biology of interferons relationship to therapeutics held at squaw valley california in march 1982 the meeting was one of the 1982 ucla symposia on molecular and cellular biology organized through the molecular biology institute of the university of california at los angeles the book is organized into four parts part i presents papers on recombinant dna production of interferon it includes studies on the synthesis of human immune interferon in e coli and monkey cells the expression of human β interferon gene in heterologous cells and the molecular activities of recombinant and hybrid leukocyte interferons part ii deals with the biology of interferons covering topics such as interferon production control process the effect of interferon on cellular enzymes and human amniotic interferon part iii examines the factors relevant to clinical application of interferons including structure function studies with human interferon gamma and on human alpha interferon part iv presents clinical studies of interferon such as interferon a trials in human tumor diseases and interferon in renal transplant recipients includes subject section name section and 1968 1970 technical reports in the short turbulent history of aids research and treatment the boundaries between scientist insiders and lay outsiders have been crisscrossed to a degree never before seen in medical history steven epstein s astute and readable investigation focuses on the critical question of how certainty is constructed or deconstructed leading us through the views of medical researchers activists policy makers and others to discover how knowledge about aids emerges out of what he calls credibility struggles epstein shows the extent to which aids research has been a social and political phenomenon and how the aids movement has transformed biomedical research practices through its capacity to garner credibility by novel strategies epstein finds that nonscientist aids activists have gained enough of a voice in the scientific world to shape nih sponsored research to a remarkable extent because of the blurring of roles and responsibilities the production of biomedical knowledge about aids does not he says follow the pathways common to science indeed aids research can only be understood as a field that is unusually broad public and contested he concludes by analyzing recent moves to democratize biomedicine arguing that although aids activists have set the stage for new challenges to scientific authority all social movements that seek to democratize expertise face unusual difficulties avoiding polemics and accusations epstein provides a benchmark account of the aids epidemic

to date one that will be as useful to activists policy makers and general readers as to sociologists physicians and scientists provides information concerning research grants and contracts supported by the national cancer institute current information about research grants and contracts supported by the national cancer institute subject listing gives contract or grant number and topic investigator grant number and contract number indexes presenting a theoretical model of the social process of emerging illness the volume s introductory chapter identifies critical factors that shape different trajectories toward the construction of public health priorities through case studies of individual diseases and analyses of public awareness campaigns and institutional responses later chapters provide important insights into the reasons why some illnesses receive more attention and funding than others jacket

Research Awards Index 1985 this reference covers all aspects of antibiotic therapy the first section reviews all of the major microorganisms including bacteria viruses fungi and parasites the second section covers all aspects of vaccine and drug use for these microorganisms focusing on mechanisms of action resistance dosage regimens for adult and paediatric side effects and drug interactions

Biomedical Index to PHS-supported Research 1990 a comprehensive and updated volume for the clinical virologist details laboratory procedures for detecting and handling viruses from specimen requirements and quality assurance to virus detection and identification from the fundamentals through the latest molecular methods presents the most current knowledge on the wide range of specific viral pathogens includes information on services provided by federal and state public health virology laboratories provides essential information for clinicians and laboratory virologists

Biomedical Index to PHS-supported Research: Project number listing, investigator listing 1989 interferons documents the proceedings of a major international conference on chemistry and biology of interferons relationship to therapeutics held at squaw valley california in march 1982 the meeting was one of the 1982 ucla symposia on molecular and cellular biology organized through the molecular biology institute of the university of california at los angeles the book is organized into four parts part i presents papers on recombinant dna production of interferon it includes studies on the synthesis of human immune interferon in e coli and monkey cells the expression of human β interferon gene in heterologous cells and the molecular activities of recombinant and hybrid leukocyte interferons part ii deals with the biology of interferons covering topics such as interferon production control process the effect of interferon on cellular enzymes and human amniotic interferon part iii examines the factors relevant to clinical application of interferons including structure function studies with human interferon gamma and on human alpha interferon part iv presents clinical studies of interferon such as interferon a trials in human tumor diseases and interferon in renal transplant recipients

Antimicrobial Therapy and Vaccines 1999 includes subject section name section and 1968 1970 technical reports

American Book Publishing Record 1999 in the short turbulent history of aids research and treatment the boundaries between scientist insiders and lay outsiders have been crisscrossed to a degree never before seen in medical history steven epstein s astute and readable investigation focuses on the critical question of how certainty is constructed or deconstructed leading us through the views of medical researchers activists policy makers and others to discover how knowledge about aids emerges out of what he calls credibility struggles epstein shows the extent to which aids research has been a social and political phenomenon and how the aids movement has transformed biomedical research practices through its capacity to garner credibility by novel strategies epstein finds that nonscientist aids activists have gained enough of a voice in the scientific world to shape nih sponsored research to a remarkable extent because of the blurring of roles and responsibilities the production of biomedical knowledge about aids does not he says follow the pathways common to science indeed aids research can only be understood as a field that is unusually broad public and contested he concludes by analyzing recent moves to democratize biomedicine arguing that although aids activists have set the stage for new challenges to scientific authority all social movements that seek to democratize expertise face unusual difficulties avoiding polemics and accusations epstein provides a benchmark account of the aids epidemic to date one that will be as useful to activists policy makers and general readers as to sociologists physicians and scientists

Cancer Treatment Reports 1979 provides information concerning research grants and contracts supported by the national cancer institute

Official Summary of Security Transactions and Holdings Reported to the Securities

and Exchange Commission Under the Securities Exchange Act of 1934 and the Public Utility Holding Company Act of 1935 1989 current information about research grants and contracts supported by the national cancer institute subject listing gives contract or grant number and topic investigator grant number and contract number indexes

Clinical Virology Manual 2009-05-09 presenting a theoretical model of the social process of emerging illness the volume s introductory chapter identifies critical factors that shape different trajectories toward the construction of public health priorities through case studies of individual diseases and analyses of public awareness campaigns and institutional responses later chapters provide important insights into the reasons why some illnesses receive more attention and funding than others jacket
