"Why I Became an Occupational Physician" and Other Occupational Health Stories 2020-07-16

why i became an occupational physician and other occupational health stories brings together an edited collection of the short articles published in the journal occupational medicine between 2002 and 2018 the articles originally appeared as fillers commissioned to literally fill the blank spaces at the end of the main scientific papers but they soon became a feature in their own right written by doctors working in occupational medicine and health the fillers began as a series of pieces exploring the varied and often surprising reasons why the individuals chose to pursue this unique speciality whether it was a natural career move triggered by a specific event or stumbled upon by chance over time the articles became much broader in their scope and the journal began to attract pieces from some brilliant writers mike gibson john challenor nerys williams and of course the superlative anthony seaton amongst many others each article offers something different a peek into history a humorous adventure a quiet musing or a thought provoking observation but all are tied together under the umbrella of occupational medicine a speciality that is often little known or understood in the wider world of medicine this book brings together over 15 years worth of fascinating and diverse articles into one volume for the first time giving a rare insight into the world of the occupational physician

Textbook Of Occupational Medicine Practice (Fifth Edition) 2022-04-07

following the success of the fourth edition which was highly commended in the primary health care category for the 2018 british medical association bma medical book awards this fifth edition has been substantially revised and updated to reflect significant changes in health care practice and to incorporate the explosion of information since the advent of the fourth industrial revolution and the covid 19 pandemic as before the book covers target organ systems that can be affected by hazardous exposures in traditional industries and modern workplaces both of which coexist in different parts of the world and present unique occupational health challenges for the medical practitioner to this end this reference textbook focuses on the clinical presentations investigations and medical and work centric management of affected individuals we have retained consideration of some special issues relevant to occupational medicine practice in this new edition and included a new section relating to the multidisciplinary nature of occupational health practice the main emphasis

continues to be prevention of disease and early detection of health effects caused by work exposures this edition of the book has been updated to include new information and references we have kept some of the previous case studies and illustrations and introduced several new ones some of which reflect the changes of practice due to the covid 19 pandemic for example in risk communication recognition and management of the risks of health care and frontline work we have again asked international experts in occupational medicine and cross disciplinary medical specialties to jointly author many of the chapters some of the authors are from asia and others from europe the united states united kingdom and australia all the authors have either clinical and or academic experience in or related to occupational medicine practice the book is targeted at all those who are interested in the interaction between work and health and how occupational diseases and work related disorders may present and be managed it will be of interest to medical practitioners especially those in primary care and doctors intending to pursue a career in occupational medicine it would also be relevant for allied health and safety professionals wanting to know more about health effects resulting from occupational exposures other groups who may find this edition useful as a ready reference are medical students occupational health nurses or clinical specialists in diverse fields such as dermatology respiratory medicine infectious diseases or toxicology

Occupational Health Services 2013

workers and their families employers and society as a whole benefit when providers deliver the best quality of care to injured workers and when they know how to provide effective services for both prevention and fitness for duty and understand why instead of just following regulations designed for professionals who deliver manage and hold oversight responsibility for occupational health in an organization or in the community occupational health services guides the busy practitioner and clinic manager in setting up running and improving healthcare services for the prevention diagnosis treatment and occupational management of work related health issues the text covers an overview of occupational health care in the us and canada how it is organized who pays for what how it is regulated and how workers compensation works how occupational health services are managed in practice whether within a company as a global network in a hospital or medical group practice as a free standing clinic or following other models management of core services including recordkeeping marketing service delivery options staff recruitment and evaluation and program evaluation depth and detail on specific services including clinical service delivery for injured workers periodic health surveillance impairment assessment fitness for duty alcohol and drug testing employee assistance mental health health promotion emergency management global health management and medico legal services this highly focused and relevant combined handbook and textbook is aimed at improving the provision of care and health protection for workers and will be of use to both managers and health practitioners from a range of backgrounds including but not limited to medicine nursing health services administration and physical therapy
