Desert of Deceit 2008-09-01 no other individual has had as broad an impact on the auto industry during the past fifty years as Dave Power. Dave's persistence in getting auto executives to listen to customer concerns was key to the across-the-board rise in car quality and the influence of his JD Power and Associates rankings has permanently raised the bar on customer satisfaction. Enhanced with anecdotal quotes from Dave as well as dozens of industry insiders, Power is a compelling study of an intelligent, polite market research wonk who unblinkingly spoke truth to power and ended up making customer satisfaction a watchword not just in automotive but in all manufacturing and service industries. Foreword by CNBC's Bill Griffith.

POWER 2013-09-10 Cincinnati Magazine taps into the DNA of the city exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

Decisions and Orders of the National Labor Relations Board 1989 examines social and cultural phenomena through the lens of different television shows we all have opinions about. The television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it good or bad. Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television brings together forty original essays from today's leading scholars on television culture, writing about the programs they care and think the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis, suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs, past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered, addressing television series from the medium's earliest days to contemporary online transformations of television. How to Watch Television is designed to engender classroom discussion among television critics of all backgrounds.
