Locomotor Training 2011

locomotor training is aiming to promote recovery after spinal cord injury via activation of the neuromuscular system below the level of the lesion

Physical Rehabilitation 2019-01-25

rely on this comprehensive curriculum spanning text and reference now and throughout your career you ll find everything you need to know about the rehabilitation management of adult patients from integrating basic surgical medical and therapeutic interventions to how to select the most appropriate evaluation procedures develop rehabilitation goals and implement a treatment plan online you ll find narrated full color video clips of patients in treatment including the initial examination interventions and outcomes for a variety of the conditions commonly seen in rehabilitation settings

Spinal Cord Injury Rehabilitation 2009-03-26

one of the world s leading authorities in spinal cord injury and a participant in the human brain project brings you an evidenced based guide to the state of the art in spinal cord rehabilitation she has assembled an expert team of clinicians each with expertise in the content areas they address their work encompasses all of the new scientific knowledge and technological advances practitioners need to know to determine the most effective rehabilitation interventions for each patient and to attain maximum restoration of function in individuals with sci

Journal of Rehabilitation Research & Development 2011

robot navigation includes different interrelated activities such as perception obtaining and interpreting sensory information exploration the strategy that guides the robot to select the next direction to go mapping the construction of a spatial representation by using the sensory information perceived localization the strategy to estimate the robot position within the spatial map path planning the strategy to find a path towards a goal location being optimal or not and path execution where motor actions are determined and adapted to environmental changes this book integrates results from the research work of authors all over the world addressing the abovementioned activities and analyzing the critical implications of dealing with dynamic environments different solutions providing adaptive navigation are taken from nature inspiration and diverse applications are described in the context of an important field of study social robotics

Advances in Robot Navigation 2011-07-05

from a hospital admittance to discharge to outpatient rehabilitation spinal cord injuries addresses the wide spectrum of rehabilitation interventions and administrative and clinical issues specific to patients with spinal cord injuries comprehensive coverage includes costs life expectancies acute care respiratory care documentation goal setting clinical treatment complications and activities of daily living associated with spinal cord patients in addition to physical therapy interventions and family education components this resource includes content on incidence etiology diagnosis and clinical features of spinal cord injury case studies with clinical application thinking exercises help you apply knowledge from the book to real life situations thoroughly referenced evidence based content provides the best evidence for treatment based on the most current research tables and boxes throughout each chapter organize and summarize important information for quick reference clinical note boxes provide at

a glance access to helpful tips over 500 clinical photos line drawings radiographs and more bring important concepts to life highly respected experts in spinal cord injury rehabilitation editors sue ann sisto erica druin and martha sliwinski provide authoritative guidance on the foundations and principles of practice for spinal cord injury companion dvd includes video clips of the techniques described throughout the book that demonstrate how to apply key concepts to practice

Spinal Cord Injuries - E-Book 2008-01-31

the neuro rehab text that mirrors how you learn and how you practice take an evidence based approach to the neurorehabilitation of adult and pediatric patients across the lifespan that reflects the apta s patient management model and the who s international classification of function icf you ll study examination and interventions from the body structure function impairments and functional activity limitations commonly encountered in patients with neurologic disorders then understanding the disablement process you ll be able to organize the clinical data that leads to therapeutic interventions for specific underlying impairments and functional activity limitations that can then be applied as appropriate anytime they are detected regardless of the medical diagnosis

Lifespan Neurorehabilitation 2018-01-02

specialised chapters about biomechanics paediatric spinal cord injury and high cervical injuries insight into the lived experience of individuals with a spinal cord injury documentation of the patient journey from injury to total rehabilitation practical information on mobility devices and returning to driving appendix of common assessments for spinal cord injuries includes an ebook with purchase of the print book

Rehabilitation in Spinal Cord Injuries 2020-02-01

achieve the best functional outcomes for your patients here is a practical step by step guide to understanding the treatment process and selecting the most appropriate interventions for your patients superbly illustrated in depth coverage shows you how to identify functional deficits determine what treatments are appropriate and then implement them to achieve the best functional outcome for your patients learn through reading seeing and doing seventeen case studies in the text correspond to seventeen videotaped case studies with voice over narration online at fadavis com these videos show you how practicing therapists interact with their clients in rehabilitation settings from sample elements of the initial examination through the interventions to the functional outcomes to make a difference in patients lives

Improving Functional Outcomes in Physical Rehabilitation 2021-11-19

this comprehensive and practical reference is the perfect resource for the medical specialist treating persons with spinal cord injuries the book provides detail about all aspects of spinal cord injury and disease the initial seven chapters present the history anatomy imaging epidemiology and general acute management of spinal cord injury the next eleven chapters deal with medical aspects of spinal cord damage such as pulmonary management and the neurogenic bladder chapters on rehabilitation are followed by nine chapters dealing with diseases that cause non traumatic spinal cord injury a comprehensive imaging chapter is included with 30 figures which provide the reader with an excellent resource to understand the complex issues of imaging the spine and spinal cord

Spinal Cord Medicine 2011-12-07

this two volume encyclopedia surveys all aspects of violence and abuse in domestic family environments including specific types of abuse laws and legal issues and the impacts of abuse wide ranging and authoritative this resource provides extensive coverage of widely recognized forms of violence and abuse in family settings including physical verbal and emotional abuse of spouses and intimate partners both female and male as well as children in addition the encyclopedia scrutinizes less recognized types of violence and abuse in households such as abuse of siblings by other siblings and abuse of parents or grandparents by children and grandchildren both minor and adult family violence and abuse is a valuable resource for readers seeking a better understanding of the true scope and impact of these various forms of violence and abuse important factors that contribute to incidence of family violence and abuse and the various laws programs and therapy alternatives that have been created to help victims of abuse and rehabilitate offenders

Journal of Rehabilitation Research and Development 2006

beyond a how to book assessing woman battering in mental health services discusses the issues underlying the identification and assessment of battered women and assists clinicians in providing an appropriate and safe response for them it presents ways to build collaboration that improves assessment and referrals and establishes a supportive environment that enhances disclosure of woman battering identifying potential strengths and further safety rather than increasing risks concluding chapters consider issues involved in assessing women of different racial backgrounds and men who battered their female partners this timely book is directed to mental health practitioners and domestic violence workers as well as academics researchers and students in the helping professions

Journal of Rehabilitation R & D 2006

a greatly expanded and heavily revised second edition this popular guide provides instructions and clear examples for running analyses of variance anova and several other related statistical tests of significance with spss no other guide offers the program statements required for the more advanced tests in analysis of variance all of the programs in the book can be run using any version of spss including versions 11 and 11.5 a table at the end of the preface indicates where each type of analysis e.g. simple comparisons can be found for each type of design e.g. mixed two factor design providing comprehensive coverage of the basic and advanced topics in anova this is the only book available that provides extensive coverage of spss syntax including the commands and subcommands that tell spss what to do as well as the pull down menu point and click method pac detailed explanation of the syntax including what is necessary desired and optional helps ensure that users can validate the analysis being performed the book features the output of each design along with a complete explanation of the related printout the new edition was reorganized to provide all analysis related to one design type in the same chapter it now features expanded coverage of analysis of covariance ancova and mixed designs new chapters on designs with random factors multivariate designs syntax used in pac and all new examples of output with complete explanations the new edition is accompanied by downloadable resources with all of the book's data sets as well as exercises for each chapter this book is ideal for readers familiar with the basic concepts of the anova technique including both practicing researchers and data analysts as well as advanced students learning analysis of variance

Family Violence and Abuse [2 volumes] 2023-11-30

the authors explore recent progress in theoretical experimental studies of motor control from the perspective of practitioners who

work with patients that have motor disorders the text also develops new approaches to motor rehabilitation

Catalogue of Copyright Entries 1912

this volume draws attention to an implicit relationship between law and psychology from a feminist perspective the authors critically review the current use of psychology in law and identify a powerful collusion between the two fields which works actively against the interests of women

Assessing Woman Battering in Mental Health Services 1998

understand how a patient s conditions might affect physical therapy and outcomes so that you can design safe and effective interventions the only pathology textbook written specifically for physical therapists pathology implications for the physical therapist third edition offers guidelines precautions and contraindications for interventions with patients who have musculoskeletal or neuromuscular problems as well as other conditions such as diabetes heart disease or pancreatitis learn about the cause of these conditions the pathogenesis medical diagnosis and treatment and most importantly the special implications for the therapist in addition to addressing specific diseases and conditions this text emphasizes health promotion and disease prevention strategies and covers issues with implications for physical therapy management such as injury inflammation and healing the lymphatic system and biopsychosocial spiritual impacts on health care with this practical and evidence based text now enhanced with full color illustrations and the latest research you ll know what to factor into your clinical decisions to achieve the best outcomes for your patients incorporates the medical model the disablement model and the icf model incorporates preferred practice patterns from the guide to physical therapist practice second edition throughout the text presents key information in at a glance format that is organized by body system for easy reference provides the basic science information and the clinical implications of disease within the rehabilitation process covering common illnesses and diseases adverse effects of drugs organ transplantation laboratory values and much more focuses on health promotion and disease prevention throughout special implications for the therapist sections present the most likely practice patterns associated with each disease or disorder and address precautions contraindications and considerations specific to pts current information on conditions medical testing and treatment and practice models keeps you up to date on the latest research findings and recent changes in the field companion evolve site provides easy access to articles referenced in the text with links to medline tables and text boxes throughout the text summarize important information and highlight key points

Levine's Guide to SPSS for Analysis of Variance 2003-06-20

with its focus on the connection between health and mental health symptoms this seminal groundbreaking work continues to forge new directions in the field of domestic violence describing a condition that is the basis for the battered woman defense cited in cases of physically and psychologically abused women who have killed their abusers it continues to be used as a defense to explain premeditated assault or murder completely updated the fourth edition reflects the significant changes in the field since the book was last published incorporating affordable care act aca guidelines on health care and domestic violence and data from the adverse childhood experiences study it examines new research regarding battered women and cross cultural and cross national issues and includes several new chapters addressing issues ranging from murder suicide in domestic violence cases to proposed legislation and congressional resolutions the fourth edition provides new findings worldwide that reinforce the cycle theory of violence it reflects new research on traumatic responses and addresses trauma informed and trauma specific psychotherapy interventions with youth in juvenile detention centers information from government task forces regarding children exposed to violence and juvenile justice and new findings regarding the application of psychology to the legal system entirely new to the fourth edition is a

section about reforming family court and divorce presumptions this is crucial reading for nearly all health and mental health workers who may be called upon to ask clients about experiences of domestic violence and must respond knowledgeably and effectively new to the fourth edition fully revised and updated incorporates aca guidelines on health care and domestic violence includes data from the adverse childhood experiences study addresses findings regarding battered women and cross cultural and cross national issues new chapter on murder suicide in domestic violence cases new chapter on trauma treatment for victims of intimate partner violence ipv new chapter on human trafficking and sexual exploitation of children new chapter on false confessions of battered women

Levine's Guide to SPSS for Analysis of Variance 1912

this book is a collection of summarized papers and poster presentations from the 4th international congress rehabilitation mobility exercise sports which will be of interest to all those involved in the field of human movement sciences and the rehabilitation professions rehabilitation medicine is a relatively young discipline as is the science of human movement but both have progressed rapidly from their inception in the latter half of the 20th century to take their current place as important multi disciplinary evidence based academic and clinical research subjects

in this comprehensive clinically directed reference for the diagnosis and treatment of persons with spinal cord injury and related disorders editors of the two leading texts on spinal cord injury sci medicine have joined together to develop a singular premier resource for professionals in the field spinal cord medicine third edition draws on the expertise of seasoned editors and experienced chapter authors to produce one collaborative volume with the most up to date medical clinical and rehabilitative knowledge in spinal cord injury management across the spectrum of care this jointly configured third edition builds on the foundation of both prior texts to reflect the breadth and depth of the specialty containing 60 state of the art chapters the book is divided into sections covering introduction and assessment acute injury management and surgical considerations medical management neurological and musculoskeletal care rehabilitation recent research advances system based practice and special topics new and expanded content focuses on the significant changes in the epidemiology of traumatic injury the classification of sci and the latest medical treatments of multiple medical complications in addition chapters discuss new surgical considerations in acute and chronic sci and the many advances in technology that impact rehabilitation and patients overall quality of life with chapters authored by respected leaders in spinal cord medicine including those experienced in spinal cord injury medicine physical medicine and rehabilitation neurology neurosurgery therapists and researchers this third edition goes beyond either of the prior volumes to combine the best of both and create a new unified reference that defines the current standard of care for the field key features covers all aspects of spinal cord injury and disease with updates on epidemiology of spinal cord injury the classification of spinal cord injury newer methods of surgical intervention post injury updates to medications advances in rehabilitation and changes in technology brings together two leading references to create a singular evidence based resource that defines the current standard of care for spinal cord medicine presents the most current medical clinical and rehabilitation intelligence chapters written by experts across the spectrum of specialists involved in the care of persons with spinal cord injury includes access to the downloadable ebook

Progress in Motor Control: Effects of age, disorder, and rehabilitation 2000

provides a comprehensive update on therapies for parkinson s disease and other movement disorders describes the basic mechanisms of neurodegeneration pharmacologic interventions for motor and non motor symptoms and surgical management features summary tables

and algorithms that serve as a quick reference guide for practical treatment decisions the expert guidance of recognised authorities will enable readers of this book to plan their patients care with greater confidence

The Implicit Relation of Psychology and Law 2014-11-05

in response to a number of large corporate failures risk management has recently become a major consideration for most organizations at the same time taxation has been recognized as an area having its own unique risk profiles this book provides a practical guide for those working in today s ever changing corporate environment it contains an introduction to tax risk management and discussions on the tax control framework that allow corporate tax departments to identify and manage companies tax related risks the book also includes country chapters which provide practical examples of the development and application of tax control frameworks

Pathology - E-Book 2016-10-28

victimology and crime prevention are growing interrelated areas cutting across several disciplines victimology examines victims of all sorts of criminal activity from domestic abuse to street violence to victims in the workplace who lose jobs and pensions due to malfeasance by corporate executives crime prevention is an important companion to victimology because it offers insight and techniques to prevent situations that lead to crime and attempts to offer ideas and means for mitigating or minimizing the potential for victimization in many ways the two fields have developed along parallel yet separate paths and the literature on both has been scattered across disciplines as varied as sociology law and criminology public health and medicine political science and public policy economics psychology and human services and more the encyclopedia of victimology and crime prevention provides a comprehensive reference work bringing together such dispersed knowledge as it outlines and discusses the status of victims within the criminal justice system and topics of deterring and preventing victimization in the first place and responding to victims needs two volumes containing approximately 375 signed entries provide users with the most authoritative and comprehensive reference resource available on victimology and crime prevention both in terms of breadth and depth of coverage in addition to standard entries leading scholars in the field have contributed anchor essays that in broad strokes provide starting points for investigating the more salient victimology and crime prevention topics a representative sampling of general topic areas covered includes interpersonal and domestic violence child maltreatment and elder abuse street violence hate crimes and terrorism treatment of victims by the media courts police and politicians community response to crime victims physical design for crime prevention victims of nonviolent crimes deterrence and prevention helping and counseling crime victims international and comparative perspectives and more

The Battered Woman Syndrome, Fourth Edition 2010

in legal spectatorship kelli moore traces the political origins of the concept of domestic violence through visual culture in the united states tracing its appearance in article iv of the constitution slave narratives police notation cybernetic theories of affect criminal trials and the look of the battered woman moore contends that domestic violence refers to more than violence between intimate partners it denotes the mechanisms of racial hierarchy and oppression that undergird republican government in the united states moore connects the use of photographic evidence of domestic violence in courtrooms which often stands in for women s testimony to slaves silent experience and witnessing of domestic abuse drawing on harriet jacobs s incidents in the life of a slave girl abolitionist print culture courtroom witness testimony and the work of hortense spillers moore shows how the logic of slavery and antiblack racism also dictates the silencing techniques of the contemporary domestic violence courtroom by positioning testimony on contemporary domestic violence prosecution within the archive of slavery moore demonstrates that domestic violence

and its image are haunted by black bodies black flesh and black freedom duke university press scholars of color first book award recipient

Rehabilitation 2018-12-28

forensic victimology examining violent crimes in investigative and legal contexts third edition introduces criminologists and criminal investigators to the idea of systematically gathering and examining victim information for the purposes of addressing investigative and forensic issues the book continues the legacy of the first two editions with both theoretical and applied coverage of the subject of victimology the specific applications discussed remain investigative and provide legal venues designed to assist investigators and forensic examiners with the task of performing victimological assessments sections delve into the areas of femicide and mass shootings which are global problems that further emphasize related casework and research provides context and scope for both the investigative and forensic aspects of case examination and evidence interpretation approaches the study of victimology from a realistic standpoint moving away from stereotypes and archetypes includes case examples to demonstrate the application of forensic victimology

Spinal Cord Medicine 2008-10-13

the encyclopedia of domestic violence is a modern reference from the leading international scholars in domestic violence research this ground breaking project has created the first ever publication of an encyclopedia of domestic violence the primary goal of the encyclopedia is to provide information on a variety of traditional as well as breakthrough issues in this complex phenomenon the coverage of the encyclopedia is broad and diverse encompassing the entire life span from infancy to old age the entries include the traditional research areas such as battered women child abuse and dating violence however this encyclopedia is unique in that it includes many under studied areas of domestic violence such as ritual abuse torture within families domestic violence against women with disabilities pseudo family violence and domestic violence within military families it is also unique in that it examines cross cultural perspectives of domestic violence one of the key special features in this encyclopedia is the cross reference section at the end of each entry this allows the reader the ability to continue their research of a particular topic this book will be an easy to read reference guide on a host of topics which are alphabetically arranged precautions have been taken to ensure that the encyclopedia is not politically slanted rather it is hoped that it will serve as a basic guide to better understanding the myriad issues surrounding this labyrinthine topic topics covered include victims of domestic violence theoretical perspectives and correlates to domestic violence cross cultural perspectives and religious perspectives understudied areas within domestic violence research domestic violence and the law and child abuse and elder abuse
